This congress volume of the Minerva Center for the Relations between Israel and Aram in Biblical Times combines theoretical approaches to historical research on autonomy or independence in ancient cultures and then presents articles which study the subject using Aram and Israel in antiquity as examples. These articles show clearly how strongly Syria and Palestine were linked to one another and how they constituted one single cultural region which was connected by its economy, politics, language, religion, and culture. Drawing on new research in government, public and private archives, Jeffrey Herf exposes the political realities that underpinned support for and opposition to Zionist aspirations in Palestine. In an unprecedented international account, he explores the role of the United States, the Arab States, the Palestine Arabs, the Zionists, and key European governments from Britain and France to the Soviet Union, Czechoslovakia and Poland. His findings reveal a spectrum of support and opposition that stood in sharp contrast to the political coordinates that emerged during the Cold War, shedding new light on how and why the state of Israel was established in 1948 and challenging conventional associations of left and right, imperialism and anti-imperialism, and racism and anti-racism. Captioned maps covering modern Arab-Israeli hostilities, indicating national strengths and policies, military movements and engagements, and changes in Middle East borders. This book presents a comprehensive historical account of sociology in Israel the first history of sociology in Israel, from its beginnings in late 19th-century to the early 21st-century. It locates the ruptures and reorientations of the sociological text within its shifting historical context. Israeli sociology is shown to have evolved in tandem with the development of the Israeli-Jewish nation in Palestine, and later of the state of Israel. Offering a critical overview of the origins and the development of the discipline, it argues that this can be divided into the following phases: Predecessors (1882-1948), Founders (1948-1977), Disciples (1967-1977), Critics and More Critics (1977-1987), Intermediators (1977-2018), Post-Modernists (1993-2018) and Post-Colonialists (1993-2018). This book contributes a fascinating national case study to the history of sociology and will appeal further to students and scholars of social theory and Israel Studies. This book describes and analyses various aspects of Israeli climate. This work also elucidates how both man and nature adjust to various climates. The first part (Chapters 1-9) deals with the meteorological and climatological network stations, the history of climate research in Israel, analysis of the local climate by season, and a discussion of the climate variables their spatial and temporal distribution. The second part (Chapters 10-14) of this work is devoted to a survey of applied climatology. This part presents information on weather forecasting, rainfall enhancement, air quality monitoring, and various climatological aspects of planning. There is no sharp division between theoretical and applied climatology topics. Moreover, though various sections seem exclusively theoretical, they also include important applications for various real life situations (such as rainfall intensities (Section 5.3), frost, frost damage (Section 6.2.4), degree-days (Section 6.2.5) and heat stress (Section 6.2.6). Professionals and university students of geography and earth science, meteorology and climatology, even high school students majoring in geography will be able to use this book as a basic reference work. Researchers in atmospheric science can also use this work as an important source of reference. Students of agriculture will also gain theoretical and practical insights. Even architects and engineers will gain another perspective in their fields. Society, Schools and Progress in Israel is a comprehensive account of the role of education as a driver of social change and progress in Israel. Educational concepts, institutions, and practices in Israel are discussed, along with its society, polity, and economy. Legislation and the politics of education in the country are also explored. This book is comprised of seven chapters and begins with a historical and institutional background on Israel's educational system, including social stratification, government and politics, and economic development. The following chapters describe administration, the school system, family influences, and background social forces. Pre-school education, primary education, schools for working youth, post-primary and secondary education, academic secondary education, and vocational and agricultural education are described, together with higher education and the teachers. The final chapter examines some major problems in Israeli education, including those relating to equality, minority groups, and the identity of Arabs and Jews. This monograph is intended for students of sociology, government, politics, and education. Essays on the challenges of anthropological work in a complicated country: "A compelling anthology." —Ruth Behar Israel is a place of paradoxes, a small country with a diverse population and complicated social terrain. Studying its culture and social life means confronting a multitude of ethical dilemmas and methodological challenges. These first-person accounts by anthropologists engage contradictions of religion, politics, identity, kinship, racialization, and globalization to reveal fascinating and often vexing dimensions of the Israeli experience. Caught up in pressing existential questions of war and peace, social justice, and national boundaries, the contributors explore the contours of Israeli society as insiders and outsiders, natives and strangers, as well as critics and friends. Further, many of the most important names in late twentieth century biblical historiography appear as authors of various contributions: Hayes, Brettler, Van