A Profession Without Reason Aug 05 2021 There is today a crisis in psychiatry. Even the former director of the National Institute of Mental Health, Thomas Insel, has said: "Whatever we've been doing for five decades, it ain't working." The field requires a completely fresh look, and clinical psychologist Bruce Levine—a man often at odds with his profession—enlists the early Enlightenment philosopher Baruch de Spinoza to help work through the problem. Readers unfamiliar with Spinoza will be intrigued by the modern relevance of his radical philosophical, psychological, and political ideas. Levine compares the radical/moderate divide among Enlightenment thinkers to a similar divergence between contemporary critics of psychiatry, siding historically with Spinoza in order to bring an equivalent intellectual force to bear upon our modern crisis and calling for new forms of free and enlightened thinking.

The Governance Gap Apr 01 2021 This book explores the persistence of the governance gap with respect to the human rights-impacting conduct of transnational extractive corporations operating in zones of weak governance. The authors launch their account with a fascinating case study of Talisman Energy's experience in Sudan, informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan (Harker

Mission). Drawing on new governance, reflexive law and responsive law theories, the authors assess legal and other non-binding governance mechanisms that have emerged since that time, including the UN Guiding Principles on Business and Human Rights. They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations, or of assuring accountability of these actors or recompense for victims of such violations. The authors contend that home state regulation, while not a silver bullet, has a crucial role to play in regulating such conduct. They pick up where UN Special Representative John Ruggie's Guiding Principles on Business and Human Rights left off, and propose an innovative, robust and adaptable template for strengthening the regulatory framework of home states. Their model draws insights from the theoretical literature, leverages existing public, private, transnational, national, 'soft' and hard regulatory tools, and harnesses the specific strengths of state-based governance. This book will be of interest to academics, policy makers, students, civil society and business leaders.

Letters and Communities Jan 10 2022 The writing of letters often evokes associations of a single author and a single addressee, who share in the exchange of intimate thoughts across distances of space and time. This model underwrites such iconic notions as the letter representing an 'image of the soul of the author' or constituting 'one half of a dialogue'. However justified this conception of letter-writing may be in particular instances, it tends to marginalize a range of issues that were central to epistolary communication in the ancient world and have yet to receive sustained and systematic investigation. In particular, it overlooks the fact that letters frequently presuppose and were designed to reinforce communities-or, indeed, to

constitute them in the first place. This volume explores the interrelation of letters and communities in the ancient world, examining how epistolary communication aided in the construction and cultivation of group-identities and communities, whether social, political, religious, ethnic, or philosophical. A theoretically informed Introduction establishes the interface of epistolary discourse and group formation as a vital but hitherto neglected area of research, and is followed by thirteen case studies offering multi-disciplinary perspectives from four key cultural configurations: Greece, Rome, Judaism, and Christianity. The first part opens the volume with two chapters on the theory and practice of epistolary communication that focus on ancient epistolary theory and the unavoidable presence of a letter-carrier who introduces a communal aspect into any correspondence, while the second comprises five chapters that explore configurations of power and epistolary communication in the Greek and Roman worlds, from the archaic period to the end of the Hellenistic age. Five chapters on letters and communities in Ancient Judaism and Early Christianity follow in the third, part before the volume concludes with an envoi examining the trans-historical, or indeed timeless, philosophical community Seneca the Younger construes in his Letters to Lucilius.

News International and phone-hacking Jul 24 2020 This report concentrates on the issue of whether witnesses have previously misled a select committee of the House of Commons over the extent and knowledge of phone-hacking. The Committee concludes that several individuals misled the Committee in 2009 and more

recently, and that the News of the World and News International corporately misled the Committee about the true nature and extent of the internal investigations they carried out into phone-hacking, made statements that were not fully truthful, and withheld documents. The companies' directors - including Rupert Murdoch and James Murdoch - should be prepared to take responsibility for these failings. The Committee reports its findings for the House of Commons to decide whether a contempt has been committed and, if so, what punishment should be imposed.

Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade Dec 09 2021 The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-

disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

York is now building one of the world's longest, widest, and most expensive bridges—the new Tappan Zee Bridge—stretching more than three miles across the Hudson River, approximately thirteen miles north of New York City. In *Politics Across the Hudson*, urban planner Philip Plotch offers a behind-the-scenes look at three decades of contentious planning and politics centered around this bridge, recently renamed for Governor Mario M. Cuomo, the state's governor from 1983 to 1994. He reveals valuable lessons for those trying to tackle complex public policies while also confirming our worst fears about government dysfunction. Drawing on his extensive experience planning megaprojects, interviews with more than a hundred key figures—including governors, agency heads, engineers, civic advocates, and business leaders—and extraordinary access to internal government records, Plotch tells a compelling story of high-stakes battles between powerful players in the public, private, and civic sectors. He reveals how state officials abandoned viable options, squandered hundreds of millions of dollars, forfeited more than three billion dollars in federal funds, and missed out on important opportunities. Faced with the public's unrealistic expectations, no one could identify a practical solution to a vexing problem, a dilemma that led three governors to study various alternatives rather than disappoint key constituencies. *Politics Across the Hudson* continues where Robert Caro's *The Power Broker* left off and illuminates the power struggles involved in building New York's first major new bridge since the Robert Moses era. Plotch describes how one governor, Andrew Cuomo, shrewdly overcame the seemingly insurmountable obstacles of onerous environmental regulations, vehement community opposition, insufficient funding, interagency battles, and overly optimistic expectations.

