Introductory Computer Forensics May 22 2020 This textbook provides an introduction to digital forensics, a rapidly evolving field for solving crimes. Beginning with the basic concepts of computer forensics, each of the book's 21 chapters focuses on a particular forensic topic composed of two parts: background knowledge and hands-on experience through practice exercises. Each theoretical or background section concludes with a series of review questions, which are prepared to test students' understanding of the materials, while the practice exercises are intended to afford students the opportunity to apply the concepts introduced in the section on background knowledge. This experience-oriented textbook is meant to assist students in gaining a better understanding of digital forensics through hands-on practice in collecting and preserving digital evidence by completing various exercises. With 20 student-directed, inquiry-based practice exercises, students will better understand digital forensic concepts and learn digital forensic investigation techniques. This textbook is intended for upper undergraduate and graduate-level students who are taking digital-forensic related courses or working in digital forensics research. It can also be used by digital forensics practitioners, IT security analysts, and security engineers working in the IT security industry, particular IT professionals responsible for digital investigation and incident handling or researchers working in these related fields as a reference book.

CSSLP Certification All-in-One Exam Guide Dec 17 2019 Get complete coverage of all the material included on the Certified Secure Software Lifecycle Professional exam. CSSLP All-in-One Exam Guide covers all eight exam domains developed by the International Information Systems Security Certification Consortium (ISC2). You'll find learning objectives at the beginning of each chapter, exam tips, practice questions, and in-depth explanations. Designed to help you pass the exam with ease, this definitive resource also serves as an essential on-the-job reference. COVERS ALL EIGHT CERTIFIED SECURE SOFTWARE LIFECYCLE PROFESSIONAL EXAM DOMAINS: Secure software concepts Secure software requirements Secure software design Secure software implementation/coding Secure software testing Software acceptance Software deployment, operations, maintenance, and disposal Supply chain and software acquisitions ELECTRONIC CONTENT INCLUDES: TWO PRACTICE EXAMS

Human-Computer Interaction: Interaction Modalities and Techniques Mar 12 2022 The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer interaction, addressing the following major topics: speech, natural language and auditory interfaces; gesture and eye-gaze based Interaction; touch-based interaction; haptic interaction; graphical user interfaces and visualisation.

Study and Master Accounting Grade 11 CAPS Study Guide Jun 22 2020

Microwave and RF Design, Volume 1 Apr 01 2021 Microwave and RF Design: Radio Systems is a circuits- and systems-oriented approach to modern microwave and RF systems. Sufficient details at the circuits and sub-system levels are provided to understand how modern radios are implemented. Design is emphasized throughout. The evolution of radio from what is now known as 0G, for early radio, through to 6G, for sixth generation cellular radio, is used to present modern microwave and RF engineering concepts. Two key themes unify the text: 1) how system-level decisions affect component, circuit and subsystem design; and 2) how the capabilities of technologies, components, and subsystems impact system design. This book is suitable as both an undergraduate and graduate textbook, as well as a career-long reference book. Key Features * The first volume of a comprehensive series on microwave and RF design * Open access ebook editions are hosted by NC State University Libraries at <https://repository.lib.ncsu.edu/handle/1840.20/36776> * 31 worked examples * An average of 38 exercises per chapter * Answers to selected exercises * Coverage of cellular radio from 1G through 6G * Case study of a software defined radio illustrating how modern radios partition functionality between analog and digital domains * A companion book, Fundamentals of Microwave and RF Design, is suitable as a comprehensive undergraduate textbook on microwave engineering

Basic Analog and Digital Oct 15 2019

Study and Master Accounting Grade 11 Teacher's Guide Feb 28 2021 Study & Master Accounting was developed with the help of practising teachers, and covers all the requirements of the National Curriculum Statement for accounting.

ISE International Accounting Jan 18 2020 The Fifth Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

Interview Questions and Answers Nov 27 2020

Viet Nam Nov 08 2021 This report examines how technical and vocational education and training (TVET) in Viet Nam can be improved to increase the country's global competitiveness. Following three decades of sustained economic growth, in 2009, Viet Nam graduated to become a lower middle-class country. However, despite ample foreign direct investment, labor productivity remains low. Improved TVET will help boost labor productivity in Viet Nam by developing skilled workers that meet market demands.

Recommendations in this report focus on reforms in the governance structure, organization, and management of TVET; effective teaching of the right skills; greater enterprise-based training and financial support; and more inclusive access to higher quality training.