Seters, Miller, and de Vaux. In a work of more than 600 pages, Long finds room for thirty-two different writers. In addition to his concluding chapter, he also introduces each section and reprints an important essay of his own on history and literary technique. Every reader, including those already conversant with the subject, will gain much from reading this book. However, some will also recognize gaps or areas that they wished had been highlighted. Despite the word, 'Recent,' one wonders why no samples of the writings of Wellhausen, and especially of Alt, Noth, and Albright are included. Although most of the essays date from the 1990's, Hans Walter Wolff's contribution comes from a 1963 volume. Written by distinguished experts in the field, this book shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community-Based Participatory Research (CBPR) approach to increase knowledge and improve health and well-being of the communities involved. CBPR is a collaborative approach to research that draws on the full range of research designs, including case study, etiologic, longitudinal, experimental, and nonexperimental designs. CBPR data collection and analysis methods involve both quantitative and qualitative approaches. What distinguishes CBPR from other approaches to research is the active engagement of all partners in the process. This book provides a comprehensive and thorough presentation of CBPR study designs, specific data collection and analysis methods, and innovative partnership structures and process methods. This book informs students, practitioners, researchers, and community members about methods and applications needed to conduct CBPR in the widest range of research areas—including social determinants of health, health disparities, health promotion, community interventions, disease management, health services, and environmental health. In the twentieth century, all developed nations began to undergo unprecedented demographic changes, as their birth rates declined, and life expectancies increased significantly --an average of thirty years in less than a century. These developments have caused major transformations in the composition of populations in these countries, especially in terms of the proportions of the various age groups. While the age groups of children and adolescents have decreased, those of elderly persons aged 65 and over, have increased. Consistent with the situation in other developed nations, the absolute number and percentage of elderly persons in the Israeli population is increasing, while the percentage

of younger persons is decreasing. Israel, however, differs from other developed countries in the pace of this demographic change, the composition of its population, and the ways it can address needs related to aging. The demographic figures in Israel indicate that not only is the proportion of elderly persons in the total population growing, but that the old population itself is rapidly aging as well. This volume exemplifies how social science research can promote knowledge about and understanding of needs and opportunities for adaptation, and assist in evaluating the outcomes of policies and services on the personal, community and national levels, as well as suggest required changes. The variety of topics covered in this volume on age-related research, policies and practice reflects a wide range of research by Israeli scholars on social aspects of aging. Their research offers a glimpse into the knowledge base that has been built over the years on the aging process in Israel, the population of elderly people, and the national policies and network of services for the aged. Other developed countries with aging populations have much to learn from the Israeli experience. The Handbook of Research on Reading Comprehension assembles researchers of reading comprehension, literacy, educational psychology, psychology, and neuroscience to document the most recent research on the topic. It summarizes the current body of research on theory, methods, instruction, and assessment, including coverage of landmark studies. Designed to deepen understanding of how past research can be applied and has influenced the present and to stimulate new thinking about reading comprehension, the volume is organized around seven themes: historical perspectives on reading comprehension theoretical perspectives changing views of text elements of reading comprehension assessing and teaching reading comprehension cultural impact on reading comprehension where to from here? This is an essential reference volume for the international community of reading researchers, reading psychologists, graduate students, and professionals working in the area of reading and literacy. *Yiddish in Israel: A History* challenges the commonly held view that Yiddish was suppressed or even banned by Israeli authorities for ideological reasons, offering instead a radical new interpretation of the interaction between Yiddish and Israeli Hebrew cultures. Author Rachel Rojanski tells the compelling and yet unknown story of how Yiddish, the most widely used Jewish language in the pre-Holocaust world, fared in Zionist Israel, the land of Hebrew. Following Yiddish in Israel from the proclamation of the State until today, Rojanski reveals that although Israeli leadership made promoting Hebrew a high priority, it did not have a definite policy on Yiddish. The language's varying fortune through the years was shaped by social and political developments, and the cultural atmosphere in Israel. Public perception of the language and its culture, the rise of identity politics, and political and financial interests all played a part. Using a wide range of archival sources, newspapers, and Yiddish literature, Rojanski follows the Israeli Yiddish scene through the history of the Yiddish press, Yiddish theater, early Israeli Yiddish literature, and high Yiddish culture. With compassion, she explores the tensions during Israel's early years between Yiddish writers