**React Quickly** Oct 19 2019 Summary React Quickly is for anyone who wants to learn React.js fast. This hands-on book teaches you the

concepts you need with lots of examples, tutorials, and a large main project that gets built throughout the book. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Successful user interfaces need to be visually interesting, fast, and flowing. The React.js JavaScript library supercharges view-heavy web applications by improving data flow between UI components. React sites update visual elements efficiently and smoothly, minimizing page reloads. React is developer friendly, with a strong ecosystem to support the dev process along the full application stack. And because it's all JavaScript, React is instantly familiar. About the Book React Quickly is the tutorial for web developers who want to get started fast with React.js. Following carefully chosen and clearly explained examples, you'll learn React development using your existing JavaScript and web dev skills. You'll explore a host of different projects as you learn about web

components, forms, and data. What's Inside Master React fundamentals Build full web apps with data and routing Test components Optimize React apps About the Reader This book is for developers comfortable building web applications with JavaScript. About the Author Azat Mardan is a Tech Fellow at Capital One with extensive experience using and teaching JavaScript and Node, and author of several books on JavaScript, Node, React, and Express. Table of Contents PART 1 - REACT FOUNDATION Meeting React Baby steps with React Introduction to JSX Making React interactive with states React component lifecycle events Handling events in React Working with forms in React Scaling React components Project: Menu component Project: Tooltip component Project: Timer component PART 2 - REACT ARCHITECTURE The Webpack build tool React routing Working with data using Redux Working with data using GraphQL Unit testing React with Jest React on Node and Universal

Steenrod Squares in Spectral Sequences Feb 03

2021 This book develops a general theory of  
Steenrod operations in spectral sequences. It  
gives special attention to the change-of-rings  
spectral sequence for the cohomology of an  
extension of Hopf algebras and to the Eilenberg-  
Moore spectral sequence for the cohomology of  
classifying spaces and homotopy orbit spaces. In  
treating the change-of-rings spectral sequence,  
the book develops from scratch the necessary

properties of extensions of Hopf algebras and  
constructs the spectral sequence in a form  
particularly suited to the introduction of  
Steenrod squares. The resulting theory can be  
used effectively for the computation of the  
cohomology rings of groups and Hopf algebras,  
and of the Steenrod algebra in particular, and so  
should play a useful role in stable homotopy  
theory. Similarly the book offers a self-contained  
construction of the Eilenberg-Moore spectral  
sequence, in a form suitable for the introduction  
of Steenrod operations. The corresponding  
theory is an effective tool for the computation of  
t

**English Language Arts, Grade 12 Module 2**

Nov 24 2022 Paths to College and Career Jossey-

Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6-12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional

resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6-12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and

provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation. ABOUT PCG EDUCATION PCG Education, a division of Public Consulting Group, works with schools, districts, and state education agencies to build their capacity for instructional and programmatic improvements. We provide curriculum development, coaching, professional development, and technical assistance services. Our work alongside educators and policy makers ensures effective implementation of both the Common Core State Standards and state-specific standards for college and career readiness. [Computer Networks](#) Mar 24 2020 This book constitutes the refereed proceedings of the 18th Conference on Computer Networks, CN 2011, held in Ustron, Poland, in June 2011. The 50 revised full papers presented were carefully reviewed and selected for inclusion in the book. The papers can be divided into the following subject groups: molecular networks; network issues related to nano and quantum technology; new technologies related to the Computer Networks; fundamentals of computer networks architecture and programming; internet networks; data security in distributed systems; industrial computer networks; applications of computer networks.

## **Business Rule-Oriented Conceptual**

**Modeling** Apr 05 2021 This book is based on a PhD dissertation which was accepted by the faculty of Law and Economics at the University of Bern, Switzerland. The ideas presented were partially developed in a research project founded by the Swiss National Science Foundation in 1993 and 1994. This research project was concerned with evaluating the application of database triggers and active databases for the implementation of business rules. We recognized among other things the lack of a methodology for modeling such business rules on the conceptual level. Therefore, this became the focus of the follow-up research which resulted in this book. All this work would not have been possible without the help of several people. First of all, I would like to give special thanks to my thesis supervisor Prof. Dr. Gerhard Knolmayer. He not only initiated the research project and found an industry partner, but also provided very valuable ideas, and critically

reviewed and discussed the resulting publications. Furthermore, I would like to express my thanks to the second thesis supervisor Prof. Dr. Sham Navathe from Georgia Institute of Technology who influenced my work with results from a former research project and who agreed to evaluate the resulting PhD Dissertation.