Python Data Analytics Oct 07 2021 Python Data Analytics will help you tackle the world of data acquisition and analysis using the power of the Python language. At the heart of this book lies the coverage of pandas, an open source, BSD-licensed library providing high-performance, easy-to-use data structures and data analysis tools for the Python programming language. Author Fabio Nelli expertly shows the strength of the Python programming language when applied to processing, managing and retrieving information.

Inside, you will see how intuitive and flexible it is to discover and communicate meaningful patterns of data using Python scripts, reporting systems, and data export. This book examines how to go about obtaining, processing, storing, managing and analyzing data using the Python programming language. You will use Python and other open source tools to wrangle data and tease out interesting and important trends in that data that will allow you to predict future patterns. Whether you are dealing with sales data, investment data (stocks, bonds, etc.), medical data, web page usage, or any other type of data set, Python can be used to interpret, analyze, and glean information from a pile of numbers and statistics. This book is an invaluable reference with its examples of storing and accessing data in a database; it walks you through the process of report generation; it provides three real world case studies or examples that you can take with you for your everyday analysis needs.

Human Sigma Jul 04 2021 Six Sigma changed the face of manufacturing quality. Now, HumanSigma is poised to do the same for sales and service organizations. Human Sigma offers an innovative, research-based approach to one of the toughest challenges businesses face today: how to effectively manage the employee-customer encounter to drive business success. Based on research spanning 10 million employees and 10 million customers around the world, the Human Sigma approach combines a proven method for assessing the health of the employee-customer encounter with a disciplined process for improving it. Human Sigma is based on five rules to bring excellence to how employees engage and interact with customers: RULE #1: E Pluribus Unum. Employee and customer experiences must be managed together — not as separate entities. RULE #2: Feelings Are Facts. Emotions drive and shape the employee-customer encounter. RULE #3: Think Globally, Measure and Act Locally. The employee-customer encounter must be measured and managed at the local level. RULE #4: There Is One Number You Need to Know. Employee and customer engagement interact to drive enhanced financial performance. And this interaction can be quantified and summarized with a single performance metric. RULE #5: If You Pray for Potatoes, You Better Grab a Hoe. Good intentions alone do not constitute a plan of action. Sustainable improvement in the employee-customer encounter requires disciplined local action coupled with a companywide commitment to changing how employees are recruited, positioned in roles, rewarded and recognized, and importantly, how they are managed. Essential reading for global business leaders, Human Sigma shows how sales and service companies can flourish in the new global economy. It reveals a profoundly different method for managing human systems for growth. Blending strategic analysis with hands-on, practical steps and advice, Human Sigma will change how you view your work, your employees and your customers forever.

Smartphones and Tablets Repairs Feb 17 2020 Mobile Phones and Tablets Repairs, the first edition in the series was a 364 page complete manual that introduced beginners into the technology of mobile devices and the practical skills necessary to fix all kinds of faults on mobile devices. This second edition, Smartphones and Tablets Repairs is an upgraded edition with new advanced information for both beginners and professionals in the field of technical repairs. This edition covered screen technologies and LCD or digitizer replacements, description of internal components and electronics, hardware and software repair procedures for smartphones and tablets, hardware and software repair tools information, troubleshooting, BGA soldering, flash programming, electronic circuit analysis and many more. The book also ends with a chapter of information on how to set up shop and efficiently manage a repair services support center. Discover the secrets of technical hardware repairs with this book! If there is any complete guide-book on computer repairs ever known, then this book is the complete guide-book for mobile smartphones and tablets repairs! If you are searching for a new means of livelihood or a side business (even online business) that is lucrative; one whereby the only business CAPITAL required is this book and the skills it empowers you with in order to exchange personal services for money, then this book, perhaps combined with the foundational first edition is for you. It is a complete Do-It-Yourself Guide book. This book is for the unemployed, underemployed, students, entrepreneurs, retirees or just about anyone seeking for a good resource for practical learning towards self-reliance. In this century, the age of mobile communication and computing, or work-from-home trends especially with the pandemics, it is one of the hottest technical repair service business with great financial returns. Manufacturers of smartphone brands release new products every six months. There is no stopping this trend anytime soon. With the world's population estimated at 7.8 billion, Statista website released a statistics which reported that over 19 percent of the world's total population owned a smart device in 2019, projecting that the figure is expected to increase to 37 percent by 2021. The opportunity to make money fixing smartphones and tablets is

huge! Through the pages of this book, a reader would translate from a novice status, training to become proficient at fixing any mobile device, with a brighter and faster earning potential than most PC technicians. There is no expiry date for what is taught in the two editions of this book series. What this book teaches is practicable towards becoming also, a good PC technician.

