call to arms for all parents to understand their role as their children's lifelong teachers, showing how they can help their kids' educators and schools achieve the best outcomes for the next generation. So many Australian parents are buying the government line about standardised testing of students through programs like NAPLAN and My School, which make them think they are getting results because of rankings and comparisons. But they don't seem to realise that these new forms of assessment are actually negatively affecting our kids' ability to gain the crucial life skills and appreciation for learning that have been, and should be, the main aim of teaching. In Dear Parents, a funny, heartfelt and impassioned series of letters to the mothers, fathers and caregivers of Australia, Gabbie Stroud makes a plea to all parents to understand the fundamental changes to the way their children are being taught, and the results of this process on the development of future generations. She wants parents to recognise their responsibility as their children's primary educators and to appreciate the lifelong benefits that committed and dedicated school teachers can bring to their kids. 'A moving and inspiring journey through teaching and learning and all they can be. If you have a young person in your life, or know somebody who does, please read this book.' - Morris Gleitzman, Australian Children's Laureate 'Gabbie Stroud's Dear Parents is a crucial bridge between two important pillars in education - parents and teachers - but most importantly, it holds at its passionate heart the best interests of children. If you want to understand the way your children are being educated in these challenging times, and whether the system is fit for purpose, you must read this funny, informative, and eye-opening book.' - Lucy Clark, author of the critically acclaimed Beautiful Failures Get your unique Composition Notebook !!! What does it take to create and implement a 7th to 8th grade middle school program where the great majority of students achieve at high academic levels regardless of their previous elementary school backgrounds? This was the major question that guided the research and development of a 7-year long project effort entitled the Chancellor's Model School Project (CMSP) from September 1991 to August 1998. The CMSP effort conducted largely in two New York City public schools was aimed at creating and testing a prototype 7th and 8th grade model program that was organized and test-implemented in two distinct project phases: Phase I of the CMSP effort was conducted from 1991 to 1995 as a 7th to 8th grade extension of an existing K-6 elementary school, and Phase II was conducted from 1995 to 1998 as a 7th to 8th grade middle school program that became an integral part of a newly established 7-12th grade high school. In Phase I, the CMSP demonstrated that with a highly structured curriculum coupled with strong academic support and increased learning time, students participating in the CMSP were able to develop a strong foundation for rigorous high school coursework within the space of 2 years (at the 7th and 8th grades). Mathematics and Reading test score data during Phase I of the project, clearly indicated that significant academic gains were obtained by almost all students -- at both the high and low ends of the spectrum -- regardless of their previous academic performance in the K-6 elementary school experience. The CMSP effort expanded in Phase II to include a fully operating 7-12 high school model. Achievement gains at the 7th and 8th grade levels in Phase II were tempered by

the fact that incoming 7th grade students' academic background at the CMSP High School was significantly lower than students participating in Phase 1. Student performance in Phase II was also affected by the broadening of the CMSP effort from a 7-8th grade program to a fully functioning 7-12 high sch James Patterson's winning follow-up to the #1 New York Times bestseller Middle School, The Worst Years of My Life is another riotous and heartwarming story about living large. After sixth grade, the very worst year of his life, Rafe Khatchadorian thinks he has it made in seventh grade. Wrong! Anything he's never done before, he's going to do it. But when his newest mission uncovers secrets about the family Rafe's never known, he has to decide if he's ready to have his world turned upside down. Updated research, recommended readings, and a variety of study tools make this book a comprehensive resource

for all teachers of physical education Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
