By examining the history of the Potts-Johnsons (an immigrant Saro (emigrant Krio people) family from Sierra Leone) living in the Port Harcourt region of Nigeria from roughly 1912-1984, this study reviews the migration history of the Saro in the Niger River delta. The work also touches on many important issues to consider when researching African history: intra-African migration, status of and dominance by elites (both indigenous and immigrant), women's roles in social relationships, and the preservation of family and cultural values under extreme socio-economic stress. Mac Dixon-Fyle is an Associate Professor of History at DePauw University in Greencastle, Indiana. This textbook is targeted to undergraduate students in chemical engineering, chemical technology, and biochemical engineering for courses in mass transfer, separation processes, transport processes, and unit operations. The principles of mass transfer, both diffusional and convective have been comprehensively discussed. The application of these principles to separation processes is explained. The more common separation processes used in the chemical industries are individually described in separate chapters. The book also provides a good understanding of the construction, the operating principles, and the selection criteria of separation equipment. Recent developments in equipment have been included as far as possible. The procedure of equipment design and sizing has been illustrated by simple examples. An overview of different applications and aspects of membrane separation has also been provided. 'Humidification and water cooling', necessary in every process industry, is also described. Finally, elementary principles of 'unsteady state diffusion' and mass transfer accompanied by a chemical reaction are covered. SALIENT FEATURES : • A balanced coverage of theoretical principles and applications. • Important recent developments in mass transfer equipment and practice are included. • A large number of solved problems of varying levels of complexities showing the applications of the theory are included. • Many end-chapter exercises. • Chapter-wise multiple choice questions. • An Instructors manual for the teachers. This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets Construction, installation and servicing of lead-acid and nickel-cadmium batteries. NEW YORK TIMES BESTSELLER • A modern American epic set against the panorama of contemporary politics and culture—a hurtling, page-turning mystery that is equal parts *The Great Gatsby* and *The Bonfire of the Vanities* ONE OF THE BEST BOOKS OF THE YEAR: NPR, PBS, Harper's Bazaar, Esquire, Financial Times, The Times of India On the day of Barack Obama's inauguration, an enigmatic billionaire from foreign shores takes up residence in the architectural jewel of "the Gardens," a cloistered community in New York's Greenwich Village. The neighborhood is a bubble within a bubble, and the residents are immediately intrigued by the eccentric newcomer and his family. Along with his improbable name, untraceable accent, and unmistakable whiff of danger, Nero Golden has brought along his three adult sons: agoraphobic, alcoholic Petya, a brilliant recluse with a tortured mind; Apu, the flamboyant artist, sexually and spiritually omnivorous, famous on twenty blocks; and D, at twenty-two the baby of the family, harboring an explosive secret even from himself. There is no mother, no wife; at least not until Vasilisa, a sleek Russian expat, snags the septuagenarian Nero, becoming the queen to his king—a queen in want of an heir. Our guide to the Golden's world is their neighbor René, an ambitious young filmmaker. Researching a movie about the Golden's, he ingratiates himself into their household. Seduced by their mystique, he is inevitably implicated in their quarrels, their infidelities, and, indeed, their crimes. Meanwhile, like a bad joke, a certain comic-book villain embarks upon a crass presidential run that turns New York upside-down. Set against the strange and exuberant backdrop of current American culture and politics, *The Golden House* also marks Salman Rushdie's triumphant and exciting return to realism. The result is a modern epic of love and terrorism, loss and reinvention—a powerful, timely story told with the daring and panache that make Salman Rushdie a force of light in our dark new age. In the spring of 1645, at the height of the English Civil War, a minor gentleman from Essex named Matthew Hopkins initiated the most savage witch-hunt in English history. By the autumn of 1647 at least 250 East Anglian innocents - most of them women - had been captured, interrogated and hauled before the courts. More than a hundred were convicted, condemned and hanged. Their alleged crimes ranged from destroying property and inflicting fatal illnesses, to feeding animal familiars with blood and having sexual intercourse with the devil. Accompanied by John Stearne, a godly neighbour from his parish, the twenty-two-year-old Hopkins toured the eastern counties on horseback, meticulously extracting evidence of satanic pacts and dispatching suspects for trial. Hopkins fashioned himself into the 'Witch Finder General' although the torture techniques used had no justification in religion or law, nor was his campaign officially sanctioned. The witch-hunt was an extraordinary event, and would long be remembered as the poisonous fruit of religious extremism, grown wild in a political vacuum, never to be repeated. *Witchfinders* tells the true and terrible story of Matthew Hopkins and his horrifying crusade as witch-hunting fever gripped the country. Malcolm Gaskill uses his great

