This book developed from sections of my doctoral dissertation, "The Possibility of Religious Knowledge: Causation, Coherentism and Foundationalism," Brown University, 1982. However, it actually had its beginnings much earlier when, as an undergraduate at the University of Virginia, I first read Hume's "Of Miracles" and became interested in it. (Fascinated would be too strong. ) My teacher put the following marginal comment in a paper I wrote about it: "Suppose someone told you that they had been impregnated by an angel whispering into their ear. Wouldn't you think they had gone dotty?" She had spent time in England. I thought about it. I agreed that I would not have believed such testimony, but did not think this had much to do with Hume's argument against belief in miracles. What surprised me even more was the secondary literature. I became convinced that Hume's argument was misunderstood. My main thesis is established in Part I. This explains Hume's argument against justified belief in miracles and shows how it follows from, and is intrinsically connected with, his more general metaphysics. Part II Part I. It should give the reader a more complete understanding builds on of both the structure of Hume's argument and of his crucial and questionable premises. Chapters 5 and 11 are perhaps the most technical in the book, but they are also the least necessary. They can be skipped by the reader who is only interested in Hume on miracles. On July 9, 2001, my nephew was in an accident that resulted in a Traumatic Brain Injury that left him with less than a one percent chance of living. This is the true story of how he overcame obstacle after obstacle to survive these odds. It is also the story of his family and how we coped through putting our faith in God and trusting Him with the outcome. Gripping True Story of War and Romance, Hope and Miracles When the odds are impossible, love goes to work. In this thrilling true-life story, readers follow the path of friendship that grows into a romance that spans continents and survives devastating hardship. Craig Keener, a respected white scholar, was cautious after a broken relationship. Médine, a well-educated African woman, met Craig through a campus ministry and the two became friends. Long after they parted for their respective worlds, Craig realized his love for her and began the arduous--and often supernatural--journey to be reunited. Médine faced terror and disease as a refugee in the war-torn Congo; Craig did not know most days if she was alive or dead. Their tender story of love beating the odds inspires readers to believe that God's own great love for each of us will always overcome. There are many who believe Moses parted the Red Sea and Jesus came back from the dead. Others are certain that exorcisms occur, ghosts haunt attics, and the blessed can cure the terminally ill. Though miracles are immensely improbable, people have embraced them for millennia, seeing in them proof of a supernatural world that resists scientific explanation. Helping us to think more critically about our belief in the improbable, The Miracle Myth casts a skeptical eye on attempts to justify belief in the supernatural, laying bare the fallacies that such attempts commit. Through arguments and accessible analysis, Larry Shapiro sharpens our critical faculties so we become less susceptible to tales of myths and miracles and learn how, ultimately, to evaluate claims regarding vastly improbable events on our own. Shapiro acknowledges that belief in miracles could be harmless, but cautions against allowing such beliefs to guide how we live our lives. His investigation reminds us of the importance of evidence and rational thinking as we explore the unknown. The bestselling author of The Miracle Morning shares the secret to unlocking your full potential—all day, every day. "A simple, proven formula for creating extraordinary results in your life."—Lewis Howes, New York Times bestselling author of The School of Greatness Even after the incredible success of his book The Miracle Morning, Hal Elrod realized that he still had more to share with the world. What he had discovered was a timeless but overlooked formula for success. The world's top achievers have used it for centuries. He used it to thrive against seemingly insurmountable odds, from overcoming life-threatening health challenges to near financial collapse. That formula is The Miracle Equation, and it couldn't be any simpler: Unwavering Faith + Extraordinary Effort = Miracles By establishing and maintaining Unwavering Faith that you can achieve anything you desire, and then putting forth Extraordinary Effort until you do, you'll create results beyond what you believe to be possible. In The Miracle Equation, you'll learn how to • Replace fear with faith • Move from resistance to acceptance • Let go of negative emotions • Turn off your stress response • Overcome your limitations to unlock your limitless potential • Develop emotional invincibility • Grow from happiness, which is fleeting, to inner peace, which is lasting And with the Miracle Equation 30-Day Challenge to guide your way, you'll create a step-by-step plan to actualize your miracles and become the person you need to be in order to succeed. No goal is out of reach! Praise for The Miracle Equation "The Miracle Equation isn't just a book, it's the formula that I myself have used to achieve greatness beyond what I ever believed was possible. Hal Elrod has taken the mystery out of miracles and gives you a simple, proven formula for creating extraordinary results in your life. Highly recommended."