Open Access in Theory and Practice Mar 20 2020 Open Access in Theory and Practice investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

The Practice of Ally Work Dec 17 2019 Jeffrey Raff has written about the ally (which has been called many different names in different traditions) in his books Jung and the Alchemical

Imagination, Healing the Wounded God, and The Wedding of Sophia. Here, he shares with readers the techniques he has developed and taught in his workshops and lectures for achieving intimate contact with the divine. The ally is a divine being, a face of God, that is unique to every being. It appears in the imaginal realm to partner with a specific person/ but it has to wait for its human partner to seek it. The person has to learn how to enter the imaginal realm to meet and relate with the ally, and to that effect, Raff has designed a progressive series of exercises. Starting with imagination-building practices, he takes you through learning how to identify your ally, learning its name, and obtaining guidance from it. Intermediate and advanced exercises teach you how to deepen your relationship with the ally and bring it into everyday life. A relationship with your ally is a two-way street in that your attention to its existence in the imaginal realm makes it manifest in the material world, while the ally helps you achieve self-realization and gnosis in the literal sense of the word.

Science and the Practice of Medicine in the Nineteenth Century Jan 10 2022 Prior to the nineteenth century, the practice of medicine in the Western world was as much art as science. But, argues W. F. Bynum, 'modern' medicine as practiced today is built upon foundations that were firmly established between 1800 and the beginning of World War I. He demonstrates this in terms of concepts, institutions, and professional structures that evolved during this crucial period, applying both a more traditional intellectual approach to the subject and the newer social perspectives developed by recent historians of science and medicine. In a wide-ranging survey, Bynum examines the parallel development of biomedical sciences such as physiology, pathology, bacteriology, and immunology, and of clinical practice and preventive medicine in nineteenth-century Europe and North America. Focusing on medicine in the hospitals, the

community, and the laboratory, Bynum contends that the impact of science was more striking on the public face of medicine and the diagnostic skills of doctors than it was on their actual therapeutic capacities.

Burns and Grove's The Practice of Nursing Research - E-Book Jan 18 2020 Winner of the 1st-place American Journal of Nursing Book of the Year award in nursing research/evidence-based practice for 2021! Burns & Grove's The Practice of Nursing Research: Appraisal, Synthesis, and Generation of Evidence, 9th Edition is the trusted resource for those wanting to master the research methods that are foundational to evidence-based practice. This highly respected textbook covers how to appraise and apply existing research evidence, as well as how to participate in research and quality improvement projects. This new 9th edition has been extensively updated to reflect today's focus on online research in the digital era and includes clear, step-by-step guidelines for all major quantitative and qualitative research approaches — including supporting examples from the latest high-quality literature. There's also new content on

translational research, coverage of the most current research tools and techniques, and an increased use of illustrations, tables, and other visuals to help engage visually oriented readers of all levels.

Coverage of quantitative, qualitative, and other research methodologies provides a solid foundation to conduct, appraise, and apply research evidence to the realities of today's clinical practice. Balanced coverage of qualitative and quantitative methods addresses the qualitative research methodologies that are often the starting point of research projects, particularly in magnet hospitals and DNP programs. Clear, comprehensive coverage is organized into five units that include: an introduction to nursing research; coverage of the research process; application for evidence-based health care; how to analyze data, determine outcomes, and disseminate research; and how to propose and seek funding for research. Strong emphasis on evidence-based practice addresses this key graduate-level QSEN competency and reinforces how to generate research evidence and appraise and synthesize existing research for application to clinical practice. Rich examples from nursing literature bring research principles to life. Emphasis on the most currently used research methodologies focuses on the methods used in both quantitative research and qualitative research, as well as outcomes research and mixed-methods research. Coverage of digital data collection examines the use of online research tools. Quick-reference summaries include a table of research methods inside the front cover and a list of types of research syntheses (with definitions) inside the back cover. Helpful user resources are included with each new text purchase on the companion Evolve website and feature 400 interactive review questions along with a library of 10 full-text research articles.