and activists and Israel's leaders, most of whom were themselves Eastern European Jews balancing their love of Yiddish with their desire to promote Hebrew. Finally Rojanski follows Yiddish into the 21st century, telling the story of the revived interest in Yiddish among Israeli-born children of Holocaust survivors as they return to the language of their parents. Ethics and integrity in research are increasingly important for social scientists around the world. We are tackling more complex problems in the face of expanding and not always sympathetic regulation. This book surveys the recent developments and debates around researching ethically and with integrity and complying with ethical requirements. The new edition pushes beyond the work of the first edition through updated and extended coverage of issues relating to international, indigenous, interdisciplinary and internet research. Through case studies and examples drawn from all continents and from across the social science disciplines, the book: demonstrates the practical value of thinking seriously and systematically about ethical conduct in social science research identifies how and why current regulatory regimes have emerged reveals those practices that have contributed to the adversarial relationships between researchers and regulators encourages all parties to develop shared solutions to ethical and regulatory problems. This thoroughly revised and updated second edition of *Methods for Community-Based Participatory Research for Health* provides a step-by-step approach to the application of participatory approaches to quantitative and qualitative data collection and data analysis. With contributions from a distinguished panel of experts, this important volume shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community-Based Participatory Research (CBPR) approach to increase knowledge and improve the health and well-being of the communities involved. Written for students, practitioners, researchers, and community members, the book provides a comprehensive presentation of innovative partnership structures and processes, and covers the broad spectrum of methods needed to conduct CBPR in the wide range of research areas—including social determinants of health, health inequities, health promotion, community interventions, disease management, health services, and environmental health. The contributors examine effective methods used within the context of a CBPR approach including survey questionnaire, in-depth interview, focus group interview, ethnography, exposure assessment, and geographic information system mapping. In addition, each chapter describes a case study of the application of the method using a CBPR approach. The book also contains examples of concrete tools and measurement instruments that may be adapted by others involved in CBPR efforts. 2019 marks the 50th anniversary of Singapore and Israel's long and fruitful relationship. From Jewish contributions to the economic, political and social development of early and modern-day Singapore, to current-day collaborations between both countries in the fields of science and technology, the Lion City and the Start-up Nation have forged strong and indelible bonds. Written by eminent Singaporeans and Israelis, the articles in this volume trace the growth and development of Singapore-Israel bilateral ties over the past five decades and celebrate the mutually beneficial relationship between the two countries. **Related Link(s)** Over the past forty years, media education research has emerged as a historical, epistemological and practical field of study. Shifts in the field—along with radical transformations in media technologies, aesthetic forms, ownership models, and audience participation practices—have driven the application of new concepts and theories across a range of both school and non-school settings. The *Handbook on Media Education Research* is a unique exploration of the complex set of practices, theories, and tools of media research. Featuring contributions from a diverse range of internationally-recognized experts and practitioners, this timely volume discusses recent developments in the field in the context of related scholarship, public policy, formal and non-formal teaching and learning, and DIY and community practice. Offering a truly global perspective, the Handbook focuses on empirical work from Media and Information Literacy (MIL) practitioners from around the world. The book's five parts explore global youth cultures and the media, trans-media learning, media literacy and scientific controversies, varying national approaches to media research, media education policies, and much more. A ground breaking resource on the concepts and theories of media research, this important book: Provides a diversity of views and experiences relevant to media literacy education research Features contributions from experts from a wide-range of countries including South Africa, Finland, India, Italy, Brazil, and many more Examines the history and future of media education in various international contexts Discusses the development and current state of media literacy education institutions and policies Addresses important contemporary issues such as social media use; datafication; digital privacy, rights, and divides; and global cultural practices. The *Handbook of Media Education Research* is an invaluable guide for researchers in the field, undergraduate and graduate students in media studies, policy makers, and MIL practitioners. This is a developmental study of men in mandatory military service based on in-depth interviews of young soldiers who had recently completed their service in Israel. The book deals with the central issues of transition to adulthood and the psychological effects of military service in the context of the previous research and theory concerning these subjects. According to common perception, the Federal Republic of Germany supported the formation of the Israeli state for moral