Throughout history, the Balkans have been a crossroads, a zone of endless military, cultural and economic mixing and clashing between Europe and Asia, Christianity and Islam, Catholicism and Orthodoxy. Subject to violent shifts of borders, rulers and belief systems at the hands of the world's great empires--from the Byzantine to the Habsburg and Ottoman--the Balkans are often called Europe's tinderbox and a seething cauldron of ethnic and religious resentments. Much has been made of the Balkans' deeply rooted enmities. The recent destruction of the former Yugoslavia was widely ascribed to millennial hatreds frozen by the Cold War and unleashed with the fall of communism. In this brilliant account, acclaimed historian Mark Mazower argues that such a view is a dangerously unbalanced fantasy. A landmark reassessment, *The Balkans* rescues the region's history from the various ideological camps that have held it hostage for their own ends, not least the need to justify nonintervention. The heart of the book deals with events from the emergence of the nation-state onward. With searing eloquence, Mazower demonstrates that of all the gifts bequeathed to the region by modernity, the most dubious has been the ideological weapon of romantic nationalism that has been used again and again by the power hungry as an acid to dissolve the bonds of centuries of peaceful coexistence. *The Balkans* is a magnificent depiction of a vitally important region, its history and its prospects. The prophets exhort us to defend the poor; but we lionize the rich. They assure us that chariots and missiles cannot save us; yet we seek refuge under their cold shadow. They urge us to forgo idolatry; but we compulsively fetishize the work of our hands. Above all, the prophetic Word warns us that the way to liberation in a world locked down by the spiral of violence, the way to redemption in a world of enslaving addictions, the way to genuine transformation in a world of deadened conscience and numbing conformity, is the way of nonviolent, sacrificial, creative love. But neither polite religion nor society is remotely interested in this--which is why Jesus had to translate and midwife the prophetic insights for his companions in their historical moment. Dan has done the same for us in ours. As this reading of Exodus attests, he has a keen eye for both text and context, and exegetes both with his life. Thus does he help us shed our denial, connect the dots, and move from our pews to the streets. --from the

A satiric view of intellectual life in the '20s and is populated with characters based on such celebrities of the time as D.H. Lawrence, Katherine Mansfield, Sir Oswald Mosley, Nancy Cunard, and John Middleton Murray, as well as Huxley himself. For the past four decades, third-generation Montana farmer David Oien has been seeding a revolution against corporate agribusiness in the belly of the beast, the American grain belt. They have replaced their wheat and barley with a seemingly odd new crop, the lentil, a legume that has been part of the human diet since Neolithic times, but, until Oien's work, was never grown on Montana farms. In this eye-opening narrative, journalist and food scientist Liz Carlisle chronicles Oien's unlikely emergence as the leader of this agricultural upheaval. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

4GW (Fourth Generation Warfare) is the only kind of war America has ever lost. And we have done so three times – in Vietnam, Lebanon, and Somalia. This form of warfare has also defeated the French in Vietnam and Algeria, and the USSR in Afghanistan...As the only Goliath left in the world, we should be worried that the world's Davids have found a sling and stone that work." – Chapter 1, The Sling and the Stone: On War in the 21st Century. The War in Iraq. The War on Terror. These types of "asymmetrical" warfare are the conflicts of the 21st century – and show how difficult it is for the world's remaining superpower to battle insurgents and terrorists who will fight unconventionally in the face of superior military power. This change in military conflict may seem sudden. Shinichi Suzuki has been described as a humanitarian as well as an educator and musician. While a young man, he observed that children absorbed their spoken language based on their environment. This led him to adapt his teaching of music to the same method, that which is called the Mother Tongue Approach. Through listening to the sound of music, very young children soon imitate the tones they hear. Suzuki believes that talent is not inherited, but is a product of environment, and that every child can perform music just as he has learned to speak, if

the proper teaching approach is used. Revised in 1995, *The Man and His Philosophy* contains many new photos, some of them depicting the many "firsts" in the Suzuki world, such as Dr. Suzuki with his first students, plus much more. This is a complete history of the Suzuki movement, in words and pictures, from its beginnings to the present day. Sure, you can import and mix a track in Pro Tools. A COMPANION TO THE HISTORY OF THE BOOK

