Although many talk of 'joined up thinking', few offer practical guidance on how to achieve this in organizations. The Fractal Organization sets down the practical implications of a well tested systemic approach to building organizations that are capable of surviving and flourishing in these turbulent times. "An excellent read...Many organizations fail at the mercy of their own ignorance. The author has done an excellent job in making 'the science of effective organization' accessible to management, providing them with a new knowledge to deal with the uncertainties that the markets place upon them." Stephen J. Brewis, Business Architect, British Telecom "...one of the most interesting, thorough and rigorous guides to management that I have ever read, ... introduces new insights in every chapter... carries a credibility which acts as a counterbalance to the sometimes difficult message which he conveys which is that a lot of mainstream management practice is at best ineffective and at worst downright destructive. I would recommend this book to anyone interested in management or systems thinking." Penny Marrington, Course Chair, Systems Group, Open University "In my opinion this book manages to present sound academic theory that is relevant and helpful to the practitioner in the business. I experienced several A-HA moments." Pauline Marsh, Strategy Director, CS&S International, BAE SYSTEMS "The insights of the Viable System Model have been open only to a select few for much too long. Hoverstadt has gone furthest in bringing these ideas to a wider audience...Management books have too often been serious but not practical, or practical but not serious. This book is both brilliantly serious and practical, and often entertaining too." Professor Peter Kawalak, Manchester Business School "Integrates mainstream management ideas with the systems ideas underpinning the VSM, and flows and reads well. As a starting point for developing understanding of the VSM in today's world this book improves greatly on all books that have gone before, I would certainly recommend it to colleagues, clients, and students." Dr. Robin Asby, Course Chair, Communication and Systems, Open University This title is part of UC Press's Voices Revived program, which commemorates

NEW YORK TIMES BESTSELLER *They met over their dogs*. Gail Caldwell and Caroline Knapp (author of *Drinking: A Love Story*) became best friends, talking about everything from their love of books and their shared history of a struggle with alcohol to their relationships with men. Walking the woods of New England and rowing on the Charles River, these two private, self-reliant women created an attachment more profound than either of them could ever have foreseen. Then, several years into this remarkable connection, Knapp was diagnosed with cancer. With her signature exquisite prose, Caldwell mines the deepest levels of devotion, and courage in this gorgeous memoir about treasuring a best friend, and coming of age in midlife. *Let's Take the Long Way Home* is a celebration of the profound transformations that come from intimate connection—and it affirms, once again, why Gail Caldwell is recognized as one of our bravest and most honest literary voices.