story-telling talents to bring mid-seventeenth century alive. With 26 films to his credit and numerous international prizes, Satyajit Ray is India's most recognized filmmaker. Nyce examines each of Ray's films in close detail and provides a cinematic examination of his unique style. Nyce explores Ray's career chronologically to best chart his stylistic development as a filmmaker. Each chapter considers one film and how it expressed the particular quality of rhythm and mood which characterizes his work. Narrative synopses are first presented, and the opinions of his critics are continually noted and discussed. Colonial Latin America: A Documentary History is a sourcebook of primary texts and images intended for students and teachers as well as for scholars and general readers. The book centers upon people-people from different parts of the world who came together to form societies by chance and by design in the years after 1492. This text is designed to encourage a detailed exploration of the cultural development of colonial Latin America through a wide variety of documents and visual materials, most of which have been translated and presented originally for this collection. Colonial Latin America: A Documentary History is a revision of SR Books' popular Colonial Spanish America. The new edition welcomes a third co-editor and, most significantly, embraces Portuguese and Brazilian materials. Other fundamental changes include new documents from Spanish South America, the addition of some key color images, plus six reference maps, and a decision to concentrate entirely upon primary sources. The book is meant to enrich, not repeat, the work of existing texts on this period, and its use of primary sources to focus upon people makes it stand out from other books that have concentrated on the political and economic aspects. The book's illustrations and documents are accompanied by introductions which provide context and invite discussion. These sources feature social changes, puzzling developments, and the experience of living in Spanish and Portuguese American colonial societies. Religion and society are the integral themes of Colonial Latin America. Religion becomes the nexus for much of what has been treated as political, social, economic, and cultural history during this period. Society is just as inclusive, allowing students to meet a variety of individuals-not faceless social groups. While some familiar names and voices are included-conquerors, chroniclers, sculptors, and preachers-other, far less familiar points of view complement and complicate the better-known narratives of this history. In treating Iberia and America, before as well as after their meeting, apparent contradictions emerge as opportunities for understanding; different perspectives become prompts for wider discussion. Other themes include exploration and contact; religious and cultural change; slavery and society, miscegenation, and the formation, consolidation, reform, and collapse of colonial institutions of government and the Church, as well as accompanying changes in economies and labor. This sourcebook allows students and teachers to consider the thoughts and actions of a wide range of people who were making choices and decisions, pursuing ideals, misperceiving each other, experiencing disenchantment, absorbing new pressures, breaking rules as well as following them, and employing strategies of survival which might involve both reconciliation and opposition. Colonial Latin America: A Documentary History has been assembled with teaching and class discussion in mind. The book will be an excellent tool for Latin American history survey courses and for seminars on the colonial period. SC-SPCOLL (copy 1): From the James and Margaret Beveridge Fonds. "There's nothing semi about Finn Murphy's trucking tales of The Long Haul."—Sloane Crosley, Vanity Fair More than thirty years ago, Finn Murphy dropped out of college to become a long-haul trucker. In The Long Haul, Murphy recounts with wit, candor, and charm the America he has seen change over the decades and the poignant, funny, and often haunting stories of the people he encounters on the job. Suranjan Ganguly's book examines in depth six of Ray's major films focusing on issues such as human subjectivity, the importance of education, the emancipation of women, the rise of the new middle class, and the crisis of identity in post-Independence India. A portrayal of noted Indian film maker Satyajit Ray's life and achievements from a perspective that takes into account his family background and the many disparate influences on him, from orthodox Hinduism and Tagore to Hollywood movies and classical music.