Exploiting a Technological Edge Aug 25 2020

Agile Processes in Software Engineering and Extreme Programming Aug 05 2021 This open access book constitutes the proceedings of the 20th International Conference on Agile Software Development, XP 2019, held in Montreal, QC, Canada, in May 2019. XP is the premier agile software development conference combining research and practice. It is a hybrid forum where agile researchers, academics, practitioners, thought leaders, coaches, and trainers get together to present and discuss their most recent innovations, research results, experiences, concerns, challenges, and trends. Following this history, for both researchers and seasoned practitioners XP 2019 provided an informal environment to network, share, and discover trends in Agile for the next 20 years The 15 full papers presented in this volume were carefully reviewed and selected from 45 submissions. They were organized in topical sections named: agile adoption, agile practices; large-scale agile; agility beyond IT, and the future of agile.

Choosing and Using Astronomical Eyepieces Dec 21 2022 A valuable reference that fills a number of niches including that of a buyer's guide, technical desk reference and observer's field guide. It documents the past market and its evolution, right up to the present day. In addition to appealing to practical astronomers - and potentially saving them money - it is useful both as a historical reference and as a detailed review of the current market place for this bustling astronomical consumer product. What distinguishes this book from other publications on astronomy is the involvement of observers from all aspects of the astronomical community, and also the major manufacturers of equipment. It not only catalogs the technical aspects of the many modern eyepieces but also documents amateur observer reactions and impressions over the years, using many different eyepieces. Eyepieces are the most talked-about accessories and collectible items available to the amateur astronomer. No other item of equipment commands such vigorous debate, or has evolved into such a remarkable array of forms and functions. 'Choosing and Using Astronomical Eyepieces' provides a vast amount of reference material to point readers towards the best buys and the right eyepieces for different kinds of observing.

Pervasive Computing Dec 29 2020 This book constitutes the refereed proceedings of the Third International Conference on Pervasive Computing, PERVASIVE 2005, held in Munich, Germany in May 2005. The 20 revised full papers presented were carefully reviewed and selected from 130 submissions. The papers are organized in topical sections on location techniques, activity and context, location and privacy, handheld devices, sensor systems, and user interaction.

Digital Economic Dynamics May 02 2021 This book analyzes the dynamics and impacts of software development and discusses new institutional and economic changes in the context of digital market economies. Regulatory approaches in OECD countries are compared and country studies evaluated with respect to innovation and welfare aspects. The book furthermore examines telecommunications regulation of fixed line networks, cable TV and mobile communications. Also discusses the role of EU framework regulation and issues of market power.

Object-Oriented Technology. ECOOP '98 Workshop Reader Jan 30 2021 At the time of writing (mid-October 1998) we can look back at what has been a very successful ECOOP'98. Despite the time of the year – in the middle of what is traditionally regarded as a holiday period – ECOOP'98 was a record breaker in terms of number of participants. Over 700 persons found their way to the campus of the Brussels Free University to participate in a wide range of activities. This 3rd ECOOP workshop reader reports on many of these activities. It contains a careful selection of the input and a cautious summary of the outcome for the numerous discussions that happened during the workshops, demonstrations and posters. As such, this book serves as an excellent snapshot of the state of the art in the field of object oriented programming. About the diversity of the submissions A workshop reader is, by its very nature, quite diverse in the topics covered as well as in the form of its contributions. This reader is not an exception to this rule: as editors we have given the respective organizers much freedom in their choice of presentation because we feel form follows content. This explains the diversity in the types of reports as well as in their lay out.