—Lewis Howes, New York Times bestselling author of The School of Greatness "You're only two decisions away from achieving everything you want. And my friend, Hal Elrod, has simplified these two decisions into a simple equation for achieving results. Follow it, and your success is virtually guaranteed. If you want your biggest goals to move from possible, to probable, to inevitable, you better read The Miracle Equation."—Mel Robbins, bestselling author of The 5-Second Rule It is not a coincidence you are reading these words. God is making a personal connection with you through this book. He wants you to know He is real, and He wants you to see how easy it is to believe in Him. This book is full of evidence you can believe in, whether you believe in God or not, because there are a few things that everybody believes in: science, history, and facts. Everybody believes in these things because they are solid, reliable, and known to be true. You are about to see facts that prove God created us. You are about to see the science and history that you believe in prove that God created the universe, Earth, and man. You will see even more evidence that proves He is real. God wants you to know these facts in order to change your perspective and to challenge you to look at Him in a different light—not as some philosophical or existential question mark but as a living, loving Father who created you as a complex and

precise living being with an eternal soul connected to Him. Facts in this book show just how precise and complex you really are. Whether you believe or not, you are about to see science prove God is real. This is a remarkable dog story of a highly intelligent and gifted, athletic dog challenged against insurmountable odds in an attempt to regain his health and his life back after an acute accident. It is a deep bond between owner and pet canine or, better said, two best friends working together to discover a path to survival. Canine fibrocartilaginous embolism, better known as canine FCE, is not a term widely known by most dog owners; however, all dog owners will find this story riveting as they will learn and witness what can be accomplished when the love of an owner for his dog combined with man's best friend loyally work in unison. You will find this story to be heartwarming, emotional, serious, and funny. It will grab you and draw you in. You will put yourself into the story and wonder, Would you have stayed on this train of a true story, or would you have departed somewhere along the way? On average, 44 percent of the population in the USA own a dog. They are entwined deeply throughout the families they live and cohabitate with. Dogs have a way of discovering our mood changes, if we are sick, and if there is danger nearby. They are loyal to a fault and always happy to see us when we arrive. How far would we go to support them when the odds are against you? Reading this story will definitely make you ask yourself that question. I wrote this book because this story has to be told. I hope you enjoy the ride. Zach Gauvin was a junior in high school who had it allstar of the football team, a beautiful girlfriend he adored, and a terrible drinking problem. Miracle Kid tells the story of his near fatal accident and how, at the age of seventeen, he had to learn how to live all over again. A high school all-star athlete, Gauvin wakes one day to find that his world has been turned upside down. He has been involved in a serious car accident and has received a traumatic brain injury. He wakes after being in a coma for a month. Now, he must relearn how to do everyday things that most people take for granted. He must learn how to walk, talk, and use his left hand all over again. He beats all odds and recovers, fights through many hardships, and accomplishes things peopleincluding the doctorsnever thought would be possible. Along the way, he becomes an advocate for people with brain injuries, seeking to pass along the things that he has learned to others in similar situations. Miracle Kid hopes to inspire everyone to fight hard when things get toughagainst all odds. A testimony of God's love, faithful plan and destiny! "Nothing short of mind-blowing . . . Just amazing stuff"—Newsday "A