**The Formation and Evolution of Massive Young Star Clusters** Jan 18 2020

**Star Formation Through Time** Feb 17 2020

*The Organic Artist* Aug 17 2022 This is an art book which highlights the possibility of using natural, organic materials as art supplies and inspiration.

[Eta Carinae and Other Mysterious Stars](#) May 22 2020 Annotation Observational data, laboratory measurements, and modeling efforts are reported in these papers from a conference on the massive star Eta Carinae and other stars with peculiar spectroscopic signatures. Organized in sections on the spectroscopy of Eta Carinae from X-rays to radio, questions from spectroscopy of other peculiar emission line stars, fluorescence and radiative processes, and spectra of Eta Carinae and Weigelt blobs BD, the papers deal with aspects of the field such as Raman scattering and symbiotic stars, the origin of strings in the outer regions in Eta Carinae, selective emission lines in O-type spectra, and cool star chromospheres and the sun. Annotation c. Book News, Inc., Portland, OR (booknews.com)

**Young Neutron Stars and Their Environments** Oct 15 2019

**Cool Battery & Electricity Projects: Fun & Creative Workshop Activities** Dec 09 2021 Wire, power, connect, and create with Cool Battery & Electricity Projects! Kids can learn how to wire a working lamp, build a buzzing electric game, and more! Each workshop project includes easy-to-read, step-by-step instructions paired with photographs. Budding craftspeople and engineers will love learning how to use the tools of the trade to make one-of-a-kind creations. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.

**Wild Stars in the Old West** Feb 23 2023

*Does the Sun Sleep?* Dec 29 2020 Audisee® eBooks with Audio combine professional narration and text highlighting for an

engaging read aloud experience! Have you ever watched the sun rise or set? Do you know why the moon changes shape every night? Join Mr. Cruz's class as they observe patterns in the nighttime sky. They'll learn why the moon glows, what groups of stars are called when they make shapes, and if the sun actually does sleep at night!

**Variable Stars in the Local Group** Jul 04 2021

**Wild Fermentation** Sep 06 2021 Titled Fermentation workshop with Sandor Ellix Katz, the accompanying DVD includes a hands-on demonstration and instruction, the history of fermentation and culturing, an interview, and other features.

*Rosa's Big Boat Experiment* Jun 15 2022 Rosa and her friends return and conduct fun, basic experiments involving science, technology, engineering and maths

*Wild Stars in the Old West* Dec 21 2022

**Wild Fermentation** Jan 10 2022 Fermentation is an ancient way of preserving food as an aid to digestion, but the centralization of modern foods has made it less popular. Katz introduces a new generation to the flavors and health benefits of fermented foods. Since the first publication of the title in 2003 he has offered a fresh perspective through a continued exploration of world food traditions, and this revised edition benefits from his enthusiasm and travels.

**International Conference on Magnetic Fields in O, B and A Stars** Mar 20 2020

Wild Women, Wild Voices Feb 28 2021 Write to Celebrate, Heal, and Free the Wild Woman Within In her years as a writing coach, Judy Reeves has found twin urges in women: they yearn to reclaim a true nature that resides below the surface of daily life and to give it voice. The longing to express this wild, authentic nature is what informs Reeves's most popular workshop and now this workshop in a book. Here, you will explore the stages that make up your life, from wild child, daughter/sister/mother, and loves and lovers, to creative work, friendships, and how the wise woman encounters death. Both intuitive and practical, *Wild Women, Wild Voices* responds to women's deep need for expression with specific and inspiring activities, exercises, and writing prompts. With true empathy, Reeves invites, instructs, and celebrates the authentic expression — even the howl — of the wild in every woman.

**12th European Conference on White Dwarf Stars** Oct 27 2020 Annotation Seventy-four papers from the June 2000 conference (held in Newark, Delaware) address topics like white dwarf evolution, atmospheres and chemical composition, sdB stars, white dwarfs in binaries, magnetic white dwarfs, variable white dwarfs, white dwarf data bases, and astronomy and surveys. The future of white dwarf observing, astronomical education, and public outreach are also discussed.

Annotation c. Book News, Inc., Portland, OR (booknews.com)

**Index of Conference Proceedings** Oct 07 2021

*Symbiotic Stars Probing Stellar Evolution* Jul 24 2020

**Wild Cats of the World** Sep 25 2020 Ranging from the largest - the Tiger to the smallest species - the Rusty-spotted Cat and Black-footed Cat, the world's wild cats are some of the most beautiful, ferocious and feared carnivores in the world. Wild Cats of the World provides a detailed account of each species of wild cat, examining their importance throughout history and the future of some of the most endangered breeds. Using stunning photography and magnificent colour plates by top wildlife artist Priscilla Barrett to depict each cat in detail, Wild Cats of the World examines the characteristics of all 38 species, as well as their history, distribution and current IUCN status.