Harriet Martineau and the Birth of Disciplines Aug 25
2020 One of the foremost writers of her time, Harriet
Martineau established her reputation by writing a hugely
successful series of fictional tales on political
economy whose wide readership included the young Queen
Victoria. She went on to write fiction and nonfiction;
books, articles and pamphlets; popular travel books and
more insightful analyses. Martineau wrote in the middle
decades of the nineteenth century, at a time when new
disciplines and areas of knowledge were being
established. Bringing together scholars of literature,
history, economics and sociology, this volume
demonstrates the scope of Martineau's writing and its
importance to nineteenth-century politics and culture.
Reflecting Martineau's prodigious achievements, the
essays explore her influence on the emerging fields of
sociology, history, education, science, economics,
childhood, the status of women, disability studies,
journalism, travel writing, life writing and letter
writing. As a woman contesting Victorian patriarchal
relations, Martineau was controversial in her own
lifetime and has still not received the recognition that
is due her. This wide-ranging collection confirms her
place as one of the leading intellectuals, cultural
theorists and commentators of the nineteenth century.

Dual Reporting May 22 2020 An indispensable guide to

Oppenheim's International Law: United Nations Nov 08
2021 The United Nations, whose specialized agencies were
the subject of an Appendix to the 1958 edition of
Oppenheim's International Law: Peace, has expanded
beyond all recognition since its founding in 1945. This
volume represents a study that is entirely new, but
prepared in the way that has become so familiar over
succeeding editions of Oppenheim. An authoritative and
comprehensive study of the United Nations' legal
practice, this volume covers the formal structures of
the UN as it has expanded over the years, and all that
this complex organization does. All substantive issues
are addressed in separate sections, including among
others, the responsibilities of the UN, financing,
immunities, human rights, preventing armed conflicts and
peacekeeping, and judicial matters. In examining the
evolving structures and ever expanding work of the
United Nations, this volume follows the long-held
tradition of Oppenheim by presenting facts uncoloured by
personal opinion, in a succinct text that also offers in
the footnotes a wealth of information and ideas to be
explored. It is book that, while making all necessary
reference to the Charter, the Statute of the

International Court of Justice, and other legal instruments, tells of the realities of the legal issues as they arise in the day to day practice of the United Nations. Missions to the UN, Ministries of Foreign Affairs, practitioners of international law, academics, and students will all find this book to be vital in their understanding of the workings of the legal practice of the UN. Research for this publication was made possible by The Balzan Prize, which was awarded to Rosalyn Higgins in 2007 by the International Balzan Foundation.

Vanity Fair and the Celestial City _____ Jan 18 2020 In John Bunyan's *The Pilgrim's Progress*, the pilgrims cannot reach the Celestial City without passing through Vanity Fair, where everything is bought and sold. In recent years there has been much analysis of commerce and consumption in Britain during the long eighteenth century, and of the dramatic expansion of popular publishing. Similarly, much has been written on the extraordinary effects of the evangelical revivals of the eighteenth century in Britain, Europe, and North America. But how did popular religious culture and the world of print interact? It is now known that religious works formed the greater part of the publishing market for most of the century. What religious books were read, and how? Who chose them? How did they get into people's hands? *Vanity Fair and the Celestial City* is the first book to answer these questions in detail. It explores the works written, edited, abridged, and promoted by evangelical dissenters, Methodists both Arminian and Calvinist, and Church of England evangelicals in the period 1720 to 1800. Isabel Rivers also looks back to earlier sources and forward to the continued republication of many of these works well into the nineteenth century. The first part is concerned with the publishing and distribution of religious books by commercial booksellers and not-for-profit religious

societies, and the means by which readers obtained them and how they responded to what they read. The second part shows that some of the most important publications were new versions of earlier nonconformist, episcopalian, Roman Catholic, and North American works. The third part explores the main literary kinds, including annotated bibles, devotional guides, exemplary lives, and hymns. Building on many years' research into the religious literature of the period, Rivers discusses over two hundred writers and provides detailed case studies of popular and influential works.

Politics, Justice & the Rule of Law Oct 07 2021 This is the most controversial Book, containing complex shocking revelations, in the series of Books by the Author, wherein most difficult topics are excellently and diligently dealt with, exposing realities in politics, and non-dispensation of justice, with judiciary acting sans jurisdiction, ultra-vires the Constitution, denying natural justice, making a mockery of the `rule of law', paying scant regard to United Nations Conventions on Human Rights. The range of cases and topics dealt with is indeed amazing making exhorbing reading. Commencing with his own exposure to politics, paying high tribute to minority Tamils in Sri Lanka, the Author brings out stunning prevalent reality. Makes startling disclosures on Sri Lanka's most controversial Presidential Election of 2010, and incarceration, as a villain, a Presidential Candidate, a trusted Army General, once hailed, as the `best Army General in Asia', having led the country's armed forces to crush one of the most feared terrorists organizations, internationally banned, Liberation Tigers of Tamil Elam. The most difficult and delicate subject of `judicial bias and disqualification' at highest levels of the judiciary is dealt with, including the controversy which reverberated on the endeavour by the Legislature to impeach a Chief Justice, whose husband, having held high profile political office, was impleaded

in a dubious share scandal, involving the country's leading Savings Bank. Author incisively delves into an important case of abduction of a Tamil businessman, and the horrendous anonymous allegations of trading in human body parts, during the war against the terrorists, allegedly with Indian and Israeli connections. Author analyses real case studies, involving foreign investments, demonstrating classic instances of dubious judicial processes, including subversion of action, vis-à-vis, fabricated forged documents of public officers tendered to Court, involving questionable professional conduct, and indifference by law enforcement authorities, including Attorney General, Chief Law Officer of the State.
