Here is the first reference to give practical tips on the design, operation and performance of the AS/400, in a context accessible to readers who are most familiar with PC technology. The authors have extensive experience in systems consulting and training and helped develop the Jumpstart user support program. This book teaches the reader everything he/she needs to know in order to use FreeBSD to its full potential. It will show individuals how to use the same FreeBSD power that Yahoo!, the Internet Movie Database, and many other high profile internet sites depend on. Whether someone needs an enterprise class server, a small business server, or a dependable workstation, this book can be a very economical and powerful solution to your needs. "Apa Gunanya punya internet jika anak (didik) Anda tidak bertambah pintar ? Ya, itulah pertanyaannya ""menyakitkan"" yang seharusnya menampar pipi anda secara halus! Buku ini hendak memaksa anda, para orang tua siswa dan juga guru, untuk buru-buru sadar diri bahwa internet muncul di muka bumi bukan sekedar untuk cari senang, ber-hahahihi di Facebook saja. Saatnya telah tiba untuk banting setir, memanfaatkan internet untuk mendongkrak prestasi anak anda (dan juga anak didik anda jika anda seorang guru) sampai pada tingkat prestasi tertinggi. Internet tak cuma kaya dengan informasi. Internet tidak hanya penuh dengan fasilitas yang mencengangkan. Internet tidak juga cuma di integrasikan dengan sederet multimedia. Diluar keajaiban-keajaiban itu, ada satu titik penting yang mengubah peradaban manusia yakni INTERNET BISA DIAKSES SIAPAPUN." This simple introduction for beginning computer users cover the essentials of using the latest DOS release. Step-by-step tutorials lead the way, starting with plugging in the computer and following through to common DOS commands. With plenty of helpful tips and advice. Keluarga merupakan tempat pendidikan pertama bagi seorang anak sejak dalam kandungan. Hubungan orang tua dan anak mengalami dinamika yang sangat beragam. Buku ini memberikan gambaran bagaimana dampak pola asuh orang tua pada masa kanak-kanak terhadap perkembangan anaknya ketika beranjak dewasa. Buku ini penulis juga akan membahas tentang pola asuh orangtua dan pengaruhnya terhadap perkembangan konsep diri anak saat beranjak dewasa. Dan bagaimana itu gangguan harga diri rendah yang maladaptive. Buku ini dapat dijadikan sebagai bahan bacaan bagi para orang tua dan para calon orangtua. Stringently reviewed papers presented at the October 1992 meeting held in Cambridge, Mass., address such topics as nonmonotonic logic; taxonomic logic; specialized algorithms for temporal, spatial, and numerical reasoning; and knowledge representation issues in planning, diagnosis, and natural langu Explains how to install, configure & maintain NT on individual workstations and also how to connect computers using NT's built-in, peer-to-peer networking. Discusses remote access services, TCP/IP connections, optimization, troubleshooting, cross-platform integration, Web site design & maintenance and HTML tools. This introduction to IBM's AIX Version 3 operating system bridges the gap between IBM's voluminous documentation and specialized books on the subject. It provides the necessary background to effectively utilize the IBM documentation on AIX--enabling experienced DOS-based PC users new to UNIX to become competent, confident, and efficient managers of their own AIX systems. This pocket-sized guide provides a convenient listing of all Mathematica commands. It is