How Doctors Think Mar 12 2022 "Although physicians make use of science, this book argues that medicine is not itself a science, but

rather an interpretive practice that relies heavily on clinical reasoning." "In *How Doctors Think*, Kathryn Montgomery contends that assuming medicine is strictly a science can have adverse effects. She suggests these can be significantly reduced by recognizing the vital role of clinical judgment."--BOOK JACKET.

Women's Voices and the Practice of Preaching Jun 15 2022

Expert, practical help for women who preach or lead worship Many women preachers and worship leaders have trouble speaking; they struggle to fully use their physical voices. Maintaining that there is often a disconnect between the woman's self-understanding as a preacher and her own body, Nancy Lammers Gross presents not only techniques but also a theologically empowering paradigm shift to help women fully embody their God-given preaching vocations. Grounding her work in the biblical story of Miriam, Gross begins with a discussion of how women are instrumental in the work of God. She then tells stories, including her own, of women's experiences in losing connection to their bodies and their physical voices. Finally, Gross presents a constructive resolution with exercises for discovering and developing a full-body voice.

Empathy and the Practice of Medicine Dec 21 2022 The book - which includes essays by physicians, philosophers, and a nurse - is divided into three parts: one deals with how empathy is weakened or lost during the course of medical education and suggests how to remedy this; another describes the historical and philosophical origins of empathy and provides arguments for and against it; and a third section offers compelling accounts of how physicians' empathy for their patients has affected their own lives and the lives of those in their care. We hear, for example, from a physician working in a hospice who relates the ways that the staff try to listen and respond to the needs of the dying; a scientist who interviews candidates for medical school and tells how qualities of empathy are undervalued by selection committees; a nurse who considers what nursing can teach physicians about empathy; another physician who ponders whether the desire to be empathic can hinder the detachment necessary for objective care; and several contributors who show how literature and art can help physicians to develop empathy.

Outline of a Theory of Practice Jun 03 2021 Outline of a Theory of Practice is recognized as a major theoretical text on the foundations of anthropology and sociology. Pierre Bourdieu, a distinguished French anthropologist, develops a theory of practice which is simultaneously a critique of the methods and postures of social science and a general account of how human action should be understood. With his central concept of the habitus, the principle which negotiates between objective structures and practices, Bourdieu is able to transcend the dichotomies which have shaped theoretical thinking about the social world. The author draws on his fieldwork in Kabylia (Algeria) to illustrate his theoretical propositions. With detailed study of matrimonial strategies and the role of rite and myth, he analyses the dialectical process of the 'incorporation of structures' and the objectification of habitus, whereby social formations tend to reproduce themselves. A rigorous consistent materialist approach lays the foundations for a theory of symbolic capital and, through analysis of the different modes of domination, a theory of symbolic power.

The Practice Jan 22 2023 From the bestselling author of *Linchpin*, *Tribes*, and *The Dip* comes an elegant little book that will inspire artists, writers, and entrepreneurs to stretch and commit to putting their best work out into the world. Creative work doesn't come with a guarantee. But there is a pattern to who succeeds and who doesn't.

And engaging in the consistent practice of its pursuit is the best way forward. Based on the breakthrough Akimbo workshop pioneered by legendary author Seth Godin, *The Practice* will help you get unstuck and find the courage to make and share creative work. Godin insists that writer's block is a myth, that consistency is far more important than authenticity, and that experiencing the imposter syndrome is a sign that you're a well-adjusted human. Most of all, he shows you what it takes to turn your passion from a private distraction to a productive contribution, the one you've been seeking to share all along. With this book as your guide, you'll learn to dance with your fear. To take the risks worth taking. And to embrace the empathy required to make work that contributes with authenticity and joy.