**An Introduction to Close Binary Stars** Sep 18 2022 Binary systems of stars are as common as single stars. They are of fundamental importance because they allow stellar masses, radii and luminosities to be measured directly, and explain a host of diverse and energetic phenomena including X-ray binaries, cataclysmic variables, novae, symbiotic stars, and some types of supernovae. This 2001 book was the first to provide a pedagogical and comprehensive introduction to binary stars. It combines theory and observations at all wavelengths to develop a unified understanding of binaries of all categories. It comprehensively reviews methods for calculating orbits, the Roche model, ideas about mass exchange and loss, methods for analysing light curves, the masses and dimensions of different binary systems, and imaging the surfaces of stars and accretion structures. This book provides a thorough introduction to the subject for advanced undergraduate and graduate students. Researchers will also find this to be an authoritative reference.

*Binary Stars: Selected Topics on Observations and Physical Processes* Jul 16 2022 More than half of all stars in the universe formed and evolved as binary systems and their study is essential for understanding stellar and galactic evolution. The six lectures in this book give both a readable introduction and an up-to-date review of nearly all aspects of research into binary stars, including the range from common binaries to more exotic systems composed of white dwarfs, neutron stars and black holes.

**Star Formation in the Interstellar Medium** Nov 27 2020

*Star Formation in Early-type Galaxies* May 02 2021

STAR May 14 2022

Cool Engine & Motor Projects: Fun & Creative Workshop Activities Oct 19 2022 Assemble, build, and put power in motion with Cool Engine & Motor Projects! Kids can learn how to create a buzzing robot, move a ship with steam, and more! Each

workshop project includes easy-to-read, step-by-step instructions paired with photographs. Budding craftspeople and engineers will love learning how to use the tools of the trade to make one-of-a-kind creations. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.

*The Century of Space Science* Nov 08 2021 One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field. Hence, at this point in history we are in a unique position to gain first-hand insight into the field and its development. To this end, *The Century of Space Science*, a scholarly, authoritative, reference book presents a chapter-by-chapter retrospective of space science as studied in the 20th century. The level is academic and focuses on key discoveries, how these were arrived at, their scientific consequences and how these discoveries advanced the thoughts of the key players involved. With over 90 world-class contributors, such as James Van Allen, Cornelis de Jager, Eugene Parker, Reimar Lüst, and Ernst Stuhlinger, and with a Foreword by Lodewijk Woltjer (past ESO Director General), this book will be immensely useful to readers in the fields of space science, astronomy, and the history of science. Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection.

**Hermead: Philosophers** Aug 05 2021 *Hermead of Surazeus* is an epic poem about the development of philosophy over 600 years in the lives and ideas of 26 of the greatest philosophers who contributed to the growth of civilization. This single volume edition presents in 126,680 lines of pentameter blank verse the tales of Hermes, Prometheus, Kadmos, Asklepios, Zethos Hesiodos, Thales, Anaximandros, Pythagoras, Herakleitos, Parmenides, Anaxagoras, Empedokles, Leukippos, Philolaos, Demokritos, Aristokles Platon, Aristoteles, Demetrios Phalereus, Epikouros, Arkhimedes, Ktesibios, Eratosthenes, Krates, Hipparkhos, Philodemos, and Lucretius.

**I'm Thankful for...(Sesame Street)** Nov 15 2019 Join Elmo and his Sesame Street friends as they each share what special thing they are thankful for!

*Star Formation at High Angular Resolution* Apr 01 2021

**Wild Stars in the Old West** Jan 22 2023

**Cool Leatherworking Projects: Fun & Creative Workshop Activities** Nov 20 2022 Stitch, weave, distress, and design with Cool Leatherworking Projects! Kids can learn how to sew a leather backpack pouch, sand and stretch leather into a medieval folder, and more! Each workshop project includes easy-to-read, step-by-step instructions paired with photographs. Budding craftspeople and engineers will love learning how to use the tools of the trade to make one-of-a-kind

creations. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.

**Virtual Local Manufacturing Communities** Apr 13 2022 This book deeply explores production-capable social media channels, based on thousands of hours of observation and extensive collection of statistical data, extracting hypotheses that may generalize to the real-world distributed manufacturing of the near future. Distributed manufacturing offers the promise of bringing jobs back to local communities, producing goods that are personalized or harmonize with distinctive cultures, and thereby reversing significant aspects of the globalization that has dominated in recent years. Large corporations may still have important roles to play, but in collaboration with local workshops, providing machinery, software, databases of designs, and communication media suitable for a diverse and dynamic workforce. For years, a set of computer simulation laboratories has flourished, in which millions of people have used virtual machines to produce a great variety of products: massively multiplayer online role-playing games. Their systems are highly diverse, complex, and provide information capable of serious social science analysis. This book deeply explores 30 of these production-capable social media, based on thousands of hours of observation and extensive collection of statistical data, extracting hypotheses that may generalize to the real-world distributed manufacturing of the near future. This book begins with an overview of this universe of online virtual worlds then demonstrates the principles of virtual manufacturing, modes of work-related communication, socio-economic structures and dynamics, and the function of artificial intelligence in these human-technology systems. It concludes with consideration of the large-scale technical and cultural variation illustrated both by individual examples and by the rather large industry in which they have long been successful.