reasons—to atone for its Nazi past—but did not play a significant role in the Arab-Israeli conflict. However, the historical record does not sustain this narrative. Daniel Marwecki's pathbreaking analysis deconstructs the myths surrounding the odd alliance between Israel and post-war democratic Germany. Thorough archival research shows how German policymakers often had disingenuous, cynical or even partly antisemitic motivations, seeking to whitewash their Nazi past by supporting the new Israeli state. This is the true context of West Germany's crucial backing of Israel in the 1950s and '60s. German economic and military support greatly contributed to Israel's early consolidation and eventual regional hegemony. This initial alliance has affected Germany's role in the Israeli-Palestinian conflict to the present day. Marwecki reassesses German foreign policymaking and identity-shaping, and raises difficult questions about German responsibility after the Holocaust, exploring the many ways in which the genocide of European Jews and the dispossession of the Palestinians have become tragically intertwined in the Middle East's international politics. This long overdue investigation sheds new light on a major episode in the history of the modern Middle East. Introduces students to ethical theory and philosophy. This work provides practical guidance on what ethical theory means for research practice; and, offers case studies to give real examples of ethics in research action. Illustrations. The debate over history, history-writing, and the scientific study of history is reaching an apex in the late twentieth century and shows no signs of abating in the near future. The literature on the topic is

prodigious. The time is thus ripe for an anthology of essays of the sort that Professor Long has collected, essays that trace the history of the issues that have fed into the debate. The classic and contemporary essays presented here provide an overview and introduction to the topic, bringing together the most essential of these in a handy compilation. The book is organized in six sections: (1) The State of Old Testament Historiography (2) Ancient Near Eastern Historiography (3) Ancient Israelite Historiography (4) Method in the Study of Ancient Israelite Historiography (5) The Historical Impulse in the Old Testament (6) The Future of Israel's Past Long's goal is to provide a context for Israelite history-writing within the milieu of the ancient Near East, expose the methodologies and assumptions of various approaches and perspectives on historiography, and provide access to essays that examine the contribution of the Hebrew Scriptures themselves to the origins of history-writing. The final essay, by Long, points the way to future research and topics that will move the discussion forward into the next millennium. Professor V. Philips Long teaches Old Testament at Covenant Theological Seminary, St. Louis. The Case for Israel is an ardent defense of Israel's rights, supported by indisputable evidence. Presents a passionate look at what Israel's accusers and detractors are saying about this war-torn country. Dershowitz accuses those who attack Israel of international bigotry and backs up his argument with hard facts. Widely respected as a civil libertarian, legal educator, and defense attorney extraordinaire, Alan Dershowitz has also been a passionate though not uncritical supporter of Israel. When European powers carved political borders across the Middle East following World War I, a curious event in the international drug trade occurred: Palestine became the most important hashish waystation in the region and a thriving market for consumption. British and French colonial authorities utterly failed to control the illicit trade, raising questions about the legitimacy of their mandatory regimes. The creation of the Israeli state, too, had little effect to curb illicit trade. By the 1960s, drug trade had become a major point of contention in the Arab-Israeli conflict, and drug use widespread. Intoxicating Zion is the first book to tell the story of hashish in Mandatory Palestine and Israel. Trafficking, use, and regulation; race, gender, and class; colonialism and nation-building all weave together in Haggai Ram's social history of the drug from the 1920s to the aftermath of the 1967 War. The hashish trade encompassed smugglers, international gangs, residents, law enforcers, and political actors, and Ram traces these flows through the interconnected realms of cross-border politics, economics, and culture. Hashish use was and is a marker of belonging and difference, and its history offers readers a unique glimpse into how the modern Middle East was made. Social work studies examining the mental health issues faced by Arab-Palestinian service users, their families, and their communities in Israel. Minorities face particular social strains, and these are often manifested in their overall mental health. In Israel, just under a quarter of the citizens are Arab Palestinians, yet very little has been published exploring the spectrum of mental health issues prevalent in this population. The work collected here draws on the first-hand experience of experts working with Israeli Palestinians to highlight the problems faced by service users, their families, and their communities. Palestinians in Israel face unique social, gender, and family-related conditions that also need reliable research and assessment. Mental Health and Palestinian Citizens in Israel offers research and observation on three central topics: socio-cultural determinants of mental health, mental health needs, and mental health service utilization. From suicidal behaviors and addiction to generational trauma and the particular concerns of children and the elderly, this broad and careful collection of research opens new dialogues on treatment, prevention, and methods for providing the best possible care to those in need. This book is the result of a joint research effort led by the