The Practice Oct 19 2022 The mind has a way of interfering with personal happiness, often causing stress and doubt. Getting in touch with one's inner source of peace and following its guidance over the mind's often-unfounded concerns requires training and discipline. Knowing this truth intimately, Peaceful Mind Peaceful Life Founder Barb Schmidt developed a three-part spiritual discipline called *The Practice*. *The Practice* is a toolkit to be used throughout the day to guide people who are looking for confidence, less stress, and deeper meaning along life's path. These tools are a compilation of the great Truths taught by authentic teachers and masters throughout the

centuries from various religious and spiritual traditions. In the first three chapters of *The Practice*, readers are guided through the daily routine: Waking Up, Living Present, and Letting Go. Beginning with a morning meditation, a thread of peace is followed over the course of the day through the repetition of a sacred mantra, practicing focused attention, reading for inspiration, and reflecting on the day. In the concluding chapter, readers are provided with an opportunity to deepen their experience of *The Practice* with engaging exercises. By regularly taking the steps to go within each morning, stay present throughout the moments of the day, and letting go of attachments when the day comes to a close, readers will find that they are better able to do the following:

- Remove the obstacles that interfere with inner peace
- Manage stress and cultivate more patience, empathy, and compassion
- Have more courage when facing fears and making changes
- Overcome habitual behaviors and make better choices
- Reduce negative thinking and ease feelings of anxiety, worry, and stress
- See the blessings beneath life's more difficult experiences
- Know a deep feeling of wholeness

Care in Practice Jul 04 2021 In what way is »care« a matter of »tinkering«? Rather than presenting care as a (preferably »warm«)

relation between human beings, the various contributions to the volume give the material world (usually cast as »cold«) a prominent place in their analysis. Thus, this book does not continue to oppose care and technology, but contributes to rethinking both in such a way that they can be analysed together. Technology is not cast as a functional tool, easy to control - it is shifting, changing, surprising and adaptable. In care practices all »things« are (and have to be) tinkered with persistently. Knowledge is fluid, too. Rather than a set of general rules, the knowledges (in the plural) relevant to care practices are as adaptable and in need of adaptation as the technologies, the bodies, the people, and the daily lives involved.

Biomedicalization and the Practice of Culture Aug 05 2021 Over the last twenty years, type 2 diabetes skyrocketed to the forefront of global public health concern. In this book, Mari Armstrong-Hough examines the rise in and response to the disease in two societies: the United States and Japan. Both societies have faced rising rates of diabetes, but their social and biomedical responses to its ascendance have diverged. To explain the emergence of these distinctive strategies, Armstrong-Hough argues that physicians act not only on increasingly globalized professional standards but also on local knowledge, explanatory models, and cultural toolkits. As a result, strategies for clinical management diverge sharply from one country to another. Armstrong-Hough demonstrates how distinctive practices endure in the midst of intensifying biomedicalization, both on the part of patients and on the part of physicians, and how these differences grow from broader cultural narratives about diabetes in each setting.

Practice and Research Feb 17 2020 Practice and Research is an overview of Professor Ian Shaw's analysis of the complexity and challenges of the practice/research relationship in social work - a theme that has been the focus of much of his writing over his career. Introduced with a new essay that reflects on the 'serendipity, misfires and occasional patterns' in his work, the book is grouped into five sections. It covers the following themes, each of which is fully contextualized: ¢ Perspectives on Social Work Research ¢ Evaluation ¢ Qualitative Social Work Research ¢ Practice and Research ¢ The Receiving End: Service Users and Research This book has much to say about the relationship between social work practice and research and is a must-read for any social work student or practitioner.

The Practice of Health Program Evaluation Oct 07 2021 As more and more money is spent developing programs and services to solve health problems, how can one know if a specific health program works or what it would take to improve it? Aimed at addressing this issue, The Practice of Health Program Evaluation provides readers with the methods to evaluate health programs and the expertise to navigate the political terrain so as to work more effectively with decision makers and other groups. To convey these principles, Grembowski uses the metaphor of evaluation being a three-act play with a variety of actors and interest groups, each having a role that involves entering and exiting the "stage" at different points in the evaluation process.
