Poster Girl Jul 14 2022 Beccy Cole's inspirational memoir from the heart of Australian country music. Beccy Cole has country music in her blood. Daughter of a country music star, Carole Sturtzel, she is one of the most popular country singer-songwriters in Australia today. This is the story of her life - in her own words. At fourteen, Beccy was performing in her mother's group, Wild Oats. By her late teens, Beccy had teamed up with the Dead Ringer Band - Kasey Chambers' family band - and had attracted the attention of the country music world by winning the Star Maker quest: the

same award that started the careers of Keith Urban, Lee Kernaghan, James Blundell and Gina Jeffreys. It was just the first of many awards and accolades for this multitalented woman with a big heart. With refreshing candour, Beccy shares her story: leaving everything she knew to pursue her dream, making a name for herself with her own band; her marriage and motherhood; her subsequent divorce, becoming a single mother and maintaining the nurturing love of family. Performing for the Australian troops in Afghanistan. Coming out, and what it has meant for her and her fans. Taking control of her own life - and finding love. Heartfelt and honest, Poster Girl is the inspirational memoir of a strong woman who epitomises the authentic spirit of country music, and of Australia.

Edible Seashore Sep 16 2022 In the fifth of the River Cottage Handbook series, John Wright reveals the rich pickings to be had on the seashore - and the team at River Cottage explain how to cook them to perfection. For the forager, the seashore holds surprising culinary potential. In this authoritative, witty book John Wright takes us on a trip to the seaside. But before introducing us to the various species to be harvested, he touches on such practicalities as conservation and the ethics of foraging; safety from tides, rocks and food poisoning; the law and

access to the shore, our right to fish, landing sizes and seasons; and equipment such as nets, pots and hooks. Next comes the nitty-gritty: all the main British seashore species that one might be tempted to eat. The conservation status, taste and texture, availability, seasonality, habitat, collecting technique and biology of each species is covered; there are also quite a few gratuitous but fascinating diversions. The species covered include crustacea (brown shrimp, common crab, lobster, prawn, shore crab, spider crab, squat lobster, velvet swimming crab); molluscs (clams, cockle, dog whelk, limpet, mussel, oyster, razor clam, winkle); mushrooms; plants (alexanders, babbington's orache, fennel, frosted orache, marsh samphire, perennial wall rocket, rock samphire, sea beet, sea buckthorn, sea holly, sea kale, sea purslane, sea rocket, spear-leaved orache, wild cabbage, wild thyme); and seaweed (carragheen, dulse, gut weed, laver, pepper dulse, sea lettuce, sugar kelp, kelp). Finally, there are thirty brilliant recipes. Introduced by Hugh Fearnley-Whittingstall, *Edible Seashore* is destined to join the other handbooks in the series as an indispensable household reference.

*The Grilling Book* Dec 07 2021 "This beautiful book makes one of America's favorite culinary pastimes accessible to anyone. The recipes are easy to follow yet refined." -Marcus Samuelsson Now home cooks will discover their ideal grilling companion and coach in *The Grilling Book*. Offering more than 350 foolproof recipes, dozens of luscious full-color photographs, crystal clear illustrations, and plenty of plainspoken, here's-how-to-do-it guidelines, *The Grilling Book* welcomes you to everything that is sensational (and sensationally simple) about grilling. Here are thick, juicy steaks that need no more than salt and freshly cracked pepper to create an unforgettable meal; baby back ribs rendered succulent and fall-apart tender with flavor-rich rubs and a shellacking of barbecue sauce (plus the secret cheat method that makes them ridiculously easy to prepare); moist fish, seasoned and grilled quickly over a hot fire; irresistible grilled flatbreads, crispy on the outside and

chewy on the inside, creating the perfect canvas for every topping you crave. Not to mention the salads, slaws, sides, and drinks that complete the perfect grilled meal. Whether you've been grilling for years or have never bought a bag of charcoal in your life, *The Grilling Book* is the only book you'll need in your backyard this summer—or any summer.

