CK-LOG System Conversion (User's Manual and User Interface). Jan 20 2023 The CK-LOG code written in TOPS-20 ELISP has been converted to Common LISP, and is running on the LMI Lambda. This required both across-the-board syntactic changes in functions as well as entire rewriting of functions. There was no need to change any domain data, as the domain was rebuilt from scratch in Common LISP. A user interface/display for Oplan-Consultant was created. It uses both CK-LOG routines and LMI windowing facilities. There are two categories of information that can be displayed: the lattice of time events and the lattice of class information. Time events are markers in the CK-LOG domain (database of information, or world state) which indicate that some change has occurred at a particular time. The change could be an addition to the domain, a deletion, or a change in a pre-existing condition. CK-LOG is unique in that it associates a time with these changes, thereby allowing for logical reasoning about the feasibility of assertions made to the domain. The time lattice displays event numbers, representing events in time, in a bottom-up tree.

"Soldaten der Arbeit" Oct 13 2019 »Soldaten der Arbeit« ist die erste Gesamtdarstellung des nationalsozialistischen Arbeitsdienstes für Männer, den zwischen 1933 und 1945 über drei Millionen Deutsche durchliefen. Das Buch stellt zudem in einem asymmetrischen Vergleich die NS-Organisation dem zeitgleich eingerichteten Arbeitsdienst der USA, dem Civilian Conservation Corps, gegenüber. In beiden Institutionen spiegeln sich die Antworten der deutschen Diktatur und der amerikanischen Demokratie auf die Weltwirtschaftskrise der Dreißiger Jahre in besonderem Maße wider. Die methodisch innovative Arbeit analysiert auch wechselseitige Wahrnehmungen und Transfers wie die Übernahme einiger Elemente der nationalsozialistischen Sozialpolitik durch die amerikanische Administration. Das Buch wurde von der Landeskonferenz der Rektoren und Präsidenten der Berliner Hochschulen mit dem Tiburtius-Anerkennungspreis 2003 und von der Auschwitz-Stiftung Brüssel mit dem »Prix de la Fondation Auschwitz« ausgezeichnet.

Achievement Motivation Inventory Apr 18 2020 Area of Application: Personnel Selection, Potential Analysis, Professional Counseling, Personnel Development, Profiling, Psychology of Sports, Personality Research. General Aspects: The Achievement Motivation Inventory (AMI) is a personality inventory designed to measure a broad construct of work related achievement motivation. It is founded on the theoretical work related to the German «Leistungsmotivationsinventar (LMI)» (Schuler & Prochaska, 2001) and enables users to test candidates for 17 different facets of achievement motivation. The theoretical conception of this test is based upon all common conceptualizations of the construct but for the first time integrates relevant social motives into a test measuring the construct of achievement motivation as well. Thus, in addition to traditional scales, e.g. Confidence in Success or Persistence, scales like Dominance or Status Orientation are integrated in the AMI. The AMI consists of 170 items to be responded by examinees on a 7-point-Likert format. Reliability: Reliability (Cronbach`s alpha) for the total score is $\alpha = .96$ and ranges from $\alpha = .66$ to $\alpha = .83$ for single scales. Retest reliability is $r_{tt} = .94$ for the total score and ranges from $r_{tt} = .71$ to $r_{tt} = .89$ for single scales.

Mehrdimensionale Studienerfolgsprognose Jan 08 2022 Erfolgreiche Hochschulabsolventen sind in Deutschland gegenwärtig und zukünftig eine wichtige Quelle gesellschaftlichen und volkswirtschaftlichen Erfolgs. Die Frage, was einen erfolgreichen Studenten oder Absolventen auszeichnet,

ist im Rahmen von Bildungsentscheidungen wie zum Beispiel dem Hochschulzugang von Interesse und beinhaltet zwei unterschiedliche Aspekte: Zum einen ist zu fragen, über welche Merkmale, Eigenschaften, Einstellungen und Fähigkeiten ein erfolgreicher Hochschulabsolvent im Gegensatz zu einem weniger erfolgreichen verfügt während und vor dem Studium. Zum anderen kann die Frage auch dahingehend gestellt werden, worin sich der Erfolg eines Absolventen manifestiert, wie also der Studienerfolg definiert ist. Die vorliegende Arbeit widmet sich der empirischen Bearbeitung beider Fragen. Nach der Zusammenstellung des derzeitigen Wissensstands zur Studienerfolgsvorhersage werden in einer umfangreichen Langsschnittstudie die Zusammenhänge zwischen verschiedenen Personenmerkmalen der Studierenden und mehreren Kriterien des Studienerfolgs errechnet. Dabei wird der Interkorrelationen der Prädiktorvariablen Sorge getragen, indem multivariate Analyseverfahren zum Einsatz kommen. So kann die inkrementelle Validität bei gleichzeitigem Einsatz mehrerer Prädiktoren für jedes Erfolgskriterium berechnet werden.