Laser Guide Star Adaptive Optics for Astronomy Jun 03 2021 Adaptive optics allows the theoretical limit of angular resolution to be achieved from a large telescope, despite the presence of turbulence. Thus an eight meter class telescope, such as one of the four in the Very Large Telescope operated by ESO in Chile, will in future be routinely capable of an angular resolution of almost 0.01 arcsec, compared to the present resolution of about 0.5 arcsec for conventional imaging in good condition. All the world's major telescopes either have adaptive optics or are in the process of building AO systems. It turns out that a reasonable fraction of the sky can be observed using adaptive optics, with moderately good imaging quality, provided imaging is done in the near IR. To move out of the near IR, with its relatively poor angular resolution, astronomers need a laser guide star. There is a layer of Na atoms at approximately 90 km altitude that can be excited by a laser to produce such a source, or Rayleigh scattering can be employed lower in the atmosphere. But the production and use of laser guide

stars is not trivial, and the key issues determining their successful implementation are discussed here, including the physics of the Na atom, the cone effect, tilt determination, sky coverage, and numerous potential astronomical applications.

**Battalion Banished** Dec 17 2019 Rob and Frida's Battalion Zero has vanquished Dr. Dirt, but Dirt's accomplice, Lady Craven, has risen to power to finish what Dirt started: control of every biome boundary to rule the Overworld. The balance of day and night has shifted, and the mobs keep the villagers at bay, making them work ever harder during the day to replace what monsters destroy at night. Battalion Zero has suffered some losses and must regroup and recoup their resources and power. Rob, Frida, Jools, and Stormie are now outcasts who must search the most desolate spaces for plunder as they attempt to gather new recruits who share their cause. Once a legitimate rancher, Rob reluctantly turns to rustling to provide horses to trade and to mount his company of defenders. The four friends become ever bolder and more desperate in their nightly raids against the mobs, and soon they bolster their ranks with outlaws De Vries and Crash, two shape-shifters who might get close enough to Lady Craven's inner circle to bring them down. But artifice and deception can go too far. As Battalion Zero adopts the enemy's tactics, their very humanity hangs in the balance. Now the only soul that Captain Rob can trust is his honest steed, Saber. Can the two lead their cavalry cohorts back to the side of justice in time to retake the Overworld? Will Rob be able to resume his journey home? Or will they all remain in Overworld orbit forever, banished to the Far Lands to live or die? Saddle up for the next daring advance by Rob and company, Defenders of the Overworld! Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

**Monthly Notes of the Astronomical Society of Southern Africa** Aug 25 2020

**Evolution of Binary and Multiple Star Systems** Feb 11 2022 Annotation The latest research on the theory of binary and multiple star systems is presented in these papers from a summer 2000 conference. Papers are organized in sections on stellar evolution, the formation of binary and multiple stars, triple systems, tidal evolution, magnetic activity, binary populations, common-envelope evolution, Type Ia supernova and gamma-ray burst progenitors, white-dwarf binaries, neutron-star binaries and binary pulsars, and black hole binaries. The fate of submillisecond pulsars, the population of faint transients in

the galactic center, the violent past of Cygnus X-2, and orbital period behavior of some semi-detached eclipsing binaries during the last few decades are some of the subjects discussed. Annotation c. Book News, Inc., Portland, OR (booknews.com)

*Spectroscopically and Spatially Resolving the Components of Close Binary Stars* Apr 20 2020

*South African Astronomical Observatory Report for the Year Ending...* Jun 22 2020

**Stars as Suns** Jan 30 2021

*The Impact of Large-scale Surveys on Pulsating Star Research* Mar 12 2022 Annotation Papers from an August 1999 meeting are arranged in sections on the present and future of large-scale surveys, variability of high- luminosity stars, cepheids and RR Lyrae stars, the Blazhko phenomenon, theoretical models of classical pulsating stars, variables close to the main sequence, and pulsating white dwarfs and subdwarfs. Specific topics include nonradial modes in RR Lyrae stars, nonlinear pulsations of convective stellar models, oscillation of rapidly rotating stars, and instabilities in very massive stars. Szabados is affiliated with Konkoly Observatory of the Hungarian Academy of Sciences, Hungary. Kurtz is affiliated with the department of astronomy at the University of Cape Town, South Africa.
