Snowboard Routes: California

A tank investigation has been conducted on a 1/8-size powered dynamic model of the Grumman JRF-5 airplane equipped with twin hydro-skis. The results of tests using two types of skis are presented: one had vertical sides joining the top surface to the chine; the other

had the top surface faired to the chine to eliminate the vertical sides. Both configurations had satisfactory longitudinal stability although the model had a slightly greater stable elevator range available when the skis without the vertical sides were attached. Free model tests indicated no instability present when one ski emerged before the other. Considerable excess thrust was available at all speeds with either type of skis. A hump gross load-resistance ratio of 3.37 was obtained with the skis with the vertical sides and 3.53 with the other skis. Landing behavior in smooth water with yaw up to 15deg and roll up to 15deg in opposite directions was satisfactory with either type of skis. "After overhearing a murder plot and being pursued by hit men, Mallory Roth knows she has to disappear. She leaves a warning message for her twin--and then runs. Seeking shelter in a small Wisconsin town, Mallory's determined to leave her old life behind. She changes her name, her hair, her clothes ... even her stance on faith.

But big-city detective Jonah Stewart still tracks her down. And if he can find her, a killer can, too. The handsome, world-weary cop claims he wants to help Mallory--will he change his mind when he learns the harrowing secret from her past?"--Publisher. Madeline is on the ski team with her twin brother Parker (who goofs around and enjoys himself), and their friend Sarah, but Maddie cannot help comparing herself to Sarah, the fastest skier on the team, and it is starting to make her angry and spoil her fun--until her father warns her that her attitude could cause problems and ruin her friendship. Journalist Abigail Pogrebin is many things—wife, mother, New Yorker—but the one that has defined her most profoundly is “identical twin.” As children, she and her sister, Robin, were inseparable. But when Robin began to pull away as an adult, Abigail was left to wonder not only why, but also about the very nature of twinship. What does it mean to have a mirror image? How can you be unique when somebody shares your DNA? In *One and the Same*, Abigail sets off on a quest to understand how genetics shape us, crisscrossing the country to explore the varied relationships between twins, which range from passionate to bitterly resentful. Hidden amongst the hills and mountains of southern Vermont are the remnants of sixty former ski areas, their slopes returning to forest and their lifts decaying. Today, only fourteen remain open and active in southern Vermont. Though they offer some incredible skiing, most lack the intimate, local feel of these lost ski trails. Jeremy Davis, creator of the New England Lost Ski Areas Project, looks into the over-investment, local competition, weather variation, changing skier habits, insurance costs and just plain bad luck that caused these ski areas to succumb and melt back into the landscape. From the family-operated Hogback in Windham County to Clinton Gilbert's farm in Woodstock, where the

very first rope tow began operation in the winter of 1934, these once popular ski areas left an indelible trace on the hearts of their ski communities and the history of southern Vermont.