fast-paced, fascinating tale that combines shoe leather, high-tech forensics and some healthy dollops of luck....Biegel makes a compelling case that he's solved the mystery...his book is a home run." – Associated Press October 3, 1951. Giants third baseman Bobby Thomson hit the most dramatic home run in the history of baseball. The moment occurred in the bottom of the ninth inning of a sudden-death playoff game between the New York Giants and their arch rivals from Brooklyn, the Dodgers. People across the nation watched on their new TV sets, and the home run became known as "the Shot Heard 'Round the World." But after clearing the left-field wall, the central artifact of the play—the ball itself—inexplicably went missing. The mystery of what happened to the legendary baseball has remained unsolved for a half century. Until now. Miracle Ball is the gripping account of author Brian Biegel's two-year effort to unravel the mystery that experts said could never be solved. A sports story for the ages, an engrossing mystery narrative, and a moving account of a man's unbreakable bond with his family and of his struggles to save himself, Miracle Ball delivers both heart and headlines. According to Littlewood's Law of Miracles (based on the theory of large numbers and probability), you should expect something truly unusual to happen every 35 days--so strange, in fact, that it will look like a miracle. This book, which is fully illustrated, explains how the improbable is probable by focusing on desultory decussion (where two random events from an interesting intersection--a synchronicity) and Littlewood's work in number theory at Cambridge University in the last century. Also explains such concepts as Apohenia and Patternicity. The story of Lexi Hansen, an eighteen-year-old Brigham Young Unviersity student who on February 26, 2014 was hit by a car while longboarding to class and nearly died. Sometimes in life, the odds are stacked against you. But, when you believe in miracles you know that all things are possible. Follow along Tiffany's journey, a Black-necked Swan, as she overcomes the unthinkable - from before her birth to her transformation into a mature, beautiful Swan. Tiffany, the Miracle Swan, is a charming story about defying the odds and true testament of faith, hope, and survival. Additionally, readers will experience educational moments with factual excerpts about the majestic breed of Black-necked Swans.ABOUT THE AUTHERLouise S. Odom, Th.D was a captive breeder of Black-necked Swans, owning six pair and raising many babies in captivity. She retired from waterfowl breeding in 2017. She resides in Ft. Pierce, Florida with her husband, John, where they own and operate Odom Orchids, Inc., the leading orchid retailer in the United States. They also breed and raise German, champion blood-line Rottweilers. The inspirational story of John O'Leary's miraculous and triumphant fight to survive from burns on 98% of his body. Having spent several years in and out of hospitals for a life-threatening illness, pragmatic 16-year-old Cam is relocated by her miracle-seeking mother to a town in Maine known for its mystical healing qualities, a place Cam dismisses until she witnesses unusual phenomena and befriends a boy who encourages her to achieve various milestones before she dies. A first novel. Giving birth to a child is one of the greatest gifts a family can have, "the gift of life." A Miracle Named David is a book filled with tears and laughter, as this compassionate grandmother shares her heart and testimony concerning her special grandchildren. She shares the births, health problems and triumphs. This book celebrates the way her faith helped her to deal with the health challenges that beset the newborns. She informs the readers of the ins and outs of neonatal intensive care, better known as NICU. A Miracle Named David is a heart-warming true story of the unanticipated journey during the mother's pregnancy and premature delivery of her newborn. During the pregnancy she was given the odds that her baby had a one percent chance of survival and everything looked hopeless in the beginning, but the story did not end there. Dorothy also shares how NICU would be revisited in the next few years by three other grandbabies. Anyone reading this book will release doubt and know that miracles really do happen. The experience gives us a fresh awareness of Gods presence and his healing power. It was through unity in prayer by family, friends and strangers that changed the circumstances in the lives of all four newborns. Miracles do happen and this book is truly the story of "A Miracle Named David". Christianity Today 2013 Book Award Winner Winner of The Foundation for Pentecostal Scholarship's 2012 Award of Excellence 2011 Book of the Year, Christianbook.com's Academic Blog Most modern prejudice against biblical miracle reports depends on David Hume's argument that uniform human experience