Cybersecurity Fundamentals Sep 25 2020 Cybersecurity Fundamentals: A Real-World Perspective explains detailed concepts within computer networks and computer security in an easy-to-understand way, making it the perfect introduction to the topic. This book covers fundamental issues using practical examples and real-world applications to give readers a rounded understanding of the subject and how it is applied. The first three chapters provide a deeper perspective on computer networks, cybersecurity, and different types of cyberattacks that hackers choose to unleash on cyber environments. It then goes on to cover the types of major computer malware and cybersecurity attacks that shook the cyber world in the recent years, detailing the attacks and analyzing their impact on the global economy. The details of the malware codes that help the hacker initiate the hacking attacks on networks are fully described. It then covers high-tech cybersecurity programs, devices, and mechanisms that are extensively adopted in modern security systems. Examples of those systems include intrusion detection systems (IDS), intrusion prevention systems (IPS), and security firewalls. It demonstrates how modern technologies can be used to create and manage passwords for secure data. This book also covers aspects of wireless networks and their security mechanisms. The details of the most commonly used Wi-Fi routers are provided with step-by-step procedures to configure and secure them more efficiently. Test questions are included throughout the chapters to ensure comprehension of the material. Along with this book's step-by-step approach, this will allow undergraduate students of cybersecurity, network security, and related disciplines to gain a quick grasp of the fundamental topics in the area. No prior knowledge is needed to get the full benefit of this book.

Software Process and Product Measurement Oct 27 2020 Since 1990 the International Workshop on Software Measurement (IWSM) has been celebrated annually in Montré eal (Qué ebec), Canada, and di?erent places all over Germany by turns. The Montré eal editions were organized by the Soft- 1 'ware Engineering Research Laboratory (GELOG) of the Ecole de technologie ' sup' erieure (ETS) at the University of Qué ebec at Montré eal (UQAM), which is directed by Professor Alain Abran. The German editions were organized 2 jointly by the Software Measurement Laboratory (SMLAB) of the Otto-von- Guericke-UniversityMagdeburg,Germany,whichisdirectedbyProfessorReiner R. Dumke; and the German-speaking user association for software metrics and 3 e?ort estimation (DASMA e. V.) . Partially, the editions of IWSM were held jointly with the DASMA Software Metrik Kongress (MetriKon). 4 Organized by an initiative of Jos' e Javier Dolado from the University of 5 the Basque Country at San Sebastian and Juan J. Cuadrado-Gallego from the University of Alcalá in Madrid the ?rst edition of the International Conference onSoftwareMeasurement(Mensura) couldbe convenedin C' adiz,Spainin 2006. Motivated by this success and with the ?rst edition of Mensura ?nding special approval, the organizers of IWSM and Mensura decided to complement each other and, thus, to organize the next conference edition together. In November 2007, the typical convention month for both conferences, that joint conference was held in Palma de Mallorca, Spain.

Evoking a Sense of Place Jul 24 2020

ACCT 640, Accounting Concepts and Procedures I Jan 22 2023

Organizational Dynamics of Technology-Based Innovation: Diversifying the Research Agenda Sep 18 2022 This volume presents papers from the 10th Working Conference of the IFIP WG 8.6 on the adoption and diffusion of information systems and technologies. It explores the dynamics of how some technological innovation efforts succeed while others fail. The book looks to expand the research agenda, paying special attention to the areas of theoretical perspectives, methodologies, and organizational sectors.

A Practical Guide to Action Research for Literacy Educators Jan 10 2022 This manual has been developed to enhance the professional capacity of educators in the area of Action Research. Filled with practical information, examples, and worksheets, the manual is based on training modules developed by the Professional Development program of USAID/ESRA in cooperation with the International Reading Association. The manual will serve as a starting point for enhancing the literacy instruction capacity of teachers around the world to improve the quality of education.

Palestrina Nov 15 2019

Software Quality - ECSQ 2002 Oct 19 2022 Software professionals and companies live in a new world today. Increasingly complex systems need to be built faster and cheaper. While many of the est- lished approaches in software quality are still valid, the software quality c- munity is going through a paradigm shift that requires a re-assessment of our current method and tool portfolio, as well as creating new and more e?ective solutions. We have selected two themes for this conference to highlight this paradigm shift. Our ?rst theme, "production of attractive and reliable software at Internet speed" sums up the dilemma many software organisations face. In order to be competitive, software should contain advanced features and run reliably – yet it should be developed quickly and cost e?ectively for the right market window. Finding the right balance between these objectives is a critical question that will determine business success in the years to come. Our second theme, "production of software with a dynamic partnership n- work" highlights the current trend of using partnerships and subcontractors as integral players in the software development process. Partnerships sometimes need to be created quickly to respond to a market opportunity, yet the costs and speed of cooperation must be competitive. Di?erent companies have di?erent processes, quality tools and cultures, yet they should cooperate seamlessly for the best result.

