Ham Radio Is Alive and Well Jul 08 2021 Ham Radio is Alive and Well, is packed full of useful information for both new radio amateurs as well as members of the Quarter Century Club. Anyone interested in amateur radio who reads this book is guaranteed to learn something new. This read ranks right up there with so many of the ARRL (American Radio Relay League) books and publications. If you enjoyed reading 200 Meters & Down, or The World of Ham Radio, 1901-1950, you will be fascinated with this text. Gary writes as if he is having a conversation with you over a cup of coffee while he explains many lesser-understood topics in such a manner that anyone can understand them. He shares what he has learned in recent years, and explains how ham radio has evolved and lived on amidst smartphones, PCs, and the Internet. Gary talks about "traditional" ham radio; the stuff hams did and continue to do using HF radios, antenna tuners, wire and/or beam antennas, working DX, QSLing, and contesting. It is about what he remembers from the past, and what is currently happening in the field of ham radio today. You will find bits and pieces of history as well as a little humor blended among many of the various subjects. This transcript is a must read for any inactive radio amateur and the licensee who wants to learn a little bit more than he already knows about this magnificent hobby. As Tim Duffy, K3LR, COO of DX Engineering, wrote in his forward of the book, "Whether you are a long time Ham Radio enthusiast or just getting started, you will find this book hard to put down."

The Zenith Trans-Oceanic Dec 25 2022 The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and

their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.

Radio's Second Century Jan 14 2022 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, Radio's Second Century investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.