*The Teacher Clarity Playbook* Oct 11 2021 When learning progressions and success criteria are clear, students achieve. It's that simple—because it indicates that teachers are intentional and learners know both the why and the how behind every endeavor. With *The Teacher Clarity Playbook*, you now have the tools and templates to make it happen. Designed for PLCs or independent teacher use, it guides practitioners to align lessons, objectives, and outcomes of learning seamlessly, so that the classroom hours flow productively for everyone. Written by Douglas Fisher, Nancy Frey, Olivia Amador, and Joseph Assof, educators dedicated

to making high-impact, research-based practices a part of every teacher's repertoire.

[Parent-Teen Therapy for Executive Function](#)

[Deficits and ADHD](#) Jan 02 2021 This user-friendly manual presents an innovative, tested approach to helping teens overcome the frustrating organizational and motivation problems associated with executive function deficits and attention-deficit/hyperactivity disorder (ADHD). The Supporting Teens' Autonomy Daily (STAND) approach uses motivational interviewing (MI) to engage teens and their parents in building key compensatory skills in organization, time management, and planning. Parent training components ease

family conflict and equip parents to support kids' independence. Ready-to-use worksheets and rating scales are provided; the book has a large-size format for easy photocopying. Purchasers get access to a Web page where they can download and print all 45 reproducible tools.

*Redux in Action* Oct 31 2020 Summary With Redux in Action, you'll discover how to integrate Redux into your React application and development environment. With the insights you glean from the experience of authors Marc Garreau and Will Faurot, you'll be more than confident in your ability to solve your state management woes with Redux and focus on developing the apps you need! Foreword by Mark Erikson, Redux co-maintainer. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology With Redux, you manage the state of a web application in a

single, simple object, practically eliminating most state-related bugs. Centralizing state with Redux makes it possible to quickly start saved user sessions, maintain a reliable state history, and smoothly transfer state between UIs. Plus, the Redux state container is fully programmable and integrates cleanly with React and other popular frameworks. About the Book Redux in Action is an accessible guide to effectively managing state in web applications. Built around common use cases, this practical book starts with a simple task-management application built in React. You'll use the app to learn the Redux workflow, handle asynchronous actions, and get your hands on the Redux developer tools. With each step, you'll discover more about Redux and the benefits of centralized state management. The book progresses to more-complex examples, including writing middleware for analytics, time travel debugging, and an overview of how Redux works with other frameworks such as Angular and Electron. What's Inside Using Redux in an

existing React application Handling side effects with the redux-saga library Consuming APIs with asynchronous actions Unit testing a React and Redux application About the Reader For web developers comfortable with JavaScript and React. About the Author Marc Garreau has architected and executed half a dozen unique client-side applications using Redux. Will Faurot is a mentor for Redux developers of all skill levels. *The Taking Action Guide for the Governance Core* May 26 2020 Practical resources for building cohesive governance teams As a supplement to the best-selling *The Governance Core*, this practical guide will help trustees and superintendents adopt a governance mindset and partnership that creates coherence throughout the district. With a systems thinking approach, the authors provide readers with the strategies and tools needed to build cohesive teams and engage in deeper learning and decision making. *The Taking Action Guide for the Governance Core* offers readers: • a deeper

understanding of core governance and how to build it • a planning guide to help new trustees get started • protocols and sample agendas for focusing on strategy and systems during open board meetings Educational leaders will find this guide offers them a foundation for building strong, flourishing school districts that are equipped to adapt to and meet the daunting challenges of our time.

**Oxford Handbook of Human Action** Sep 10 2021 Thinking and reasoning, long the academic province of philosophy, have over the past century emerged as core topics of empirical investigation and theoretical analysis in the modern fields of cognitive psychology, cognitive science, and cognitive neuroscience. Formerly seen as too complicated and amorphous to be included in early textbooks on the science of cognition, the study of thinking and reasoning has since taken off, branching off in a distinct direction from the field from which it originated. *The Oxford Handbook of Thinking and*

Reasoning is a comprehensive and authoritative handbook covering all the core topics of the field of thinking and reasoning. Written by the foremost experts from cognitive psychology, cognitive science, and cognitive neuroscience, individual chapters summarize basic concepts and findings for a major topic, sketch its history, and give a sense of the directions in which research is currently heading. Chapters include introductions to foundational issues and methods of study in the field, as well as treatment of specific types of thinking and reasoning and their application in a broad range of fields including business, education, law, medicine, music, and science. The volume will be of interest to scholars and students working in developmental, social and clinical psychology, philosophy, economics, artificial intelligence, education, and linguistics.

