Child Welfare Statistics Dec 09 2021

The Indigenous Identity of the South Saami Aug 17 2022 This open access book is a novel contribution in two ways: It is a multi-disciplinary examination of the indigenous South Saami people in Fennoscandia, a social and cultural group that often is overlooked as it is a minority within the Saami minority. Based on both historical material such as archaeological evidence, 20th century newspapers, and postcard motives as well as current sources such as ongoing land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this under-researched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.

Boilerplate Clauses, International Commercial Contracts and the Applicable Law Dec 21 2022 With the aim of creating an autonomous regime for the interpretation and application of the contract, boilerplate clauses are often inserted into international commercial contracts without negotiations or regard for their legal effects. The assumption that a sufficiently detailed and clear language will ensure that the legal effects of the contract will only be based on the contract, as opposed to the applicable law, was originally encouraged by English courts, and today most international contracts have these clauses, irrespective of the governing law. This collection of essays demonstrates that this assumption is not fully applicable under systems of civil law, because these systems are based on principles, such as good faith and loyalty, which contradict this approach.

**Human-Built World** Jan 18 2020 To most people, technology has been reduced to computers, consumer goods, and military weapons; we speak of "technological progress" in terms of RAM and CD-ROMs and the flatness of our television screens. In *Human-Built World*, thankfully, Thomas Hughes restores to technology the conceptual richness and depth it deserves by chronicling the ideas about technology expressed by influential Western thinkers who not only understood its multifaceted character but who also explored its creative potential. Hughes draws on an enormous range of literature, art, and architecture to explore what technology has brought to society and culture, and to explain how we might begin to develop an "ecotechnology" that works with, not against, ecological systems. From the "Creator" model of development of the sixteenth century to the "big science" of the 1940s and 1950s to the architecture of Frank Gehry, Hughes nimbly charts the myriad ways that technology has been woven into the social and cultural fabric of different eras and the promises and problems it has offered. Thomas Jefferson, for instance, optimistically hoped that technology could be combined with nature to create an Edenic environment; Lewis Mumford, two centuries later, warned of the increasing mechanization of American life. Such divergent views, Hughes shows, have existed side by side, demonstrating the fundamental idea that "in its variety, technology is full of contradictions, laden with human folly, saved by occasional benign deeds, and rich with unintended consequences." In *Human-Built World*, he offers the highly engaging history of these contradictions, follies, and consequences, a history that resurrects technology, rightfully, as more than gadgetry; it is in fact no less than an embodiment of human values.

*This Is Not a Peace Pipe* Sep 06 2021 How can indigenous people best assert their legal and political distinctiveness? In *This is Not a Peace Pipe*, Dale Turner explores indigenous intellectual culture and its relationship to, and within, the dominant Euro-American culture. He contends that indigenous intellectuals need

to engage the legal and political discourses of the state, respecting both indigenous philosophies and Western European intellectual traditions. According to Turner, the intellectual conversation about the meaning of indigenous rights, sovereignty, and nationhood must begin by recognizing, firstly, that the discourses of the state have evolved with very little if any participation from indigenous peoples and, secondly, that there are unique ways of understanding the world embedded in indigenous communities. Further, amongst indigenous peoples, a division of intellectual labour must be invoked between philosophers, who possess and practice indigenous forms of knowledge, and those who have been educated in the universities and colleges of the Euro-American world. This latter group, Turner argues, must assert, protect, and defend the integrity of indigenous rights, sovereignty, and nationhood, as they are the ones able to 'speak the language' of the dominant culture while being guided by their indigenous philosophies. This is *Not a Peace Pipe* is a work that will be controversial amongst indigenous scholars by upsetting the assumptions many have about how best to fight for recognition of their legal and political distinctiveness. It will be debated for years to come.

**Unidroit principles of international commercial contracts : 2016** Apr 01 2021

*Red Moon Rising* Feb 17 2020 For the 50th anniversary of Sputnik, the artificial satellite launched by the Russians in 1957, Brzezinski's book vividly recounts the true story of the birth of the space age in dramatic detail, bringing it to life as never before.