A COMPANION TO THE HISTORY OF THE BOOK Edited by Simon Eliot and Jonathan Rose "As a stimulating overview of the multidimensional present state of the field, the Companion has no peer." Choice "If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended. " Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. When a parent dies, most adults are seized by an unexpected crisis that can trigger a profound transformation. Using in-depth interviews and national surveys, Dr Umberson explains why the death of a parent has strong effects on adults and looks at protective factors that help

some individuals experience better mental health following the death than they did when the parent was alive. This is the first book to rely on sound scientific method to document the significant adverse effects of parental death for adults in a national population. Exploring the social and psychological risk factors that make some people more vulnerable than others, readers will come to view the loss of a parent in a new way: as a turning point in adult development. This is what it's like to be a high-school-age girl. To forsake the boyfriend you once adored. To meet the love of your life, who just happens to be your teacher. To discover for the first time the power of your body and mind. This is what it's like to be a college-age woman. To live through heartbreak. To suffer the consequences of your choices. To depend on others for survival but to have no one to trust but yourself. This is *Anthropology of an American Girl*. A literary sensation, this extraordinarily candid novel about the experience of growing up female in America will strike a nerve in readers of all ages. **BONUS:** This edition contains an *Anthropology of an American Girl* discussion guide. This book explores the ordinary turns of phrase by which major nineteenth-century British writers created character. **NEW YORK TIMES BESTSELLER** From Mayor Michael Bloomberg and former head of the Sierra Club Carl Pope comes a manifesto on how the benefits of taking action on climate change are concrete, immediate, and immense. They explore climate change solutions that will make the world healthier and more prosperous, aiming to begin a new type of conversation on the issue that will spur bolder action by cities, businesses, and citizens—and even, someday, by Washington. "Climate of Hope is an inspiring must read." —Former Vice President Al Gore, Chairman of The Climate Reality Project "Climate change threatens to reshape the future of our world's population centers. Bloomberg and Pope have been leaders on fortifying our cities against this threat, and their book proves that victory is possible—and imperative." —Leonardo DiCaprio "If Trump is looking for a blueprint, he could not do better than to read a smart new book, *Climate of Hope*." —Thomas Friedman in *The New York Times* ~ The 2016 election left many people who are concerned about the environment fearful that progress on climate change would come screeching to a halt. But not Michael Bloomberg and Carl Pope. Bloomberg, an entrepreneur and former mayor of New York City, and Pope, a lifelong environmental leader, approach climate change from different perspectives, yet they arrive at similar conclusions. Without agreeing on every point, they share a belief that cities, businesses, and citizens can lead—and win—the battle against climate change, no matter which way the political winds in Washington may shift. In *Climate of Hope*, Bloomberg and Pope offer an optimistic look at the challenge of climate change, the solutions they believe hold the greatest promise, and the practical steps that are necessary to achieve them. Writing from their own experiences, and sharing their own stories from government, business, and advocacy, Bloomberg and Pope provide a road map for tackling the most complicated challenge the world has ever faced. Along the way, they turn the usual way of thinking about climate change on its head: from top down to bottom up, from partisan to pragmatic, from costs to benefits, from tomorrow to today, and from fear to hope. Menyandang disabilitas tidaklah mudah. Percayalah, saya tahu. Saya telah menderita tuna rungu sejak berusia empat tahun. Tumbuh dalam keadaan sangat tuli berdampak pada pendidikan, gaya hidup, dan akhirnya pekerjaan saya. Secara tidak langsung, hal itu mempengaruhi orang tua saya, adik saya, guru saya, teman-teman saya, dan atasan saya.