Troubleshooting Oracle Performance Oct 23 2022 Troubleshooting Oracle Performance, 2nd Edition is your systematic guide to diagnosing and resolving performance problems in database-backed applications involving Oracle's database engine. Christian Antognini brings a decade and a half experience to his topic. His first edition is one of the most well-respected books in its field. This second edition has been rigorously updated to cover the latest developments in Oracle Database 11g Release 2 through Oracle Database 12c. What do you do when your database application isn't running fast enough? You troubleshoot, of course.

Finding the slow part of an application is often the easy part of the battle. It's finding a solution that's difficult. *Troubleshooting Oracle Performance, 2nd Edition* helps by providing a systematic approach to addressing the underlying causes of poor database application performance. The author freely shares his experience while explaining the underlying foundations of how SQL statements are executed by the Oracle database engine. You'll be able to draw a solid foundation of theory and shared experience as you face head-on the performance challenges in your daily work. Written for developers by an application developer who has learned by doing *Gives a systematic approach to solving database application performance problems Helps you plan for performance as you would for any other application requirement*  
*Hopf Algebras and Their Actions on Rings* Dec 21 2019 The last ten years have seen a number of significant advances in Hopf algebras. The best known is the introduction of quantum

groups, which are Hopf algebras that arose in mathematical physics and now have connections to many areas of mathematics. In addition, several conjectures of Kaplansky have been solved, the most striking of which is a kind of Lagrange's theorem for Hopf algebras. Work on actions of Hopf algebras has unified earlier results on group actions, actions of Lie algebras, and graded algebras. This book brings together many of these recent developments from the viewpoint of the algebraic structure of Hopf algebras and their actions and coactions. Quantum groups are treated as an important example, rather than as an end in themselves. The two introductory chapters review definitions and basic facts; otherwise, most of the material has not previously appeared in book form. Providing an accessible introduction to Hopf algebras, this book would make an excellent graduate textbook for a course in Hopf algebras or an introduction to quantum groups.  
**Global Perspectives for Local Action** Nov 12

2021 The Third International Mathematics and Science Study (TIMSS) is a rich source of information that can be used by a broad range of stakeholders to promote discussions and actions to improve K-12 mathematics and science teaching and learning. To support educators, administrators, parents, and others interested in education in using TIMSS materials, the National Research Council (NRC) has prepared a report, *Global Perspectives for Local Action: Using TIMSS to Improve U.S. Mathematics and Science Education* (see "Resources"). This report will help educators, administrators, parents and others interested in education to understand what can be learned from TIMSS findings, and it will encourage them to use the information to make improvements in mathematics and science education. Provided in the report are insights into mathematics and science achievement, curriculum, instruction, and school support systems, such as professional development, in the United States and around the world. To

make TIMSS information more accessible and useful to educators and the public, the NRC prepared this professional development guide to accompany its report. This guide provides directions and support materials for leading workshops and planning sessions for teachers, educational administrators, higher education faculty, and the interested public.

**Why the Bottom Line Isn't!** Jan 22 2020  
Offers a broad view of leadership and shareholder value based on multiple business disciplines In *Why the Bottom Line Isn't!* authors Dave Ulrich and Norm Smallwood argue that sustainable shareholder value comes increasingly from assets not accounted for on an organization's balance sheet. These assets include a company's reputation, its ability to attract talent, and its ability to react quickly to new opportunities in the marketplace. *Why the Bottom Line Isn't!* harnesses research from a number of disciplines including human resources, finance, and leadership to establish

a hierarchy of such intangibles. The authors extrapolate from these intangibles to establish leadership tools that will help create sustainable shareholder value. The book offers a broad, expansive perspective on leadership while eschewing convoluted theory for concrete practice. Dave Ulrich, Ph.D., (DOU@UMICH.EDU) has been listed by BusinessWeek as the top "guru" in management education. He has co-authored 10 books and over 100 articles, serves on the Board of Directors of Herman Miller, and has consulted with over half of the Fortune 200 companies. He is currently on professional leave as Professor at the University of Michigan to serve as Mission President for the Church of Jesus Christ of Latter-day Saints in Montreal. Norm Smallwood (nsmallwood@rbl.net) is co-founder of Results-Based Leadership (www.rbl.net), which provides education and consulting services based on this book as well as the ideas in Results-Based Leadership: How Leaders Build the

Business and Improve the Bottom Line, which he co-authored with Ulrich. He has led leadership development, business strategy, organization capability, change management, and HR projects for a wide variety of clients spanning multiple industries.