*Barbed Wire* Jul 24 2020 The history of animals and humans as seen through barbed wire. In this original and controversial book, historian and philosopher Reviel Netz explores the development of a controlling and pain-inducing technology—barbed wire. Surveying its development from 1874 to 1954, Netz describes its use to control cattle during the colonization of the American West and to control people in Nazi concentration camps and the Russian Gulag. Physical control over space was no longer symbolic after 1874. This is a history told from the perspective of its victims. With vivid examples of the interconnectedness of humans, animals, and the environment, this dramatic account of barbed wire presents modern history through the lens of motion being prevented. Drawing together the history of humans and animals, Netz delivers a compelling new perspective on the issues of colonialism, capitalism, warfare, globalization, violence, and suffering. Theoretically sophisticated but written with a broad readership in mind, *Barbed Wire* calls for nothing less than a reconsideration of modernity.

*Elements of Quality Online Education* Aug 25 2020 In the ten years since the inception of the Sloan Consortium, the field of online learning has entered the mainstream of higher education, making online learning a core ingredient of tomorrow's educational paradigms. Now that digital natives are coming of age, the blending of on-ground and online education is continuous and unstoppable. Growing demands for wide choice suggest that the blended agenda presses us rapidly into new realms of inquiry. Thus, the title of this collection, the fifth volume in the Sloan-C series on quality, is *Elements of Quality Online Education: Into the Mainstream*. The 14 peer-reviewed studies in this volume provide guidance for effectively responding to the challenges facing higher education. The studies on Student Satisfaction recognize that significant populations remain underserved. Yet asynchronous learning networks (ALNs) are widening access by easing some of the constraints of place-based, synchronous learning, so that many more and many more new kinds of learners can achieve satisfaction and success. The studies on Learning Effectiveness share an emphasis on the ways that ALN exceeds the no significant difference minimum standard for learning outcomes. The studies on blending, combining face-to-face and online methods for learning, offer rich possibilities for what many see as the best of both learning modes. The studies on assessment go to the core of the Sloan-C quality framework and its emphasis on continuous quality improvement through demonstrating progress towards the overarching goal of affordable access for all in a wide range of disciplines. In our time of profound, rapid, and discontinuous change, these studies envision solutions to the challenges of online, blended and face-to-face education in higher education. Sponsored by the Alfred P. Sloan Foundation, the purpose of the Sloan Consortium (Sloan-C) is to help learning organizations continually improve quality, scale, and breadth according to their own distinctive missions, so that education will become a part of everyday life, accessible and affordable for anyone, anywhere, at any time, in a wide variety of disciplines.

**European Private Law** May 02 2021 This handbook provides reliable information on private law in an increasingly integrated Europe. It contains a collection

of specially commissioned essays, including contributions on: corporation law, trust, law of sales, competition law, products liability, personal injuries law, limitation periods, the harmonization of European private law, and more. The essays are designed not only to offer a comprehensive overview of the different topics, but also to display and provoke lively and controversial debate. The handbook addresses some issues that appear to be both growing in momentum and largely overlooked by contemporary literature, namely a) the need to examine current and possible future developments in European private law institutions and issues affecting the legal lives of private, business, and public actors; b) the opportunity to fill a gap in the comparative literature through a concise reference book, which offers quick and easy access to the most relevant legal issues; and c) the cultural debate as to what European private law is and could be, rather than what it ought to be. It follows that the handbook is not meant to simply describe substantive law, but instead to "compare" private law institutions and cultures.

**Materializing Europe** Mar 20 2020 This book explores the relationships between European integration and material infrastructures. Taking transnational infrastructures as the focal point of study, the book focuses on the various forms of mediation between the material, institutional and discursive levels of European integration and fragmentation in a truly transnational perspective.

**Principles, Definitions and Model Rules of European Private Law** Jan 22 2023 In this volume, the Study Group and the Acquis Group present the first academic Draft of a Common Frame of Reference (DCFR). The Draft is based in part on a revised version of the Principles of European Contract Law (PECL) and contains Principles, Definitions and Model Rules of European Private Law in an interim outline edition. It covers the books on contracts and other juridical acts, obligations and corresponding rights, certain specific contracts, and non-contractual obligations. One purpose of the text is to provide material for a possible "political" Common Frame of Reference (CFR) which was called for by the European Commission's Action Plan on a More Coherent European Contract Law of January 2003.