precluded miracles. Yet current research shows that human experience is far from uniform. In fact, hundreds of millions of people today claim to have experienced miracles. New Testament scholar Craig Keener argues that it is time to rethink Hume's argument in light of the contemporary evidence available to us. This wide-ranging and meticulously researched two-volume study presents the most thorough current defense of the credibility of the miracle reports in the Gospels and Acts. Drawing on claims from a range of global cultures and taking a multidisciplinary approach to the topic, Keener suggests that many miracle accounts throughout history and from contemporary times are best explained as genuine divine acts, lending credence to the biblical miracle reports. In The Improbability Principle, the renowned statistician David J. Hand argues that extraordinarily rare events are anything but. In fact, they're commonplace. Not only that, we should all expect to experience a miracle roughly once every month. But Hand is no believer in superstitions, prophecies, or the paranormal. His definition of "miracle" is thoroughly rational. No mystical or supernatural explanation is necessary to understand why someone is lucky enough to win the lottery twice, or is destined to be hit by lightning three times and still survive. All we need, Hand argues, is a firm grounding in a powerful set of laws: the laws of inevitability, of truly large numbers, of selection, of the probability lever, and of near enough. Together, these constitute Hand's groundbreaking Improbability Principle. And together, they explain why we should not be so surprised to bump into a friend in a foreign country, or to come across the same unfamiliar word four times in one day. Hand wrestles with seemingly less explicable questions as well: what the Bible and Shakespeare have in common, why financial crashes are par for the course, and why lightning does strike the same place (and the same person) twice. Along the way, he teaches us how to use the Improbability Principle in our own lives—including how to cash in at a casino and how to recognize when a medicine is truly effective. An irresistible adventure into the laws behind "chance" moments and a trusty guide for understanding the world and universe we live in, The Improbability Principle will transform how you think about serendipity and luck, whether it's in the world of business and finance or you're merely sitting in your backyard, tossing a ball into the air and wondering where it will land. Against All Odds A Triumphant Story of Redemption and HopeNo one is immune to difficulties in life, but what do you do when your world is turned upside down and hope seems to vanish? Against All Odds is the true story of an ordinary woman facing extraordinary challenges and her journey through despair to surrender, forgiveness, and healing. Laid off from work and diagnosed with breast cancer, Susan Abar doesn't think life could get much worse, but it does. Following a bilateral mastectomy, doctors discover a fast growing mass on her pancreas. As Susan faces certain death, she discovers the beauty of her feminine heart hidden and hurting beneath the scars of her past. Journey with her as an amazing story unfolds, revealing God's compassion and mercy through a heart's longing, a miracle of healing and the lessons of two pennies, a rainbow and a woman named Mercy. Against All Odds is a triumphant story of redemption and hope rising from the ashes of a woman's broken heart and wounded spirit. New York Times bestselling author Lee Strobel trains his investigative sights on the hot-button question: is it really credible to believe God intervenes supernaturally in people's lives today? This provocative book starts with an unlikely interview in which America's foremost skeptic builds a seemingly persuasive case against the miraculous. But then Strobel travels the country to quiz scholars to see whether they can offer solid answers to atheist objections. Along the way, he encounters astounding accounts of healings and other phenomena that simply cannot be explained away by naturalistic causes. The book features the results of exclusive new scientific polling that shows miracle accounts are much more common than people think. What's more, Strobel delves into the most controversial question of all: what about miracles that don't happen? If God can intervene in the world, why doesn't he do it more often to relieve suffering? Many American Christians are embarrassed by the supernatural, not wanting to look odd or extreme to their neighbors. Yet, The Case for Miracles shows not only that the miraculous is possible, but that God still does intervene in our world in awe-inspiring ways. Here's a unique book that examines all sides of this issue and comes away with a passionate defense for God's divine action in lives today. Also available: The Case for Miracles Spanish