*Safe Blood and Blood Products: Trainer's guide*  
Jun 26 2020 Ensuring the safety of blood for transfusion is a key prevention strategy in the fight against HIV/AIDS. These learning materials have been designed specifically for use in distance learning programmes in blood safety. The modules have been designed for staff responsible for donor recruitment, blood collection and the processing and issue of blood for transfusion. They are written in an interactive, practical style, with learning objectives, activities, self-assessment questions, progress checks and action plans. Most of the training is designed to take place at the workplace in the context of the performance of daily work. This pack consists of a set of four

spiral-bound modules and a Trainer's Guide, all supplied in a plastic wallet.

*Discovering Mathematics with Magma* Dec 01 2020 Based on the ontology and semantics of

algebra, the computer algebra system Magma enables users to rapidly formulate and perform calculations in abstract parts of mathematics. Edited by the principal designers of the program, this book explores Magma. Coverage ranges from number theory and algebraic geometry, through representation theory and group theory to discrete mathematics and graph theory. Includes case studies describing computations underpinning new theoretical results.

*Final Environmental Impact Statement for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-level Radioactive Waste at Yucca Mountain, Nye County, Nevada* Jan 14 2022 The purpose of this environmental impact statement (EIS) is to provide information on potential environmental impacts that could result from a Proposed Action to construct, operate and monitor, and eventually close a geologic repository for the disposal of spent nuclear fuel and high-level radioactive waste at

the Yucca Mountain site in Nye County, Nevada. The EIS also provides information on potential environmental impacts from an alternative referred to as the No-Action Alternative, under which there would be no development of a geologic repository at Yucca Mountain.

Artificial Cognitive Architecture with Self-Learning and Self-Optimization Capabilities Sep 29 2020 This book introduces three key issues: (i) development of a gradient-free method to enable multi-objective self-optimization; (ii) development of a reinforcement learning strategy to carry out self-learning and finally, (iii) experimental evaluation and validation in two micromachining processes (i.e., micro-milling and micro-drilling). The computational architecture (modular, network and reconfigurable for real-time monitoring and control) takes into account the analysis of different types of sensors, processing strategies and methodologies for extracting behavior patterns from representative process' signals.

The reconfiguration capability and portability of this architecture are supported by two major levels: the cognitive level (core) and the executive level (direct data exchange with the process). At the same time, the architecture includes different operating modes that interact with the process to be monitored and/or controlled. The cognitive level includes three fundamental modes such as modeling, optimization and learning, which are necessary for decision-making (in the form of control signals) and for the real-time experimental characterization of complex processes. In the specific case of the micromachining processes, a series of models based on linear regression, nonlinear regression and artificial intelligence techniques were obtained. On the other hand, the executive level has a constant interaction with the process to be monitored and/or controlled. This level receives the configuration and parameterization from the cognitive level to perform the desired monitoring and control

tasks.

**The Incident Command System and Structural Firefighting** Jun 07 2021

Immunization in Practice May 06 2021 This practical guide contains seven modules targeted at district and health facility staff. It intends to meet the demands to improve immunization services so as to reach more infants in a sustainable way, building upon the experiences of polio eradication. It includes materials adapted from polio on planning, monitoring and use of data to improve the service, that can be used at any level. Revising the manual has been a team exercise. There are contributions from a large number of experts, organizations and institutions. This new edition has seven modules. Several new vaccines that have become more readily available and used in recent years have

been added. Also the section on integration with other health interventions has been expanded as exciting opportunities and experiences have become evident in the years following the previous edition. Module 1: Target diseases and vaccines Module 2: The vaccine cold chain Module 3: Ensuring safe injections Module 4: Microplanning for reaching every community Module 5: Managing an immunization session Module 6: Monitoring and surveillance Module 7: Partnering with communities.

Promoting Children's Rights in European Schools Feb 21 2020 Promoting Children's Rights in European Schools explores how facilitators, teachers and educators can adopt and use a dialogic methodology to solicit children's active participation in classroom communication. The book draws on a research project, funded by the European Commission (Erasmus +, Key-action 3, innovative education), coordinated by the University of Modena and Reggio Emilia, Italy, with the partnership of the

University of Suffolk, UK, and the University of Jena, Germany. The author team bring together the analysis of activities in 48 classes involving at least 1000 children across England, Germany and Italy. These activities have been analysed in relation to the sociocultural context of the involved schools and children, a facilitative methodology and the use of visual materials in the classroom, and engaging children in active participation and the production of their own narratives. Each chapter looks at reflection on practice, outcomes, and reaction to facilitation of both teachers and children, drawing out the complex comparative lessons within and between classrooms across the three countries.