updated for Mathematica 2.0 and meets the needs of all Mathematica users. Brief descriptions of each command are followed by simple examples of how to use the command in question. The commands are organized by function. A variety of programming models relevant to scientists explained, with an emphasis on how programming constructs map to parts of the computer. What makes computer programs fast or slow? To answer this question, we have to get behind the abstractions of programming languages and look at how a computer really works. This book examines and explains a variety of scientific programming models (programming models relevant to scientists) with an emphasis on how programming constructs map to different parts of the computer's architecture. Two themes emerge: program speed and program modularity. Throughout this book, the premise is to "get under the hood," and the discussion is tied to specific programs. The book digs into linkers, compilers, operating systems, and computer architecture to understand how the different parts of the computer interact with programs. It begins with a review of C/C++ and explanations of how libraries, linkers, and Makefiles work. Programming models covered include Pthreads, OpenMP, MPI, TCP/IP, and CUDA. The emphasis on how computers work leads the reader into computer architecture and occasionally into the operating system kernel. The operating system studied is Linux, the preferred platform for scientific computing. Linux is also open source, which allows users to peer into its inner workings. A brief appendix provides a useful table of machines used to time programs. The book's website (<https://github.com/divakarvi/bk-spca>) has all the programs described in the book as well as a link to the html text. You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell. Along the way you'll learn the timeless skills handed down by generations of gray-bearded, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to:

- * Create and delete files, directories, and symlinks
- * Administer your system, including networking, package installation, and process management
- * Use standard input and output, redirection, and pipelines
- * Edit files with Vi, the world's most popular text editor
- * Write shell scripts to automate common or boring tasks
- * Slice and dice text files with cut, paste, grep, patch, and sed

Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust. A featured resource in the Linux Foundation's "Evolution of a SysAdmin" My first encoWlter with acronyms took place when I was ten years old and growing up in an occupied COWltry during the Second World War. My father proudly annoWlced one day that, despite the ban imposed by the occupying administration, he had managed to get a radio installed and could receive the BBC. (All acronyms used in this introduction are listed in this dictionary.) To me the meaning of "BBC" was that we would receive different information about the war than we got from the usual censored broadcasts. There was, of course, the well-known acronym associated with the nT, but at that time I did not realize that it meant more than the postal service, in those years a deteriorated service. Gradually the daily use of acronyms grew. Most of the newly acquired three-and four-letter abbreviations referred to organiza tions, such as the broadcasting corporations in The Netherlands and Belgium, and references to coWltries such as the USA, USSR, and UK. When attending high school (the HBS) after the war, my knowledge of acronyms grew slowly. Even during the ten years I spent in the Dutch Merchant Marine (the GHV), the number of acronyms was limited to ad vanced equipment that eventually became known as RADAR, LORAN, and DECCA. Buku ini diperuntukkan sebagai bekal belajar dalam mata kuliah PTIK (Pengenalan Teknologi Informasi Komputer). Secara global buku ini mengenalkan kepada pembaca tentang teknologi informasi meliputi teknologi : Hardware, Software, Jaringan, Laptop, Multimedia, HKI, Antivirus, VirtualReality, AR, Animasi dan penjelasan berbagai istilah umum dalam industri komputer. Buku ini juga dilengkapi juga dengan soal-soal untuk mengukur kefahamandan juga kompetensi pada masing-masing bab pada setiap pembahasan didalam buku ini. Penulis sangat bersyukur kepada Allah Swt karena telah menyelesaikan buku ini. Semoga buku ini nantinya bisa dijadikan referensi Buku Ajar dalam mata kuliah Pengenalan Teknologi Informasi/ Informatika. Kami mengucapkan banyak terima kasih kepada