The Manual for Australian Agriculture is a collection of information related to agriculture gathered from different Australian government agencies that are directly or indirectly concerned with agriculture. The book covers related topics such as land utilization and resource use; government assistance to Australian farmers; the physical and chemical properties of soil; soil mapping; plant nutrition, and fertilizers; and the growing of grain crops. The book also covers agro-industrial, fruit, and vegetable crops; kinds of seeds and their processing and storage; plant pests and diseases; and livestock and poultry. The text is recommended for agriculturists who are engaged in business, as well as those who would like to know more about agriculture in Australia. Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. Vols. for 1971- include annual reports and statistical summaries. Good animal husbandry practices and animal health are vital for people living in poorer countries. This practical learning manual is a realistic guide for those who are responsible for training farmers in poor countries, taking into account traditional farming systems, existing inputs and resources, sustainable farming initiatives and advising on the right approaches to training. The overall aims are to improve the condition and health of livestock in poor countries and the lives of the people in these countries. What does it mean to say that international humanitarian law (IHL) strikes a realistic and meaningful balance between military necessity and humanity, and that the law therefore 'accounts for' military necessity? To what consequences does the law 'accounting for' military necessity give rise? Through real-life examples and careful analysis, this book challenges received wisdom on the subject by devising a new theory that not only reaffirms Krieger's fallacy but also explains why IHL has no reason to restrict or prohibit militarily unnecessary conduct on that ground alone. Additionally, the theory hypothesises greater normative significance for humanitarian and chivalrous imperatives when they conflict with IHL rules. By combining international law, jurisprudence, military history, strategic studies, and moral philosophy, this book reveals how rational fighting relates to ethical fighting, how IHL incorporates contrasting values that shape its rules, and how law and theory adapt themselves to war's evolutions. Vols. for 19 include Classified business directory of the entire state.
