In the ocean, a box jellyfish dangles tentacles covered with venom-filled stingers. The jellyfish uses its stingers to kill its prey. But its venom can also kill humans within minutes. The brightly colored poison dart frog is deadly to humans too. Just a speck of its poison can kill a person. These two creatures are among the most venomous and poisonous animals in the world. How do animals use their poisons? When are humans in danger? Consider, if you can, the case of Jacob Fowler, who heard what he thought was the sound of his own skull cracking between the jaws of a grizzly bear - only to discover that it was. Or the Arizonan jogger who ran a mile back to her car with a rabid fox clamped to her arm before driving to hospital for live-saving inoculations. Or the woman who was attacked by a hyena, dragged from her tent by her face and survived to tell of her ordeal. The dangers of the animal kingdom are the stuff of legend but the reality of man's vulnerability and of nature's savage power is far more various, improbable and chilling than even the most active imagination would fear. In this unique work of nature writing, you will encounter the most formidable predators on land and sea - as well as the most overlooked, bizarre and inventive hazards that mother nature has to offer. Meet the cougar that can leap 40 feet and clear 8-foot fences with a fully-grown deer in its jaws, the tapeworm that's been known to grow as long as 82 feet in the human gut and the elephant that single-handedly destroyed an oil tanker. Drawing on an enormous host of true encounters between man and beast, this is the world's most authoritative compendium of animal attacks on human beings. With mordant wit and expert timing, Gordon Grice provides a gripping journey to the dark side of the animal kingdom and a celebration of its humbling, savage glory. (Originally published in hardback as *The Book of Deadly Animals*.) Get up close and personal with some of the world's most dangerous animals in *Ultimate Sticker Book: Deadly Animals*. Did you know the most poisonous animal in the world is the tiny golden dart frog? Or that the alligator snapping turtle's tongue looks like a worm to lure prey into its mouth? Or that scorpions skitter across the desert, hunting for food with its pincers and stinging tail? Hunt with lions, polar bears, wolves, and sharks to see how they take down their prey. Learn about the deadliest predators' environments, diets, and habits, and discover amazing facts in this

action-packed sticker book. Filled with information, activities, and more than 250 reusable stickers, *Ultimate Sticker Book: Deadly Animals* is a great catch for young readers. Taking subjects that kids love, from dinosaurs to baby animals to transportation, DK's *Ultimate Sticker Book* series is being refreshed and updated and now features more than 250 fun, reusable stickers. Packed with activities that allow children to create scenes, match pairs, and complete jigsaws, the activities throughout each book are simple enough for the child to do independently, but engaging enough to keep their interest and help develop dexterity, making these books products parents can trust, and ones that kids will want to keep picking up to learn more about their favorite subjects. Recalling his childhood encounter with a cougar on his family farm, the author of *The Red Hourglass* describes the life-long obsession with dangerous animals that prompted his amateur studies with virtually all dangerous creatures, from sharks and bears to alligators and spiders. These deadly animals should be avoided at all times. But how do children get to learn about them and appreciate them if they are not allowed to be near them? Well, here's a book that provides the answer! This educational book will allow for a thorough study of these dangerous animals through real-life pictures and select texts. Kids would love the adventure this book presents so buy a copy today! "In a top-ten format presents the worlds deadliest animals"--

*Deadly Animals* explores the ultimate question: which animal wins the title of the most deadly of all time? It is not such an easy question as you might think. Does it belong to the fast and powerful big cats; or is it one of the ancient dinosaurs like *Tyrannosaurus Rex* or even a large marine predator, like the *Great White Shark* or the *Killer Whale*, as recent movies and various legends seem to suggest? Maybe. Yet, sometimes small is powerful, especially if armed with stingers or fangs. Some of the tiniest creatures of all can claim the largest number of victims, like the *Anopheles Mosquito*, which can spread the deadly disease malaria. So, it is really difficult to judge, isn't it? To help you make up your own mind, *Deadly Animals* presents the most dangerous creatures on Earth, each accompanied by a unique deadly score. Could the toxic slime that oozes from the skin of the *Poison Dart Frog* put it into the top ten? Or will it be the jaw power and killer instinct of the 'King of the Jungle' - the African lion? Turn the pages (carefully!) to meet the most lethal animals from ancient times to the modern day. This eBook examines the top 10 deadliest animals in the world. It provides a direct analysis of each animal's behavioral pattern, venom toxicity (in relation to humans), as well as their general traits and characteristics. There's something deadly in the water—and you can learn more about it here! This informative guide to Earth's most dangerous water animals will take readers on a journey under the sea and into the world of the great white shark, the red-bellied piranha, the box jellyfish, and more. Detailed fact boxes will pull animal fans in and give them vital statistics about the homes, diet, and dimensions of these fascinating creatures, and full-color photographs will show off their deadly features. Don't move. A hairy spider is lurking right behind you! Danger! *Deadly Animals* introduces spine-tingling facts about some of the smallest, and deadliest, animals in the world. *Spectrum(R)* Readers are the perfect Common Core aligned tool to support the development of nonfiction reading skills crucial to a young reader's success. Each leveled reader features high-interest informational content, exciting full-color photo illustrations and Common Core aligned comprehension practice focused on the development of critical thinking skills. This multilevel series is the perfect addition to any library at school or home. Take a deep breath and plunge into terrifying Top 10 lists of deadly animals around the globe. Illustrated with outstanding photographs, *Dangerous Animals* presents an in-depth look at the natural world's most deadly creatures, from poisonous spiders and sea snakes to aggressive lions and man-eating sharks. The selection spans a broad spectrum of wildlife, from large carnivores such as the grizzly bear and great white shark to smaller but equally deadly predators such as the black widow spider and puff adder. Each world habitat is covered, with examples carefully drawn from every region of the planet, from the majestic lion of the African plains and the polar bear of the Arctic wastes to the Komodo dragon of Southeast Asia, whose saliva carries poisonous bacteria that can kill a person in hours. Featuring around 100 species in all, each photographic entry is supported with a fascinating caption, explaining how the animal manages to be so deadly. Beautifully presented, this accessible book is a wonderful introduction to some of the planet's fiercest--or just most

poisonous--creatures. "Deadliest Animals of the World (30) Most Deadly Animals" gives an overview of some of the most deadly animals that can be found on Earth. It not only gives the name of the animal but also provides a bit of background as well. The aim the author has with this text is to inform and educate. It is specifically written for a younger audience but can also be read by an adult who simply wants to learn more. The aim the author has is to provide the information on the world's deadliest animals so that if one happens to encounter it they will know what to do. It is not a particularly long text but that is so because of the age group that the author is targeting. It is a book that every parent should have in the home as a point of reference for their child. It is also beneficial for those who live in the areas that these animals can be found. It has a simple yet effective outline that helps with the flow of the text. If you ever wanted to learn about some dangerous animals, this is a great book to start learning about it. This book provides basic facts about some of Earth's deadliest animals. All titles previously published and with various copyright dates.