semua pihak yang telah membantu kami selama pembuatan buku ini sampai dengan terealisasinya buku ini. This book expands on the techniques provided in "Oracle PL/SQL Programming", taking readers deep into the world of PL/SQL packages. The book provides much more than advice and examples. It comes with a disk containing a full-use shareware version of PL/Vision, a library of dozens of packages written by the author. These packages greatly accelerate the development of PL/SQL-based applications. Moves beyond the basics and shows how to use tools to recover and analyse forensic evidence. This is the only book to look at common UNIX system administator problems from the user perspective. It provides troubleshooting tips, a questionnaire on which users can record the spec-specific information they need, and explains the diagnostic process. A quick reference card summarizes what to try first, second, and third for commonly-

encountered problems. The complete programmer's reference--every Visual Basic command, function, statement, object, method, event, and property has been fully updated to cover versions 2.0 and 3.0. The enclosed disk contains all sample programs, code resources, bitmaps, and complete applications from the book. Buku ini disusun sebagai diktat kuliah "Pengantar Open Source dan Aplikasi" dan dapat pula digunakan sebagai panduan belajar mandiri atau buku penunjang kuliah lain yang membutuhkan pemahaman tentang Open Source di dunia digital, misal untuk kuliah Pengantar Teknologi Informasi dan kuliah Sistem Operasi. Buku ini juga diharapkan dapat menjadi bahan bacaan dan panduan bagi pemula untuk menjadi administrator sistem dan administrator jaringan berbasis sistem operasi Linux. Bab satu buku ini mengupas konsep Open Source dan Free Software, contoh sistem operasi dan aplikasi Open Source untuk server, office, desain grafis, multimedia, dan lain-lain. Bab dua mengupas pengertian Open untuk produk yang bukan perangkat lunak seperti Open Standard, Open Content, dan Open Hardware, aspek keamanan produk Open Source, dan perbandingan sistem operasi Open Source dengan sistem operasi bukan Open Source. Bab tiga mengupas beberapa jenis lisensi dan copyright yang Free/Open Source untuk produk perangkat lunak dan lisensi Free/Open untuk produk selain perangkat lunak. Bab ketiga juga membahas model pengembangan produk, komunitas, dan model bisnis Open Source. Bab empat hingga sebelas menjelaskan teknik penggunaan sistem operasi Linux dan beberapa aplikasi Open Source untuk belajar dan bekerja sehari-hari, mulai dari cara instalasi Linux, cara bekerja di desktop Linux, cara menggunakan shell dan commands, cara menggunakan editor teks vi dan nano, cara mengelola file dan direktori, cara mengubah atribut dan hak akses, cara membuat arsip dan mengekstrak file terkompres, cara membuat program script sederhana, cara menemukan bantuan di Linux, cara menginstall dan uninstall aplikasi, serta cara mengatur repository atau gudang aplikasi. Bab dua belas membahas cara bekerja secara remote dengan SSH, SCP, SFTP, dan mengakses desktop Linux di komputer lain. Bab tiga belas mengenalkan pembaca untuk bekerja sebagai administrator sistem dan cara mengelola user dan group di Linux. Bab terakhir, empat belas, membahas teknik pengaturan jaringan komputer di Linux Ubuntu. Covers the basic concepts of the Perl computer language, including such topics as data types, control flow constructs, writing custom functions, and object-oriented programming. "Duhh...Antivirus yang paling bagus, apa ya? Kok nggak ada yang mempan?" "Jangan pake fashdisk dong,...nantu jadi virusan (kena virus) laptopku..." "Puyeng neeh,...ngerjain tugas kuliah bedanya virus Trojan, spam,...sama-sama merugikan..." "Ihh protektif banget sehh..bilang saja nggak boleh pinjam..wekk" "He3..kayaknya kalo berhasil buat virus bakal seru deh.." "ya Allah..data skripsiku hilang gara-gara virus pintar tidak bermoral hik3.." Ungkapan-ungkapan tersebut menunjukkan bahwa saat ini para pengguna komputer, laptop, dan handphone