**Industrializing Organisms** Nov 15 2019 First Published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

**The Paradox of Scientific Authority** Jun 22 2020 Assessing the influence of scientific advice in societies that increasingly question scientific authority and expertise. Today, scientific advice is asked for (and given) on questions ranging from stem-cell research to genetically modified food. And yet it often seems that the more urgently scientific advice is solicited, the more vigorously scientific authority is questioned by policy makers, stakeholders, and citizens. This book examines a paradox: how scientific advice can be influential in society even when the status of science and scientists seems to be at a low ebb. The authors do this by means of an ethnographic study of the creation of scientific authority at one of the key sites for the interaction of science, policy, and society: the scientific advisory committee. The Paradox of Scientific Authority offers a detailed analysis of the inner workings of the influential Health Council of the Netherlands (the equivalent of the National Academy of Science in the United States), examining its societal role as well as its internal functioning, and using the findings to build a theory of scientific advising. The question of scientific authority has political as well as scholarly relevance. Democratic political institutions, largely developed in the nineteenth century, lack the institutional means to address the twenty-first century's pervasively scientific and technological culture; and science and technology studies (STS) grapples with the central question of how to understand the authority of science while recognizing its socially constructed nature.

**Food Culture in Scandinavia** Sep 25 2020 The food cultures of Scandinavian countries are similar in important ways but also have many different traditions because of variations in geography and climate and unique social, cultural and political history. Food Culture in Scandinavia covers Denmark, Norway, Sweden, and Iceland's unique and common foodways, all in the context of significant recent changes. This is the most exhaustive overview available in English with all

the latest insight. Students writing country reports and food mavens get the up-to-date scoop from an insider on how Scandinavians eat and live. Readers see how everyday food habits are quickly changing in Scandinavia, mostly in urban areas and among the younger generation. The trends are shown to stem from Scandinavians travelling more, Americanization and globalization, new immigrants bringing their cuisines, classic national and regional products being revitalized, high-end restaurants for the new business elite springing up, and a growing interest in healthful and organic food. The Historical Overview chapter lays the groundwork to understand the evolution from the traditional Scandinavian fare—fish, porridge, bread, milk. A chapter on major foods and ingredients elaborates on these staples and more and updates their use. In the Cooking chapter, the new gender dynamics are discussed in terms of who is shopping and cooking and especially the impact of the supermarket. Typical Meals discusses the mainstays for daily fare and notes the biggest changes in the choices of pizza and fast food for youth. Eating out in Scandinavia is becoming more common, and Chapter 5 highlights the growing options for casual family meals out, business and school lunches, as well as take-out food and more. The Special Occasions chapter illuminates the major events in the calendar, especially the magical Christmas time plus the famous seasonal fests such as Midsummer in Sweden and life-cycle events such as weddings, where innovation is expected. A final chapter on diet and health emphasizes the familiar health concerns related to diets too high in fat and sugar and too low in vegetables and fruit. A timeline, selected bibliography, illustrations, and classic recipes complement the narrative.

Annuaire Statistique Jul 04 2021

Citizen's Right to the Digital City Apr 13 2022 Edited by thought leaders in the fields of urban informatics and urban interaction design, this book brings together case studies and examples from around the world to discuss the role that urban interfaces, citizen action, and city making play in the quest to create and maintain not only secure and resilient, but productive, sustainable and viable urban environments. The book debates the impact of these trends on theory, policy and practice. The individual chapters are based on blind peer reviewed contributions by leading researchers working at the intersection of the social / cultural, technical / digital, and physical / spatial domains of urbanism scholarship. The book will appeal not only to researchers and students, but also to a vast number of practitioners in the private and public sector interested in accessible content that clearly and rigorously analyses the potential offered by urban interfaces, mobile technology, and location-based services in the context of engaging people with open, smart and participatory urban environments.

