How do James Bond's X-ray glasses work, the ones he uses to see whether the lady at the roulette table has a pistol concealed in her underwear? Is it really possible to launch oneself into the air and catch up with a plane that is free-falling towards the earth? Or to shoot down a helicopter with a pistol? In this lively and informative book, Germany's boldest physics professor Metin Tolan analyses the stunts and gadgets of the 007 films and even answers the question of all questions: Why does Bond drink his vodka martini shaken, not stirred? Auszug: Aston Martin ist ein britischer Sportwagenhersteller. Das Unternehmen wurde 1913 von Lionel Martin und Robert Bamford als Bamford & Martin Ltd. gegründet und 1914 in Aston Martin umbenannt. 1915 wurde der erste Aston Martin gebaut. Die Marke erhob den Anspruch, Rennwagen für die Straße zu bauen und beteiligte sich daher intensiv am Autorennsport. Bis zum Zweiten Weltkrieg entstanden nur wenige Hundert Aston Martins. Im Jahr 1947 übernahm der britische Unternehmer David Brown das Unternehmen Aston Martin. Seine Initialen DB finden sich auch heute noch in den Modellbezeichnungen. Obwohl seine Ära von Rennsporthochpunkten und einer erfolgreichen Modellpolitik begleitet war, musste Brown das Unternehmen 1972 wegen finanzieller Probleme verkaufen. 1987 übernahm Ford zunächst 75 % der Aston-Martin-Anteile und 1994 den Rest. Da bis heute überwiegend in Handarbeit gefertigt wird, stellte das Unternehmen bis zu seinem neunzigjährigen Bestehen nur rund 16.000 Autos her. Berühmt wurde die Sportwagenmarke aus Newport Pagnell vor allem durch die James-Bond-Filme. Das erste Mal fuhr der Geheimagent ihrer Majestät in Goldfinger mit einem Aston Martin, dem DB5. Years is a fitting celebration of one of the world's most enduring sports cars. The fast, beautiful sports cars that Aston Martin built under Brown's ownership won the Le Mans 24-hour race and the World Sports Car Championship, and provided James Bond with his most famous transport: the ejector-seat equipped DB5 that won acclaim in Goldfinger. Though the DB era ended when Brown sold the company in 1972, its influence continued to be felt. Development of Aston Martin's V8 engine began in 1963 as a replacement for the six cylinder engines which had powered every model of Aston Martin since the 1950 DB2. In 1966 design work began on a new GT model and both car and engine were to be unleashed on the public in October 1967. With barely twelve months to complete the car, Aston Martin pulled it off, and the DBS was born. Unfortunately, the new V8 engine wouldn't be ready for another two years and the DBS had to make do with the old-fashioned Lagonda engine. Being heavier than the car it replaced, it was slower but in many ways more refined. When the V8 engine was finally ready for the DBS chassis, the resulting car was one of the fastest, safest and greatest cars of its generation. It would set the benchmark, not just for the next thirty years of Aston Martins, but also its competitors in the GT class. The last of the 5,016 V8-powered cars, a Volante Special Edition, left the factory on 20 October 2000, ending an era for Aston Martin.