Food at Work Feb 11 2022 This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break, and decent conditions for eating is not only socially important and economically viable but a profitable business practice, too. Food at Work sets out key points for designing a meal program, presenting a multitude of "food solutions" including canteens, meal or food vouchers, mess rooms and kitchenettes, and partnerships with local vendors. Through case studies from a variety of enterprises in twenty-eight industrialized and developing countries, the book offers valuable practical food solutions that can be adapted to workplaces of different sizes and with different budgets.

eMarketing eXcellence Aug 17 2022 'eMarketing eXcellence' offers an exciting new approach to help you build a customer-driven e-business. As the core text for the CIM's E-marketing award, the book offers a highly structured and accessible guide to a critical subject, providing a useful reference point for all students and managers involved in marketing strategy and implementation. A practical guide to creating and executing e-marketing plans, this book combines established approaches to marketing planning with the creative use of new e-models and e-tools. It is designed to support both marketers who are integrating e-marketing into their existing marketing and communications strategies and experienced e-marketers looking to optimise their e-marketing. The book shows how to: · Draw up an outline e-marketing plan · Evaluate and apply e-marketing principles & models · Integrate online and offline communications · Implement customer-driven e-marketing · Reduce costly trial and error · Measure and enhance your e-marketing · Drive your e-business forward As the core text for the CIM's new professional E-marketing Award, it provides comprehensive, critical coverage of the key areas of e-marketing planning for marketing professionals. Established marketing concepts such as customer relationship management, the marketing mix and the widely adopted SOSTAC® planning system, are re-examined in the new media context - and new approaches are defined, including business models, traffic building and web site design.

Intermediate Accounting Apr 13 2022 Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting. Lo/Fisher presents the how and why of reporting accounting information from within

an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. Note: You are purchasing a standalone product; MyAccountingLab does not come packaged with this content. Students, if interested in purchasing this title with MyManagementLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyAccountingLab, search for: 0134145054 / 9780134145051 Intermediate Accounting, Vol. 1 Plus MyAccountingLab with Pearson eText -- Access Card Package, 3/e Package consists of: 0133865940 / 9780133865943 Intermediate Accounting, Vol. 1 0134193482 / 9780134193489 NEW MyAccountingLab with Pearson eText -- Valuepack Access Card -- for Intermediate Accounting, Vol. 1

Communication Systems Sep 06 2021 Presents main concepts of mobile communication systems, both analog and digital Introduces concepts of probability, random variables and stochastic processes and their applications to the analysis of linear systems Includes five appendices covering Fourier series and transforms, GSM cellular systems and more

Wireless Communications Jun 15 2022 Wireless technology is a truly revolutionary paradigm shift, enabling multimedia communications between people and devices from any location. It also underpins exciting applications such as sensor networks, smart homes, telemedicine, and automated highways. This book provides a comprehensive introduction to the underlying theory, design techniques and analytical tools of wireless communications, focusing primarily on the core principles of wireless system design. The book begins with an overview of wireless systems and standards. The characteristics of the wireless channel are then described, including their fundamental capacity limits. Various modulation, coding, and signal processing schemes are then discussed in detail, including state-of-the-art adaptive modulation, multicarrier, spread spectrum, and multiple antenna techniques. The concluding chapters deal with multiuser communications, cellular system design, and ad-hoc network design. Design insights and tradeoffs are emphasized throughout the book. It contains many worked examples, over 200 figures, almost 300 homework exercises, over 700 references, and is an ideal textbook for students.

The User's Mental Model of an Information Retrieval System Apr 20 2020

Software-Defined Radio for Engineers Feb 23 2023 Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

Big Data and Smart Digital Environment Jul 16 2022 This book reviews the state of the art of big data analysis and smart city. It includes issues which pertain to signal processing, probability models, machine learning, data mining, database, data engineering, pattern recognition, visualisation, predictive analytics, data warehousing, data compression, computer programming, smart city, etc. Data is becoming an increasingly decisive resource in modern societies, economies, and governmental organizations. Data science inspires novel techniques and theories drawn from mathematics, statistics, information theory, computer science, and social science. Papers in this book were the outcome of research conducted in this field of study. The latter makes use of applications and techniques related to data analysis in general and big data and smart city in particular. The book appeals to advanced undergraduate and graduate students, postdoctoral researchers, lecturers and industrial researchers, as well as anyone interested in big data analysis and smart city.