edition, kids' edition, and student edition. MY UNEXPECTED JOURNEY [Beating the Odds to Become a Walking Miracle] By Pastor G. Lee McClanathan Every person deals with "unexpected journeys". They are never welcome, they just show up. Such journeys can include the following issues: health, finances, relationships, employment, retirement, grief, church. Pastor Lee's unexpected journey was a health issue (stroke, heart attack, seizures, auto-immune disorder). He was not expected to live, but did. It meant loss of career, and the beginning of a "new normal". In the process he developed a winning strategy. He says he had to make some choices... "Would I GIVE UP or GROW UP? ; Be BITTER or BETTER?; Choose to be a WHINER or a WINNER?" He believes that if he and most of the Bible characters we meet in God's Word can beat the odds... then we can do it too. Lee desires to be a "difference-maker", believing "God isn't finished with him yet". Friend, just as God has a unique purpose and plan for Lee, He has a plan and purpose for you! So with eyes wide open... trust God for your "unexpected journeys". When you're down and out for the ten count, He can

RAISE YOU UP, because our God is an AWESOME GOD! You too can find victory even while walking in the valley of the shadow of death. Heartwarming and Heart-Opening Stories Gathered from Decades of Medical Practice Bernie Siegel first wrote about miracles when he was a practicing surgeon and founded Exceptional Cancer Patients, a groundbreaking synthesis of group, individual, dream, and art therapy that provided patients with a "carefrontation." Compiled during his more than thirty years of practice, speaking, and teaching, the stories in these pages are riveting, warm, and belief expanding. Their subjects include a girl whose baby brother helped her overcome anorexia, a woman whose cancer helped her heal by teaching her to stand up for herself, and a family that was saved from a burning house by bats. Without diminishing the reality of pain and hardship, the stories show real people turning crisis into blessing by responding to adversity in ways that empower and heal. They demonstrate what we are capable of and show us that we can achieve miracles as we confront life's difficulties. An unborn baby with a fatal heart defect . . . a skier submerged for an hour in a frozen Norwegian lake . . . a comatose brain surgery patient whom doctors have declared a "vegetable." Twenty years ago all of them would have been given up for dead, with no realistic hope for survival. But today, thanks to incredible new medical advances, each of these individuals is alive and well . . .

**Cheating Death.** In this riveting book, Dr. Sanjay Gupta-neurosurgeon, chief medical correspondent for CNN, and bestselling author-chronicles the almost unbelievable science that has made these seemingly miraculous recoveries possible. A bold new breed of doctors has achieved amazing rescues by refusing to accept that any life is irretrievably lost. Extended cardiac arrest, "brain death," not breathing for over an hour-all these conditions used to be considered inevitably fatal, but they no longer are. Today, revolutionary advances are blurring the traditional line between life and death in fascinating ways. Drawing on real-life stories and using his unprecedented access to the latest medical research, Dr. Gupta dramatically presents exciting accounts of how pioneering physicians and researchers are altering our understanding of how the human body functions when it comes to survival-and why more and more patients who once would have died are now alive. From experiments with therapeutic hypothermia to save comatose stroke or heart attack victims to lifesaving operations in utero to the study of animal hibernation to help wounded soldiers on far-off battlefields, these remarkable case histories transform and enrich all our assumptions about the true nature of death and life. In October 1972, Nando Parrado and his rugby club teammates were on a flight from Uruguay to Chile when their plane crashed into a mountain. Miraculously, many of the passengers survived but Nando's mother and sister died and he was unconscious for three days. Stranded more than 11,000 feet up in the wilderness of the Andes, the survivors soon heard that the search for them had been called off - and realise the only food for miles around was the bodies of their dead friends ... In a last desperate bid for safety, Nando and a teammate set off in search of help. They climbed 17,000-foot-high mountains, facing death at every step, but inspired by his love for his family Nando drove them on until, finally, 72 days after the crash, they found rescue. You are about to read a story that sounds incredible, but it happened just this way. The record is recorded at MD Anderson, Houston, Texas and can be checked. No matter what tomorrow should bring, a miracle has happened, which cannot be denied.