Concise Anthropology Oct 19 2022 Concise Anthropology: The Five-Field Approach

**A History of Refrigeration Throughout the World** Oct 15 2019 Abstract: The evolution, trends, and applications of the mechanical aspects of refrigeration are traced from 1755 to the present day. The information is intended to appeal not only to engineering students and refrigerationists, but to the general reader as well. The history is divided into 4 epochs. The first, before 1875, discusses natural refrigeration, thermometry, the development of the concepts of heat and thermal processes, and the 4 families of refrigerating machines. The second epoch, 1875-1914, covers the industrialization of refrigeration and its first applications to brewing, food preservation, storage and transport, and non-food applications such as air conditioning and cryogenics. The third epoch, between the wars, introduces the compressor, refrigeration in daily life, and further developments in established areas. The final epoch, after 1945, documents the explosion of refrigeration technology, its spread throughout the world, and its thousands of uses, from desalination of sea water to freeze-dried foodstuffs and medical applications.

**Trends Shaping Education 2013** Nov 08 2021 What does it mean for education that our societies are increasingly diverse? How is global economic power shifting towards new countries? In what ways are working patterns changing? Trends Shaping Education 2013 brings together international evidence to address questions like these.

Crisis Intervention in the Community Jul 16 2022

**Emerging Trends in Information Systems** Jun 15 2022 This book presents and discusses the most recent innovations, trends, results, experiences and concerns with regard to information systems. Individual chapters focus on IT for facility management, process management and applications, corporate information systems, design and manufacturing automation. The book includes new findings on software engineering, industrial internet, engineering cloud and advance

BPM methods. It presents the latest research on intelligent information systems, computational intelligence methods in Information Systems and new trends in Business Process Management, making it a valuable resource for both researchers and practitioners looking to expand their information systems expertise.

**Topics in Kinetic Theory** Apr 20 2020 This book covers a variety of topics related to kinetic theory in neutral gases and magnetized plasmas, with extensions to other systems such as quantum plasmas and granular flows. A comprehensive presentation is given for the Boltzmann equations and other kinetic equations for a neutral gas, together with the derivations of compressible and incompressible fluid dynamical systems, and their rigorous justification. Several contributions are devoted to collisionless magnetized plasmas. Rigorous results concerning the well-posedness of the Vlasov-Maxwell system are presented. Special interest is devoted to asymptotic regimes where the scales of variation of the electromagnetic field are clearly separated from those associated with the gyromotion of the particles. This volume collects lectures given at the Short Course and Workshop on Kinetic Theory organized at the Fields Institute of Mathematical Sciences in Toronto during the Spring of 2004.

Child Welfare Statistics Aug 05 2021

*Network Corruption* Sep 18 2022 Corruption is generally referred to as bribery. This book deals with a different form of corruption: corruption caused by networks. Network corruption is the form of corruption in which the interaction of multiple actors within a social network results in corruption but in which the individual behaviour as such is not necessarily corrupt. The main reason for this research is that a gap appears to exist in the available theories on corruption: very little research is available on corruption by a network, nor does the network theory thoroughly discuss the risks or pitfalls of networks or how such a collective can become corrupt. As such this book offers a 'new layer' by clearly defining what distinguishes network corruption from corruption networks. The other reason for this research is the observation that policies and investigations appear to be limited in dealing with corruption in network-like structures. This book deals with the question how corruption is linked to the functioning of social networks. The available literature of both corruption and networks was reviewed. Some theories support the idea of collective acting and collective responsibility which can be used in cases of corruption by a network. The conceptual analysis results in one assessment frame which helps in distinguishing when networks are a form of social capital and when they deteriorate into corruption. The assessment frame was applied to three case studies from developed western societies in which corruption was brought in connection with a network (the international FIFA case, the News of the World International phone-hacking scandal from the United Kingdom and the Dutch city of Roermond). This allowed for a better understanding of the mechanisms and characteristics of networks. The findings on the link between networks and corruption gained from this book call for alternative routes for policy development and for a greater network awareness. This book concludes with policy recommendation and ways to ensure networks remain the essential Social Capital needed in our society.

**The Library of Shadows** Nov 27 2020 Imagine that some people have the power to affect your thoughts and feelings when you read, or they read a book to you. They can seduce you with amazing stories, conjure up vividly imagined worlds, but also manipulate you into thinking exactly what they want you to. When Luca Campelli dies a sudden and violent death, his son Jon inherits his second-hand bookshop, Libri di Luca, in Copenhagen. Jon has not seen his father for twenty years since the mysterious death of his mother. When Luca's death is followed by an arson attempt on the shop, Jon is forced to explore his family's past. Unbeknown to Jon, the bookshop has for years been hiding a remarkable secret. It is the meeting place of a society of booklovers and readers, who have maintained a tradition of immense power passed down from the days of the great library of ancient Alexandria. Now someone is trying to destroy them, and Jon finds himself in a fight for his life and those of his new friends.