sangat peduli dengan virus atau makhluk semacamnya. Kuncinya hanya satu, yakni mengerti. Ketakutan yang terlalu sehingga menyulitkan produktivitas dalam berinteraksi dengan komputer adalah hal yang tidak tepat, dan sebenarnya tidak perlu. Buku ini mengajak kepada semua pembaca untuk mengetahui apa dan bagaimana virus itu bekerja, apa yang dimaksud varian-varian sejenis virus yang ternyata bisa lebih hebat gangguannya, dan yang paling penting adalah cara menggunakan antivirus dengan jitu. Yang tidak kalah penting lagi adalah tips agar komputer tidak tertular virus dan Trojan, baik dengan atau tanpa antivirus. Terakhir adalah penghargaan yang tinggi kepada teman-teman yang telah membuat dan memproduksi Antivirus lokal sehingga akan lebih aman dari gangguan-gangguan buatan lokal yang kadang lebih hebat dan menyakitkan jika menjadi korbannya. Tulisan-tulisan dalam buku ini masih jauh dari sempurna (baca: mencukupi keingintahuan pembaca). Jika ada saran, kritik, dan perbaikan yang memban- gun, silakan kirim ke mail yyudhanto@percikaniman.org. Trimakasih yang sangat banyak kepada teman-teman atas terbitnya buku ini. Semoga bermanfaat Perkembangan Teknologi Informasi yang begitu pesat merupakan dorongan sekaligus tantangan bagi masyarakat pembelajar IT, mahasiswa, programer serta peneliti di bidang IT, khususnya pemrograman C++. Belajar pemrograman bukan berarti menghafal sintaks. Buku ini menyajikan pendekatan kasuistik dan progresif sehingga pembelajar C++ tidak hanya dijejali dengan "aturan dan larangan" tetapi juga ditantang untuk menelusuri pemikiran berorientasi objek di balik setiap kode sumber secara gradual dan integratif. Buku ini mengungkap secara komprehensif: komponen-komponen utama kelas yang meliputi konsep konstruktor dan destruktur; fungsi akses dan utilitas; fungsi const; fungsi dan kelas friend; pointer this; anggota kelas static; overloading operator biner dan unary; pewarisan dan polimorfisme; fungsi virtual murni; relasi antar objek; template fungsi dan kelas; manipulator dan format aliran; penanganan eksepsi; kelas unique_ptr; kegagalan new; file sekuensial dan file akses acak; pemrosesan string; pustaka karakter, STL, operator bitwise; iterator; kontainer (runtun, asosiatif dan adapter); kelas mutable; operator const_cast; pointer ke anggota kelas; pewarisan jamak dan kelas basis virtual. Buku ini menyajikan secara konseptual dan implementatif yang mendorong kemampuan pembelajar menjadi programer C++. Buku ini menjadi sangat bermanfaat bagi mereka yang ingin memahami pemrograman C++ secara keseluruhan dan mendalam. menuntut orang untuk memiliki pengendalian diri. Akhir-akhir ini, permasalahan karakter kontrol diri seperti maraknya kasus bullying, kenakalan anak, dan remaja serta kekerasan di sekolah semakin menyita perhatian dan semakin mengkhawatirkan. Hasil survei yang dilakukan oleh UNESCO (2019: 17) menyampaikan sebanyak 32% siswa pernah mengalami kasus bullying oleh teman sekolah paling tidak satu kali. Masalah-masalah karakter di atas dikarenakan kurang dipupuknya karakter kontrol diri pada anak. Banyak cara yang dapat digunakan untuk menumbuhkan karakter kontrol diri dengan tetap memperhatikan budaya yang dimiliki oleh Indonesia, salah satunya dengan permainan tradisional yang berasal dari berbagai daerah di Indonesia dan mengandung nilai-nilai luhur. Permainan tradisional tersebut seperti permainan Jethungan, Merkerang, Matembing Gandongan, Bagimpar, dan Gunung. Selain mengandung nilai-nilai luhur, permainan tradisional selaras dengan karakteristik pembelajaran yang efektif, yaitu kaya variasi, kaya stimulasi, menyenangkan, operasional konkret, berpikir kritis, kreativitas, komunikasi, kolaborasi, dan memuat nilai-nilai karakter terutama karakter kontrol diri. Permainan tradisional tersebut dikemas dalam sebuah modul sebagai upaya untuk menumbuhkan karakter kontrol diri dengan permainan-permainan tradisional. Modul ini tepat bagi Anda sebagai pendidik atau fasilitator yang ingin merancang sendiri model pembelajaran tersebut.