**Survival of Melanoma in stage four by the help of MD Anderson and the Grace of God.** The courage of a man, father, pastor and home builder fighting the enemy of one of the most serious cancers known to man. I walk of faith and trust in the ability of the great tumor and cancer research hospital in Houston Texas. He survive when the medical experts said he didn't have a chance of living for six months. These predictions would be proven wrong but a hard fight of medicine and faith would pursue to a glorious story of triumph. While sitting up in bed, I felt a pounding headache. It was like a drum beating from afar and progressively getting nearer until I blacked out. I did not know what happened next. Later, I heard a fellow patient--who became my neighbor after David left--started shouting out, "Nurse! Nurse!" Author Keith Tucker tells his amazing story of the Lord's miraculous victories in his life after a devastating accident that changed the course of his life as a young man in his early twenties. Keith's vivid life journey demonstrates that the Lord never leaves or forsakes us in the darkest times of our lives and encourages God's people to remain faithful and prayerful in any dark seasons. Against All Odds tells the story of Joe Tarasuk's journey that included time in a mental hospital, being a major East Coast drug dealer, and involvement in a cult trying to revolutionize the world through music. After his arrest in Georgia in 1986, Joe was sentenced to thirty-five years in prison, but the Lord had other plans and he was released after just eighteen months. Despite many challenges after his release, the Lord placed a mission in Joe's heart to reach out to men and women like himself who were caught in devastating cycles of addiction and shame. Today Joe and his wife, Maria, are working to open a residential recovery program called CrossRoads Freedom Center located in rural Ijamsville, Maryland.

**David Hume's argument against believing in miracles has attracted nearly continuous attention from philosophers and theologians since it was first published in 1748.** Hume's many commentators, however, both pro and con, have often misunderstood key aspects of Hume's account of evidential probability and as a result have misrepresented Hume's argument and conclusions regarding miracles in fundamental ways. This book argues that Hume's account of probability descends from a long and laudable tradition that goes back to ancient Roman and medieval law. That account is entirely and deliberately non-mathematical. As a result, any analysis of Hume's argument in terms of the mathematical theory of probability is doomed to failure. Recovering the knowledge of this ancient tradition of probable reasoning leads us to a correct interpretation of Hume's argument against miracles, enables a more accurate understanding of many other episodes in the history of science and of philosophy, and may be also useful in contemporary attempts to weigh evidence in epistemically complex situations where confirmation theory and mathematical probability theory have proven to be less helpful than we would have hoped. "You mean sixty-one seconds. You said sixty-one minutes, but you mean a little over one minute." "No," I said. "He didn't have a pulse for over an hour." After a healthy pregnancy, on September 16, 2010, Bonnie L. Engstrom delivered a stillborn baby boy. After sixty-one minutes, just when the doctors were going to call a time of death, James Fulton's heart began to beat. In that sixty-one minutes, the Engstrom's been asking for and counting on the powerful intercession of James's namesake: Archbishop Fulton J. Sheen. That James was alive at all was a miracle. But the rest of the story is even more amazing. While the Engstroms were preparing for their little boy to grow up blind, unable to walk or talk, and be fed by a tube for the rest of his life, another miracle occurred. Against all medical odds, James not only survived, but he began — and continues — to thrive. In 2014, medical experts and theological advisors to the Congregation for the Causes of Saints unanimously approved the miracle. This amazing true story, full of weakness and strength, heartbreak and celebration, hope and joy, teaches us that through our faith in Christ and the prayers of the great cloud of witnesses, miracles are possible. "Believe the incredible, and you can do the impossible." – Venerable Archbishop Fulton J. Sheen

This updated edition by one of the world's leading apologists presents a systematic, positive case for Christianity that reflects the latest work in the contemporary hard sciences and humanities. Brilliant and accessible. The Miracle Book by Morris Cerullo will reveal how God wants you to live in a rhythm of miracles. Dr. Cerullo will take you behind the scenes to share with you the stories of miracles he has experienced and will guide you to receiving your miracles. Chapter titles include " You Were Made for Miracles! Your Life Can Be Filled with Miracles! Take Your Eyes Off Your Circumstances! See Your Problems as Miracle Opportunities! Every Promise of God Contains the Seed for Your Miracle!

