Standard Catalog of Pontiac, 1926-2002 Dec 27 2020 In Standard Catalog of Pontiac 1926-2002, collectors can speed through thousands of listings to obtain specifications, production data, and serial number information for their favorite Pontiacs. Every Pontiac model ever made from 1926 to 2002 is listed, along with the predecessors to Pontiac, the Oakland cars produced from 1908-1931. • Over 500 photographs help collectors clearly identify the Pontiacs through the years. Current collector values are provided in six grades of condition. • Thousands of listings of Pontiacs made from 1926-2002; includes new listings for models made from 1996 to 2002 including Bonneville SSEi, Grand Prix GTP, Ram Air Firebirds, Aztec and Vibe • Specifications, production data, serial number information, and much more; and, features coverage of Oakland cars produced from 1908-1931

Developing Reference Collections and Services in an Electronic Age Sep 23 2020

The massive shift in how information is now published and collected has space, cost, and service policy implications for every library's reference collection. This detailed how-to has two purposes: first, to help reference librarians plan, select, and develop these new collections; second, to help them rework their services in light of changing collections. Cassell discusses selection criteria (with

examples), examines the future of the format in the reference collection, and the types of material (e.g.: full text encyclopedia or index). Readers are guided through the necessary collection development decisions, including the advantages and disadvantages of print vs. electronic media for content, content appropriateness for the format, demand, cost (required software and hardware), space (required equipment), time (installation), and the learning curve needed to use -- and teach -- new electronic reference tools. Details on reference book publishers and trends, recommended print and electronic evaluation tools, user and staff education, suggestions, model policies, checklists, forms, and planning tools for the new reference department complete this practical and essential manual.

Poor's Manual of Public Utilities Mar 10 2022

Chromosome Techniques May 12 2022 This laboratory manual covers the study of chromosomes in plants, animal and human systems, dealing with the protocols and principles involved. It caters to the requirements of scientists working laboratories, presenting details of the operational mechanism for use at the chromosome level.

Map Projections Jun 13 2022 Map projection concerns the science of mathematical cartography, the techniques by which the Earth's dimensions, shape and features are translated in map form, be that two-dimensional paper or two- or three- dimensional electronic representations. The central focus of this book is on the theory of map projections. Mathematical cartography also takes in map scales and their variation, the division of maps into sets of sheets and nomenclature, and addresses the problems of making measurements and conducting investigations which make use of geodetic measurements and the development of graphical methods for solving problems of spherical trigonometry, marine- and aeronavigation, astronomy and even crystallography.