U.S. National Academy of Sciences and involving the Royal Scientific Society of Jordan, the Israel Academy of Sciences and Humanities, and the Palestine Health Council. It discusses opportunities for enhancement of water supplies and avoidance of overexploitation of water resources in the Middle East. Based on the concept that ecosystem goods and services are essential to maintaining water quality and quantity, the book emphasizes conservation, improved use of current technologies, and water management approaches that are compatible with environmental quality. A radical reappraisal of two key figures in the history of the Israeli Right, this is the first book to explore in depth the development of military Zionism, and gives important insights into the political status of Israel today. Why did Israel shift from a state based on pioneering egalitarianism and 'making the desert bloom' to one which is chiefly known for its military prowess? "The Triumph of Military Zionism" examines Israel's shift to the right at the hands of Menachem Begin, the supposed 'disciple' of Vladimir Jabotinsky. Shindler's book uses original research to challenge the conventional wisdom that Begin was the natural heir to Jabotinsky. He demonstrates through hitherto unpublished sources how Israel drifted away from Jabotinsky's ideas towards a maximalist Zionism because Begin's very selective interpretation of his mentor's words did not reflect Jabotinsky's intentions. This invaluable addition to the study of Israel's political history will appeal to both Middle Eastern and military historians. In 2000, a group of Israeli and Palestinian teachers gathered to address what to many people seemed an unbridgeable gulf between the two societies. Struck by how different the standard Israeli and Palestinian textbook histories of the same events were from one another, they began to explore how to "disarm" the teaching of the history of the Middle East in Israeli and Palestinian classrooms. The result is a riveting "dual narrative" of Israeli and Palestinian history. Side by Side comprises the history of two peoples, in separate narratives set literally side-by-side, so that readers can track each against the other, noting both where they differ as well as where they correspond. The unique and fascinating presentation has been translated into English and is now available to American audiences for the first time. An eye-opening--and inspiring--new approach to thinking about one of the world's most deeply entrenched conflicts, Side by Side is a breakthrough book that will spark a new public discussion about the bridge to peace in the Middle East. The thesis that the books of Deuteronomy to 2 Kings have undergone a redaction that made them into a 'Deuteronomistic History' has become since Martin Noth (1943) a widely accepted idea in Old Testament scholarship. But there is no consensus when this history was edited: under Josiah (622 BCE), during the exile (c. 560 BCE) or even later? And what was the intention of its redactors? Can we rely on the so-called Deuteronomistic History for the reconstruction of Israelite history? Or should we give up the thesis of a Deuteronomic redaction of the Former Prophets? This volume explores these and many other questions about this key topic in Old Testament scholarship. It results from a research seminar organized by the Swiss universities of Fribourg, Geneva, Neuchâtel and Lausanne. It contains contributions by the following scholars: R. Albertz, J. Briand, M. Detienne, W. Dietrich, J.J. Glassner, S. Japhet, E.A. Knauf, A.D.H. Mayes, S.L. McKenzie, S. Pisano, M. Rose, A. Schenker, F. Smyth, A. de Pury and T. Römer. Articles in French were translated by J. Edward Crowley McNutt has created the first sociological history of ancient Israel - from the very beginning to the end of the Persian period. She presents a balanced view of contemporary research into the nature and development of ancient Israelite society. She uses social-scientific methods to examine recent reconstructions of the social and cultural contexts that nurtured the literature of the Hebrew Bible. By investigating the intricate social processes that sustained that ancient society, McNutt enables the reader to discern the forces at work during key periods of transition in early Israelite history. Required reading for anyone interested in the world of biblical antiquity. From its beginning as an independent state, Israel has been beset by the divisions and tensions that characterize most ethnically mixed societies. This extensively detailed analysis accounts for status attainment in Israeli society by investigating the process of stratification. It documents what happened to Arabs as well as Jewish immigrants and their children by tracing not only the socioeconomic locations, but also the proximate social determinants of the locations of significant ethnic, cultural, gender, and religious groups. Many of the research findings in this timely study have significant implications for social policy in Israel and elsewhere. This volume adopts a context-informed framework exploring risk, maltreatment, well-being and protection of children in diverse groups in Israel. It incorporates the findings of seven case studies conducted at the Hebrew University of Jerusalem's NEVET Greenhouse of Context-Informed Research and Training for Children in Need. Each case study applies a context-informed approach to the study of perspectives of risk and protection among parents, children and professionals from different communities in Israel, utilizing varied qualitative methodologies. The volume analyses the importance of studying children and parents's perspectives in diverse societies and stresses the need for a context-informed perspective in designing prevention and intervention programs for children at risk and their families living in diverse societies. It further explores potential contribution to theory, research, practice, policy and training in the area of child maltreatment.