In a city mired in endless decay, where the youth suffer through all the horrors of urban blight, hope comes in a most unassuming form: a tiny brick schoolhouse run by two Felician nuns where a singular basketball genius takes teenagers from the mean streets of Jersey City and turns them into champions on the hardcourt. Coach Bob Hurley had been working miracles at St. Anthony High School for over thirty years, winning state and national championships and offering his players rescue from their surroundings through college scholarships, when he met his most dysfunctional team yet. In The Miracle of St. Anthony Adrian Wojnarowski follows Hurley through a gripping and heartrending season as he struggles to lead a troubled team to glory through his unparalleled understanding of the game and his ceaseless determination to see no more children lost to these streets. In The Miracle of St. Anthony, acclaimed sports journalist Adrian Wojnarowski follows Hurley through a gripping and heartrending season, as he struggles to lead a troubled team to glory through his unparalleled understanding of the game and his ceaseless determination to see no more children lost to the city streets. Chronicles the emergence of modern sainthood, analyzing how the Catholic Church legitimized miracles during the Counter-Reformation in southern Europe. We saved hundreds of at-risk and challenged teens with the establishment of Nelson Mandela Alternative High School. We were given free reign by Dr. William Pratella and the Board of Education to be as creative and as innovative as possible. Our school operated totally different from other schools in the district. We believed that all children "could learn and would learn". Our mission was to "save one child at a time by any means possible. Failure was not an option" At Mandela, we created a world of success. Everybody had to be successful. Students thought and believed in themselves. They felt good about Nelson Mandela and their future. Success in school and after high school was their main goal. I feel bad because we lost too many young brothers to crime, drugs, gangs and violence. None of these young brothers had to go the way they did. If their fathers had been in their lives they would have chosen a different path. I continue to reach out to fathers to encourage them to reconnect with their sons and daughters. Fathers can make the difference in saving their son's and daughter's lives. I was an at-risk and challenged young brother. I was a thirteen-year-old country boy from rural Mississippi who was illiterate when my family and I had arrived in Washington, D.C., in 1950. I lost all my grammar and elementary school education in Mississippi because I never attended with any consistency. But God was on my side. Faith and prayer made the difference. I hope to inspire other young brothers to turn their lives around as I did. My saving grace was a praying mother. She kept us in church and away from the wrong people. We were in church seven days a week. I was blessed to have made significant accomplishments in higher education, including my Doctorate, Master and Bachelor's degrees. I served as a Head Coach and Human Rights Commissioner. I also developed the first college degree program for prison inmates. If you have received an incurable cancer diagnosis, hearing about someone "who made it" is like spotting a rescue ship when you're drowning in a stormy sea. Miracle Survivors provides that lifeline with a collection of stories of cancer survivors who were given a terminal diagnosis but shocked everyone by thriving years past their prognoses. These "miracle survivors" have different cancers and circumstances, but share a poor prognosis and incredible drive to overcome it. After being diagnosed with stage IV breast cancer, award-winning author and blogger Tami Boehmer decided she and others like her desperately needed hope to override the dismal statistics and death sentences provided by many doctors. So she began interviewing incredible men and women from around the country who defied the odds and lived to tell about it. Miracle Survivors will help answer the question: What sets people apart who beat the odds of a terminal or incurable prognosis? Overcoming the odds wasn't something that just happened to those who share their stories. Each person took a very active role in overcoming their challenges, whether it was activating their faith or transforming their lifestyle. Rather than passively accepting their circumstances, they decided to transform them. The book is essential reading for anyone with cancer, their loved ones, and everyone else who wants inspiration to conquer their life challenges. Do you... - know anyone facing, or has faced, major surgery, illness, disease, or other life-changing personal/financial situation? Does that person need hope, inspiration, spiritual grace, and the sheer will to keep going? - know people who want or need to lose

weight quickly yet permanently, with minimal exercise? The author of this book, Scott Pribyl, survived an internal injury that is 90-95 percent fatal. In this book, he describes his seven-year rehabilitation and comeback. Pribyl also describes how he lost fifty pounds in less than two months!