**Trends Shaping Education 2016** Dec 29 2020 Did you ever wonder if education has a role to play in stemming the obesity epidemic sweeping across all OECD countries? Or what the impact of increasing urbanisation might be on our schools, families, and communities? Or whether new technologies really are fundamentally changing the way our ...

The Airbnb Story Feb 23 2023 “An engrossing story of audacious entrepreneurship and big-industry disruption, [this] is a tale for our times.” —Charles Duhigg, author of *Smarter Faster Better* An investigative look into a beloved, disruptive, notorious start-up This is the remarkable behind-the-scenes story of the creation

and growth of Airbnb, the online lodging platform that is now the largest provider of accommodations in the world. At first just the wacky idea of cofounders Brian Chesky, Joe Gebbia, and Nathan Blecharczyk, Airbnb has become indispensable to millions of hosts and travelers around the world. Fortune editor Leigh Gallagher presents the first nuanced, in-depth look at the Airbnb phenomenon—the successes and controversies alike—and takes us behind the scenes as the company’s young CEO steers into increasingly uncharted waters. “A fast-paced, fun dive into one of the seminal firms of our time; through the tale of Airbnb, Leigh Gallagher shows us how the sharing economy can be a force for emotional connection—as well as for social and business disruption.” —Rana Foroohar, Financial Times columnist and CNN global economic analyst

*Absolute Zero and the Conquest of Cold* Dec 17 2019 “A lovely, fascinating book, which brings science to life.” —Alan Lightman Combining science, history, and adventure, Tom Shachtman “holds the reader’s attention with the skill of a novelist” as he chronicles the story of humans’ four-centuries-long quest to master the secrets of cold (Scientific American). “A disarming portrait of an exquisite, ferocious, world-ending extreme,” *Absolute Zero and the Conquest of Cold* demonstrates how temperature science produced astonishing scientific insights and applications that have revolutionized civilization (Kirkus Reviews). It also illustrates how scientific advancement, fueled by fortuitous discoveries and the efforts of determined individuals, has allowed people to adapt to—and change—the environments in which they live and work, shaping man’s very understanding of, and relationship, with the world. This “truly wonderful book” was adapted into an acclaimed documentary underwritten by the National Science Foundation and the Alfred P. Sloan Foundation, directed by British Emmy Award winner David Dugan, and aired on the BBC and PBS’s *Nova* in 2008 (Library Journal). “An absorbing account to chill out with.” —Booklist

Kongeriget Norges ... ordentlige Storthings forhandlinger in året Mar 12 2022

**Putting Meat on the American Table** May 22 2020 How did meat become such a popular food among Americans? And why did the popularity of some types of meat increase or decrease? *Putting Meat on the American Table* explains how America became a meat-eating nation - from the colonial period to the present. It examines the relationships between consumer preference and meat processing - looking closely at the production of beef, pork, chicken, and hot dogs. Roger Horowitz argues that a series of new technologies have transformed American meat - sometimes for the worse, sometimes for the better. He draws on detailed consumption surveys that shed new light on America's eating preferences - especially differences associated with income, rural versus urban areas, and race and ethnicity. Engagingly written, richly illustrated, and abundant with first-hand accounts and quotes from period sources, *Putting Meat on the American Table* will captivate general readers and interest all students of the history of food, technology, business, and American culture.

This is Not a Peace Pipe [microform]: Towards an Understanding of Aboriginal Sovereignty Feb 28 2021

**International Commercial Contracts** Nov 20 2022 Any practising lawyer and student working with international commercial contracts faces standardised contracts and international arbitration as mechanisms for dispute settlement. Transnational rules may be applicable, but national law is still important. Based on extensive practical experience, this book analyses international contract practice and its interaction with the various applicable sources: which role is played by the contractual regulation, which by national law, which by transnational sources, what is the interaction among these factors, and how does this all apply to contracts that refer disputes to international arbitration?
