**Secrets and Knowledge in Medicine and Science, 1500-1800** Apr 09 2022 Secrets played a central role in transformations in medical and scientific knowledge in early modern Europe. As a new fascination with novelty began to take hold from the late fifteenth century, Europeans thirsted for previously unknown details about the natural world: new

plants, animals, and other objects from nature, new recipes for medical and alchemical procedures, new knowledge about the human body, and new facts about the way nature worked. These 'secrets' became popular items of commerce and trade, as the quest for new and exclusive bits of information met the vibrant early modern marketplace. Whether disclosed widely in print or kept more circumspect in manuscripts, secrets helped drive an expanding interest in acquiring knowledge throughout early modern Europe. Bringing together international scholars, this volume provides a pan-European and interdisciplinary overview on the topic. Each essay offers significant new interpretations of the role played by secrets in their area of specialization. Chapters address key themes in early modern history and the history of medicine, science and technology including: the possession, circulation and exchange of secret knowledge across Europe; alchemical secrets and laboratory processes;

patronage and the upper-class market for secrets; medical secrets and the emerging market for proprietary medicines; secrets and cosmetics; secrets and the body and finally gender and secrets.

*CRISPR-Cas Systems* Oct 23 2020 CRISPR/Cas is a recently described defense system that protects bacteria and archaea against invasion by mobile genetic elements such as viruses and plasmids. A wide spectrum of distinct CRISPR/Cas systems has been identified in at least half of the available prokaryotic genomes. On-going structural and functional analyses have resulted in a far greater insight into the functions and possible applications of these systems, although many secrets remain to be discovered. In this book, experts summarize the state of the art in this exciting field.

**Energy Developments: New Forms, Renewables, Conservation** Dec 05 2021

*Energy Developments: New Forms, Renewables, Conservation* is a collection of papers that discusses alternative energy sources. In discussing these energy sources, the text considers factors such as technical, economic, and human dimensions. The first part of the text presents articles that cover forms of energy,

such as the feasibility of coal gasification and electric power from salinity gradients by reverse electro dialysis. Next, the book reviews materials about renewable forms of energy that include genetically improved hardwoods as a potential energy source and heat pump investigations for northern climate applications. In the last part, the text provides studies that deal with energy conservation, such as shared savings financing for energy efficiency and consumer information, and government energy conservation incentive programs. The book will be of use to scientists, engineers, and technicians involved in the research, development, and implementation of alternative energy technology.

*European Drawings 2* Jan 14 2020 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in

English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Buddhism May 10 2022 Based on a series of Oxford lectures delivered by a well-known Buddhist scholar, this volume covers the entire range of Buddhist thought. It introduces Buddhism as both religion and philosophy, discusses its common ground with other faiths throughout the world, contrasts monastic and popular Buddhism, and defines old and new schools of thought.

Accelerated Testing Mar 16 2020 The Wiley-Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes, Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians, and scientists. ". .

. a goldmine of knowledge on accelerated life testing principles and practices . . . one of the very few capable of advancing the science of reliability. It definitely belongs in every bookshelf on engineering." -Dev G. Raheja, Quality and Reliability Engineering International ". . . an impressive book. The width and number of topics covered, the practical data sets included, the obvious knowledge and understanding of the author and the extent of published materials reviewed combine to ensure that this will be a book used frequently." -Journal of the Royal Statistical Society A benchmark text in the field, Accelerated Testing: Statistical Models, Test Plans, and Data Analysis offers engineers, scientists, and statisticians a reliable resource on the effective use of accelerated life testing to measure and improve product reliability. From simple data plots to advanced computer programs, the text features a wealth of practical applications and a clear, readable style that makes even complicated

physical and statistical concepts uniquely accessible. A detailed index adds to its value as a reference source.

*Practical Common Lisp* Aug 21 2020 \* Treats LISP as a language for commercial applications, not a language for academic AI concerns. This could be considered to be a secondary text for the Lisp course that most schools teach . This would appeal to students who sat through a LISP course in college without quite getting it - so a "nostalgia" approach, as in "wow-lisp can be practical..." \* Discusses the Lisp programming model and environment. Contains an introduction to the language and gives a thorough overview of all of Common Lisp's main features. \* Designed for experienced programmers no matter what languages they may be coming from and written for a modern audience—programmers who are familiar with languages like Java, Python, and Perl. \* Includes several examples of working code that actually does something useful like Web programming

and database access.

Among Tibetan Texts Nov 23 2020 For three decades, E. Gene Smith ran the Library of Congress's Tibetan Text Publication Project of the United States Public Law 480 (PL480) - an effort to salvage and reprint the Tibetan literature that had been collected by the exile community or by members of the Bhotia communities of Sikkim, Bhutan, India, and Nepal. Smith wrote prefaces to these reprinted books to help clarify and contextualize the particular Tibetan texts: the prefaces served as rough orientations to a poorly understood body of foreign literature. Originally produced in print

quantities of twenty, these prefaces quickly became legendary, and soon photocopied collections were handed from scholar to scholar, achieving an almost cult status. These essays are collected here for the first time. The impact of Smith's research on the academic study of Tibetan literature has been tremendous, both for his remarkable ability to synthesize diverse materials into coherent accounts of Tibetan literature, history, and religious thought, and for the exemplary critical scholarship he brought to this field.

*Sociology in a Changing World* Mar 08 2022

Help your students visualize sociology all around them with William Kornblum's vibrant, visual, and research-based new ninth edition of SOCIOLOGY IN A CHANGING WORLD.

Comprehensive and student friendly, SOCIOLOGY IN A CHANGING WORLD presents a thematic approach that emphasizes the reality of social change and its impact on individuals, groups, and societies throughout the world. This unique emphasis on social change--which is visited in the book's features--helps students understand our similarities, our differences, and society as a whole. The text carefully balances contemporary and classic theory and research, with special attention to the works of female and minority social scientists and cross-cultural studies. Kornblum applies all the major perspectives of sociology without giving undue

emphasis to any single approach. Additionally, SOCIOLOGY IN A CHANGING WORLD is the chosen text for the Exploring Society: Introduction to Sociology Telecourse from Dallas TeleLearning. Challenging yet accessible, interesting and scholarly, Kornblum's ninth edition helps students think like sociologists long after their college experience. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

[Regional Model Life Tables and Stable Populations](#) Jul 20 2020 Regional Model Life Tables and Stable Populations, Second Edition maintains the tradition of research on the analysis of fertility and mortality as related to population growth and composition. The tables presented are two principal forms: model life tables and model stable populations. The included models are models of mortality and age composition; "west" model life tables and stable populations; "north" model life tables and stable

populations; "east" model life tables and stable populations; and "south" model life tables and stable populations. People involved in the study of population growth and composition will find the book useful.

International Relations and Security in the Digital Age Jun 18 2020 This book examines the impact of the information revolution on international and domestic security, attempting to remedy both the lack of theoretically informed analysis of information security and the US-centric tendency in the existing literature. International Relations and Security in the Digital Age covers a range of topics, including: critical infrastructure protection, privacy issues, international cooperation, cyber terrorism, and security policy. It aims to analyze the impact of the information revolution on international and domestic security; examine what existing

international relations theories can say about this challenge; and discuss how international relations theory can be developed to better meet this challenge. The analysis suggests that Liberalism's focus on pluralism, interdependence and globalization, Constructivism's emphasis on language, symbols and images (including 'virtuality'), and some elements of Realist strategic studies (on the specific topic of information warfare) contribute to a better understanding of digital age security. This book will be of interest to students of security studies, globalization, international relations, and politics and technology.
