The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw. Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear, transparent, and useful reports. This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting, the characteristics of good guidelines, and how to use reporting guidelines effectively in reporting health research. This hands-on manual also describes over a dozen internationally recognised

published guidelines such as CONSORT, STROBE, PRISMA and STARD in a clear and easy to understand format. It aims to help researchers choose and use the correct guidelines for reporting their research, and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading. Written by the authors of health research reporting guidelines, in association with the EQUATOR (Enhancing the QUALITY and Transparency Of health Research) Network, Guidelines for Reporting Health Research is a helpful guide to producing publishable research. It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers. The book—companion to a PBS series—that proves humans are causing global warming and offers a path to the future. Since the discovery of fire, humans have been energy users and always will be. And this is a good thing—our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet. However, this mastery comes with a price: we are changing our environment in a profoundly negative way by heating it up. Using one engaging story after another, coupled with accessible scientific facts, world authority Richard B. Alley explores the fascinating history of energy use by humans over the centuries, gives a doubt-destroying proof that already-high levels of carbon dioxide are causing damaging global warming, and surveys the alternative energy options that are available to exploit right now. These new energy sources might well be the engines for economic growth in the twenty-first century. At Last! Sincerely, Directorate for Crew Training Written for the layperson by curators at the National Air and Space Museum, with colorful illustrations throughout, THE SPACE SHUTTLE OPERATOR'S MANUAL takes the reader through all the motions of an actual mission -- from preparation to takeoff to orbit to re-entry. Conversations about the future are often overly simplified and based on popularized visions of what could be. In The Extrapolation Factory Operator's Manual, Montgomery and Woebken illuminate their work to democratize futures research, elucidating strategies culled from think tanks and futurists as well as models and techniques they've developed for organizing collaborative futures explorations. Their approaches introduce a range of visioning methods that, when shared with non-futurists in community and organizational forums, could profoundly influence our ability to envision possible futures. The text is published as a bilingual manual in Mandarin Chinese and English. The manual is one in a series of publications designed to aid in transferring the capability to operate the Army Cost Model from RAND to other organizations. It covers only the more

procedural aspects of model operation and updating. Use of the manual requires, on the part of the cost model operator, an intimate familiarity with all aspects cost model. The manual therefore cannot be used in isolation; it must be used in conjunction with other publications in the series covering data sources and analysis, future research, and model structure and flow. Through the story of a group of souls from another world preparing to enter physical existence on Planet Earth, a business consultant and popular speaker presents nine meditations designed to bring success, strength, and spirituality.