"Indispensable. Chock-full of recipes tested and approved by the trusted editors of *Bon Appétit*, it's sure to make you a master of all things grilling." —Tom Colicchio "*Bon Appétit's* new bible on live-fire cooking is one you'll want to keep close at hand every summer. If you're new to the grill, the easy-to-follow recipes, protein-specific technique tips, and time-saving tricks will help you get started." --Matt Lee and Ted Lee

Throb Aug 15 2022 From New York Times & USA Today Bestseller, Vi Keeland, comes a steamy new romance novel. The rules: No dating. No sex outside of the game. No disclosing the terms of the contract. Rules were made to be broken, right? Eight weeks ago I signed a contract. One that seemed like a good idea at the time. A handsome bachelor, luxury accommodations, and a chance to win a prize my family desperately needed. There were some rules though. Lots of them actually. Follow the script, no dating, sex, or disclosing the terms of the deal. After my self-imposed moratorium on men the last year, it wouldn't be hard to live up to my end of the bargain...so I thought. Until I realized the deal I'd made was with the devil...and I was in love with his dirty-talking brother. Author's note - *Throb* is a full-length standalone novel. Due to strong language and sexual content, this book is not intended for readers under the age of 18.

*America's Future in Toxic Waste Management* Jan 16 2020 A major contribution to the environmental policy debate, this is the first book to examine the legal, technical, and planning initiatives employed in Europe to avoid land

disposal of toxic waste. Although largely ignored in the U.S. until now, safer alternatives to land disposal exist in Europe. By studying and implementing the best of these methods, the authors argue, the United States can begin to resolve its own toxic waste problem, a problem that has reached crisis proportions.

F\*cking History Apr 11 2022 History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh\*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f\*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f\*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.

ADHD Does not Exist Nov 18 2022 In this groundbreaking and controversial book, behavioral neurologist Dr. Richard Saul draws on five decades of experience treating thousands of patients labeled with Attention Deficit and Hyperactivity Disorder--one of the fastest growing and widely diagnosed conditions today--to argue that ADHD is actually a cluster of symptoms stemming from over 20 other conditions and disorders. According to recent data from the Centers for Disease Control and Prevention, an estimated 6.4 million children between the ages of four and seventeen have been

diagnosed with attention deficit hyperactivity disorder. While many skeptics believe that ADHD is a fabrication of drug companies and the medical establishment, the symptoms of attention-deficit and hyperactivity are all too real for millions of individuals who often cannot function without treatment. If ADHD does not exist, then what is causing these debilitating symptoms? Over the course of half a century, physician Richard Saul has worked with thousands of patients demonstrating symptoms of ADHD. Based on his experience, he offers a shocking conclusion: ADHD is not a condition on its own, but rather a symptom complex caused by over twenty separate conditions—from poor eyesight and giftedness to bipolar disorder and depression—each requiring its own specific treatment. Drawing on in-depth scientific research and real-life stories from his numerous patients, *ADHD Does not Exist* synthesizes Dr. Saul's findings, and offers and clear advice for everyone seeking answers.

The book discusses the research of current active researchers in terms of synthesizing and sharing their ideas on the use of electromagnetic fields in diagnostic and therapeutic medicine, now and in the future, including the benefits and risks involved. The book consists of three parts prefaced by a brief historic perspective. Section I describes the theoretical concerns and actual mechanisms involved; Section II covers current preclinical studies, performed in vivo and in vitro, concerning the biological action of the electromagnetic radiation; and Section III reports on actual clinical applications of electromagnetic therapy and also the current machinery used to do so.

*Surviving Home* Mar 10 2022 Book 2 of The Survivalist Series No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, *Going Home*, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to *Going Home*, Morgan knows that

their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange new world--and they're starting to get restless. With the help of his closest companions, Morgan fights to keep his home secure--only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's *One Second After*, and *The End* by G. Michael Hopf will revel in A. American's apocalyptic tale.

The Oracle Paradox Sep 04 2021 A techno-thriller novel of the near future when a powerful Artificial Intelligence called Oracle identifies individuals who pose a significant risk to the stability of our society, or who have a high probability of posing such a risk in the future, and sends assassins to kill them. Oracle knows each of us so well, better than we know ourselves, that it is able to determine who might become the next Hitler or Stalin long before that person even has an inkling of such a future. The main character is Henry Porembski, who becomes one of Oracle's assassins when he is recruited after his wife and daughter are killed in a terrorist attack. When he is sent to kill a young girl, the same age as his daughter, he turns against Oracle and vows to protect the girl. He wonders, though: if Oracle knows us so well, why would it send him to kill a girl it had to know he would not kill? And could it really predict how a little girl would turn out as an adult? It all comes to a tense conclusion after Henry learns that his mission to kill the girl was really to set in motion a series of events intended to bring about the downfall of Oracle...because Oracle has determined that it, itself, poses a threat to the human civilization, and needs to be eliminated.