The 9th Symbol Dec 09 2021 Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Financial & Managerial Accounting for MBAs May 14 2022

Managing Supply Chain Risk Nov 20 2022 "Supply Chain Risk Management is an issue that many companies face and yet few companies know how to deal with it in a systematic and pragmatic manner. While avoiding and reducing supply chain risks are certainly preferable, developing ways to restore and stabilize supply chain operations rapidly after a major disruption is critical for managing global supply chains. Sodhi and Tang present important concepts, frameworks, strategies, and analyses that are essential for managing supply chain risks. Not only does this book suggest some practical ways to work with different partners to manage the risks that are present in a global supply chain, it creates a framework that would enable practitioners to engage researchers to work on this important area." —Thomas A. Debrowski, Executive Vice President, Worldwide Operations, Mattel, Inc. "When a firm outsources its operations to external suppliers, the firm is vulnerable to major and rare disruptions that can occur at any link in the global supply chain. Because these disruptions rarely occur, few firms take commensurable actions to identify, assess, mitigate and respond to various types of supply chain risks. By introducing frameworks and concepts along with several case studies and a review of academic literature, Sodhi and Tang treat this important subject with practical relevance and academic rigor. This book will bring practitioners and researchers to develop effective and efficient ways to manage supply chain risks." —Marshall L. Fisher, UPS Professor, Professor of Operations and Information Management and Co-Director of Fishman-Davidson Center for Service and Operations Management, The Wharton School, University of Pennsylvania "This book ties observations in practice to methodologies and research. The rich case examples motivated the approaches and methodologies used to mitigate risks, and in the course of doing so, Sodhi and Tang provided insights on existing and new research opportunities. As a result, this book is highly relevant to both practitioners and academics. Also, the book is also written with management lessons on how risks can be mitigated, and how risks can be contained once disruptions have occurred. As such, it is also a book for management to gain insights and to develop management skills." —Hau L. Lee, Thoma Professor of Operations, Information and Technology and Director of the Stanford Global Supply Chain Management Forum, Graduate School of Business, Stanford University "As companies have extended their supply chains globally and as the face increasing resource issues, they face a number of new risk challenges. While there are various case studies written about supply chain risks, this book gives a comprehensive treatment of the subject with clarity. The concepts and frameworks developed by Sodhi and Tang in this book would create awareness of this important and yet not well understood subject, and strategies described in this book would stimulate practitioners to develop a holistic approach for identifying, assessing, mitigating, and responding to different types of supply chain risks." —Nick Wildgoose, Global Supply Chain Proposition Manager, Zurich Insurance?

Managing Supply Chain Risk and Vulnerability Jun 03 2021 Managing Supply Chain Risk and Vulnerability, a book that both practitioners and students can use to better understand and manage supply chain risk, presents topics on decision making related to supply chain risk. Leading academic researchers, as well as practitioners, have contributed chapters focusing on developing an overall understanding of risk and its relationship to supply chain performance; investigating the relationship between response time and disruption impact; assessing and prioritizing risks; and assessing supply chain resilience. Supply chain managers will find Managing Supply Chain Risk and Vulnerability a useful tool box for methods they can employ to better mitigate and manage supply chain risk. On the academic side, the book can be used to teach senior undergraduate students, as well as graduate-level students. Additionally, researchers may use the text as a reference in the area of supply chain risk and vulnerability.

Machine Learning and Knowledge Discovery in Databases Mar 20 2020 The three volume proceedings LNAI 11051 – 11053 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases, ECML PKDD 2018, held in Dublin, Ireland, in September 2018. The total of 131 regular papers presented in part I and part II was carefully reviewed and selected from 535 submissions; there are 52 papers in the applied data science, nectar and demo track. The contributions were organized in topical sections named as follows: Part I: adversarial learning; anomaly and outlier detection; applications; classification; clustering and unsupervised learning; deep learning; ensemble methods; and evaluation. Part II: graphs; kernel methods; learning paradigms; matrix and tensor analysis; online and active learning; pattern and sequence mining; probabilistic models and statistical methods; recommender systems; and transfer learning. Part III: ADS data science applications; ADS e-commerce; ADS engineering and design; ADS financial and security; ADS health; ADS sensing and positioning; nectar track; and demo track.
